Reading Our Report

This Sustainability Report (the “Report”, or “Sustainability Report”) is divided into sections comprising each publicly listed Dream entity: **Dream Unlimited Corp.**, **Dream Impact Trust**, **Dream Office REIT**, **Dream Industrial REIT** and **Dream Residential REIT**. The introduction, and subsequent Environmental/Net Zero, Social and Governance sections focus on the shared net zero strategy, social policies, processes and programs, and governance and risk management for the Dream group of companies.

The Dream group of companies (collectively referred to as “Dream”, the “Dream group”, the “Dream entities”, “we”, or “our”) includes:

[Dream Unlimited Corp. \(TSX: DRM\)](#) ↗
[“Dream Unlimited”, or “DRM”]

[Dream Impact Trust \(TSX: MPCT.UN\)](#) ↗
[“Dream Impact”, or “MPCT.UN”]

[Dream Office Real Estate Investment Trust \(TSX: D.UN\)](#) ↗
[“Dream Office”, or “D.UN”]

[Dream Industrial Real Estate Investment Trust \(TSX: DIR.UN\)](#) ↗
[“Dream Industrial”, or “DIR.UN”]

[Dream Residential Real Estate Investment Trust \(TSX: DRR.U and DRR.UN\)](#) ↗
[“Dream Residential”, or “DRR.U”]

The remainder of this report focuses on the environmental, social and governance (“ESG”) performance and practices of each public entity. Each entity has specific investment objectives and a unique underlying business which drives its ESG initiatives and the information reported on.

We realize the majority of our readers will focus on the entity chapter(s) which coincides with their interests or investments. We have therefore structured this report so each entity chapter can be read on a standalone basis resulting in some repetition across entity chapters.

The Overstory at Quayside
Toronto, ON

About this Report

Our 2023 Sustainability Report discloses the most relevant ESG topics and impacts of our activities for the year ended December 31, 2023. This Report also highlights our 2023 ESG initiatives and accomplishments and presents our forward-looking plans for 2024. Reports from previous years are available on our website. The [2022 Sustainability Report](#) was published in May 2023.

Reporting Scope and Boundaries

This Report encompasses the Dream group of companies. All information and performance data contained in this Report reflects the period from January 1, 2023 to December 31, 2023, unless otherwise stated. All amounts are reported in Canadian dollars unless otherwise stated. There have been no restatements from the information published in the 2022 Sustainability Report, unless otherwise stated in footnotes.

Approvals

This Report on the recommendation of the Governance Committees have been approved by the following boards and executives of each entity.

DRM	MPCT.UN	D.UN	DIR.UN	DRR.U
• Board	• Board	• Board	• Board	• Board
• CRO	• Portfolio Manager	• CEO	• President & CEO	• CEO
• CFO	• CFO	• CFO	• CFO	• CFO
	• CFO	• COO		• COO

External Assurance

PricewaterhouseCoopers LLP (“PwC”) has performed a limited assurance engagement over select performance metrics for Dream Unlimited, Dream Impact, Dream Office, Dream Industrial, and Dream Residential, which have been identified with the symbol “✓” throughout this Report. This Report and the information contained within is unaudited. For more information about the scope of PwC’s work, including the select performance metrics and data in scope of the assurance click on the following links: [Dream Unlimited](#), [Dream Impact](#), [Dream Office](#), [Dream Industrial](#), [Dream Residential](#).

Contact

For any questions or feedback regarding this report, please contact our sustainability and ESG team at: sustainabilityandesg@dream.ca

Reporting Standards

This Report has been prepared with references to the Global Reporting Initiative (“GRI”) Standards. It also includes indicators from the Sustainability Accounting Standards Board (“SASB”) Real Estate Standard and addresses the recommendations of the Task Force on Climate-related Financial Disclosures (“TCFD”). In addition, Dream Industrial’s disclosures include alignment with the European Public Real Estate Association (“EPRA”) Sustainability Best Practices Recommendations (“sBPR”) for sustainability reporting. These standards are referenced in the reference tables starting on [page 145](#) of this Report.

In June 2023, the IFRS Accounting Standards as issued by the International Accounting Standards Board (“IFRS Accounting Standards”) published two Sustainability Disclosure Standards. While not currently mandatory in Canada, we are monitoring the implications of IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information and IFRS S2 Climate-related Disclosures on our future reporting.

Dream Group of Companies

Dream Group of Companies

Introduction

Founded in 1994 with a vision to revolutionize the way people live and work, the Dream group of companies have become some of Canada's leading real estate companies, with approximately \$24 billion of assets under management across its platform⁽¹⁾.

⁽¹⁾ As at December 31, 2023. Assets under management is a supplementary financial measure in respect of DRM. Please refer to the **Specified Financial Measures and Other Disclosures** section of this Report.

Hans-Böckler-Strasse 35
Minden, Germany

Letter from Chief Responsible Officer

Over the past few years, Dream has undergone a significant transformation as we focused on growing our asset management business, owning and operating income properties, specifically purpose-built rentals, and the continued development of our exceptional projects. We are proud to have made these changes while the real estate industry is experiencing significant challenges from high interest rates, inflation and economic uncertainty.

Alongside our progress, we've found meaningful ways to deliver on our goal of **Building Better Communities**. We believe our business can create positive and measurable impacts on people and the planet, create new business opportunities, and deliver stakeholder value.

We continued to work collaboratively with municipalities and the federal government on zoning and financing solutions to create more housing for our communities. This year, we completed over 950 purpose-built rentals in our development pipeline, the most in our history, including the LEED Gold certified Maple House at Canary Landing and Aalto II at Zibi, our net zero community. This showcases how we are effectively leveraging our existing land assets to generate recurring income with strong returns, while addressing the critical need for housing across the country and minimizing our environmental footprint.

Our team is executing on our development pipeline, including Zibi, Dream LeBreton, and Quayside, with nearly 7,700 housing units and 2.5 million sf in commercial/retail GLA, all of which are intended to be net zero. This positions us to develop a projected \$6 billion worth of net zero communities in North America⁽¹⁾, which will help us realize economies of scale, attract financing and capitalize on tenant demand for sustainable spaces to generate returns for our investors. Constructing to green building standards is becoming table stakes in the markets where we operate and we are well prepared based on our track record to navigate these requirements.

Sustainability remains a key priority for Dream Industrial. In 2023, we advanced many of our sustainability goals including the completion of 3.7 MW of solar projects and achieved 3.5 million sf in green certifications. While our renewable energy program is less than two years old, it has already contributed over \$1 million to our annual NOI and we will continue to pursue additional opportunities as they arise to further scale these returns.

Across our office portfolio, we continued to realize energy, water and GHG emissions reductions from operational efficiencies and projects we've completed in the past. We are prudently managing our capital and are focused on leveraging our existing capabilities and funding sources to yield results, such as certifying more of our office portfolio to green building standards while reducing our equity outlay by using our Canada Infrastructure Bank credit facility.

We are proud of our accomplishments at Arapahoe Basin, where we achieved carbon neutrality in late 2023.⁽²⁾ We co-founded the National Ski Area Association's Sustainable Slopes Environmental Charter over 20 years ago, and set seven ambitious sustainability goals in 2018. The value-add sustainability initiatives undertaken by the team have helped build the brand, positioned the asset well with its customer base and contributed to a great return on investment.

We were once again recognized as one of Greater Toronto's Top Employers and one of Canada's Best Workplaces™ in Real Estate & Property Development. Building a winning team and culture is key to our future success. Our people and their passion to make a positive difference is reflected in everything we do. The work we have done to date and the accomplishments highlighted in this report would not be possible without the commitment and hard work of our great team.

The long-term risks from climate change continue to be a concern in the investment community and economic uncertainty in the near-term continues to challenge the real estate market. Against this backdrop, we are looking at how building a resilient and sustainable business can protect asset value, maintain strong liquidity levels, differentiate ourselves and deliver market returns to investors.

We are encouraged by our track record of executing on our projects, being pragmatic in our decision-making and delivering impactful results. We look forward to sharing more of our work with you in this report as we continue to evolve and challenge expectations of the impact a real estate company can have.

“Michael J. Cooper”

Michael Cooper
Chief Responsible Officer
Dream Unlimited Corp.

June 11, 2024

Maple House at Canary Landing
Toronto, ON

(1) GFA and GLA are at 100% project level and include planned units, which are subject to change pending various development approvals. Planned residential units may be developed as condominium units or purpose-built rentals as supported by market demands, targeted studies and return objectives.
(2) For more information on Arapahoe Basin's carbon neutrality goals and progress, please refer to <https://www.arapahoebasin.com/sustainability/>.

Letter from Head of Sustainability and ESG

In our fifth consecutive Sustainability Report, we are proud to share updates on how our journey to build a more sustainable business that creates positive impact is progressing. It is commonly stated that real estate is responsible for about 39% of global GHG emissions. But when we dig further into this number, we find that approximately 28% is from operational emissions and the remaining 11% is from embodied carbon associated with materials and construction during the development stage⁽¹⁾. As we are over two years into our net zero journey, we now have completed several projects to reduce operational emissions and we have several initiatives to reduce embodied carbon from our developments underway, which we will continue to learn from to optimize our strategy moving forward.

We've made significant progress in refining our net zero delivery strategies and integrating them across our business. To do this effectively, we've used in-house expertise and tools, and scaled our program to more assets, to reduce overall costs and time to meet the goals set out in our business plan.

In 2023, we also continued to secure funding for our decarbonization retrofits. Three of Dream's properties were selected, out of eight total selected projects, to participate in the City of Toronto's Deep Retrofit Challenge ("DRC") and are eligible to receive grants of up to \$500,000 to accelerate emissions reductions from buildings in Toronto and identify pathways to net zero that can be replicated in other buildings across the city.

We continued to decarbonize our existing office and apartment assets using attractive financing provided by the Canada Infrastructure Bank ("CIB"). We've drawn over \$23 million of this funding across 14 properties in a responsible manner towards our net zero goals. These projects can reduce GHG emissions, reduce operating costs, modernize the buildings, improve the tenant experience and protect asset value. As part of this program, we have achieved the rigorous Investor Ready Energy Efficiency ("IREE") certification for 19 properties⁽²⁾ and, as a result, we have the largest portfolio of IREE certified projects in Canada.

For its renewable power program in Canada, Dream Industrial has secured over \$800,000 in government and utility incentives to support 2.6 MW of solar projects. In the Netherlands, all of the solar projects completed and underway have been granted the government's energy production subsidy scheme ("SDE" or SDE++), which guarantees a fixed energy rate for the solar project for 15 years and, in 2023, 17 additional projects were approved for SDE++.

Using government funding sources like the CIB and DRC preserves our equity while achieving our business plan goals and creates new revenue streams, such as through renewable energy production.

We are proud to have completed our inaugural United Nations Principles for Responsible Investment (PRI) submission and continued our Net Zero Asset Managers initiative reporting – both demonstrating transparency, accountability and good governance over the commitments we set. We successfully have implemented many best practices on integrating sustainability, impact and ESG into our investment decision making and, as a result, achieved excellent results with our PRI scores.

We also increased our participation in the GRESB Real Estate Assessment with four submissions in 2023 for our public companies and are proud of the results, providing our investors with extensive information on our progress on the management and performance of sustainability and ESG-related risks and opportunities.

In 2023, we launched a Climate Resiliency Working Group to bring various stakeholders together to collaborate on pragmatic strategies for our assets to adapt to the changing environment.

We have also continued preparing for sustainability and climate-related regulations in Canada, the United States and Europe, leveraging our shared platform to reduce compliance costs and position us well for further investment.

We hope you continue to find our reporting informative, educational, and inspiring as we continue our sustainability journey.

"Lee Hodgkinson"

Lee Hodgkinson
Head of Sustainability and Technical Services
Dream Unlimited Corp.

Dream Private Investment Vehicles

Dream Impact Fund is one of Canada's first real estate impact funds, focused exclusively on investments that generate measurable social, environmental, and financial returns.

Dream Summit Industrial Joint Venture ("Dream Summit") is a partnership with GIC which acquired Summit Industrial Income REIT with a portfolio of light industrial properties in Canada in February 2023. Additionally, there is a private partnership with a major Canadian financial institution through the Dream Summit partnership.

Development Joint Venture is a partnership with a leading global sovereign wealth fund to build high-quality, best-in-class industrial assets in the greater Toronto area with the intention to hold the properties following stabilization.

Dream U.S. Industrial Fund invests in high-quality core, core+, value-add and development industrial assets across the United States.

(1) As at December 31, 2023. Assets under management is a supplementary financial measure in respect of DRM. Please refer to the [Specified Financial Measures and Other Disclosures section](#) of this Report.

Associations and Memberships

Headquartered in Toronto, Canada, Dream is responsible for some of Canada's most iconic and transformational projects. We always invest with purpose, embracing creativity, passion and innovation to deliver high returns, while doing good for the communities and the world around us.

Dream's head office at 30 Adelaide St. E
Toronto, ON

ESG Framework

For over two decades, we have worked to **build better communities** while maximizing returns for our investors.

In 2021, we launched our ESG Framework to identify our ESG priorities and support formal integration of ESG throughout our business. The ESG Framework was developed through consideration of global macro trends influencing the sustainability landscape, a review of the ESG topics material for our industry and input from key stakeholders.

While our ESG Framework applies to the Dream group, each entity is empowered to consider ESG topics to reduce risks and capitalize on the unique opportunities specific to its business model and strategy. For example, Dream Industrial is focused on increasing renewable energy generation and capacity from solar panels on industrial buildings, which reduces emissions and creates an additional revenue stream. Similarly, Dream Office prioritizes building certifications to attract tenants, protect asset values, reduce utility costs and obtain competitive financing.

Our Sustainability and ESG team is responsible for supporting the implementation of the ESG Framework across all entities, helping to ensure that ESG risks and opportunities are integrated into our business activities including our investment decision-making, asset management, property management, stakeholder engagement, risk management and governance processes.

Environmental

- Building certifications
- Carbon and resource efficiency
- Climate change resilience
- Connectivity and low carbon transportation
- Innovation and technology adoption
- Sustainable development
- Sustainable redevelopment

Social

- Amenities and inclusive atmosphere
- Attainability and affordability
- Community and NGO partnerships
- Diversity, inclusion and advancement
- Health, safety and wellness
- Indigenous engagement
- Sustainable procurement
- Tenant relationships
- Valuing employees

Governance

- Corporate governance
- ESG impact and management
- ESG risk management
- Government collaboration

United Nations Sustainable Development Goals

In 2015, the United Nations **Sustainable Development Goals (“SDGs”)** were adopted by all United Nations Member States as a universal call to action to protect the planet and ensure that all people enjoy peace and prosperity. There are 17 goals in total which provide a shared blueprint to achieve these goals by 2030.

As a real estate developer and manager, we have the potential to support many of the SDGs. Our ESG and Impact Frameworks position us to contribute to the SDGs that are most closely connected to our core business activities and where we can intentionally measure our impact. We are focused on building safe, resilient, inclusive, and sustainable cities. Therefore, we view **SDG 11: Sustainable Cities and Communities** as our overarching goal with several other SDGs supporting asset-level projects and initiatives within our impact investing strategy.

Dream LeBreton
Ottawa, ON

ESG Journey

The Dream group of companies has integrated sustainability into the way we conduct business for over 20 years. We are proud of our track record of ESG initiatives and look forward to sharing our progress with you on the journey ahead.

2004

DRM formed partnership to invest in and revitalize The Distillery Historic District, transforming 40 heritage buildings into a landmark destination and a cultural anchor in Toronto's East end

2011

D.UN began measuring greenhouse gas emissions, energy and water consumption, set four-year targets

DRM selected to develop LEED Gold Pan/Parapan Am Athletes Village, inclusive of affordable and student housing

2013

DRM became first TSX-listed company to have female majority Board

2014

The Dream group formalized diversity policies

The Dream group established Sustainability Executive Committee to oversee and embed sustainability in key business areas, including property operations, employee engagement and communications

D.UN implemented Operations Best Practices Training, mandatory waste audits and redesigned recycling processes

DIR.UN began rooftop solar program

2015

DRM's Chief Executive Officer, Michael Cooper, changed title to Chief Responsible Officer

Dream group published first Sustainability Report

2018

DRM and MPCT.UN selected to deliver Canary Landing project, building 600+ affordable housing units in a mixed income community

2019

DRM and MPCT.UN established partnership with Anishnawbe Health Toronto to develop the Indigenous Hub celebrating culture and serving Toronto's Indigenous community

2020

DRM became signatory to Operating Principles for Impact Management and member of Global Impact Investing Network

Dream Hard Asset Alternatives Trust ("DRA.UN") changed name to Dream Impact Trust ("MPCT.UN"), focusing on impact investing

DIR.UN launched extensive in-house renewable energy program

2021

DRM and MPCT.UN published inaugural Impact Report and Disclosure Statement

D.UN and MPCT.UN participated in the GRESB⁽¹⁾ Real Estate Assessment for the first time and achieved score of 91 and 90 respectively

DRM and MPCT.UN released Impact Financing Framework to issue green, social or sustainability bonds, green loans and social loans, or other financial instruments to finance or re-finance eligible impact projects

DIR.UN released its Green Financing Framework in support of green financing initiatives and issued inaugural \$650 million in green bonds

Dream group of companies developed ESG framework to drive and unite ESG initiatives

2022

Dream group published inaugural Net Zero by 2035 Action Plan

DRM and MPCT.UN selected to develop LeBreton Flats Library Parcel in Ottawa and Quayside in Toronto

DRM, MPCT.UN, and D.UN secured \$136 million investment from Canada Infrastructure Bank funding decarbonization initiatives in 19 buildings

D.UN completed \$395 million⁽²⁾ in sustainability-linked revolving facilities with performance requirements bound to GHG intensity and green building certification achievements

2022 (continued)

DIR.UN participated in the GRESB⁽¹⁾ Real Estate Assessment for the first time and achieved full points in Leadership, Policies, Reporting, Targets, Data Monitoring and Review aspects

DRR.U used Dream's existing ESG framework to incorporate ESG into culture and operations

DRR.U achieved pre-IPO Low Risk ESG assessment of 15.2/100 from Sustainalytics⁽³⁾

2023

Dream group completed its first PRI submission

DRM and MPCT.UN won Environmental Excellence Award at the 2023 Federation of Rental-housing Providers of Ontario MAC Awards

DRM and MPCT.UN completed development of Maple House at Canary Landing, which consists of 770 units including 30% affordable units, and commenced occupancy in 2023

Dream group's head office received BOMA BEST Gold certification and Rick Hansen Foundation Accessibility Certification

D.UN and DIR.UN were the only Canadian landlords to receive 2023 Green Lease Leader Platinum recognition from the Department of Energy's Better Buildings Alliance and the Institute for Market Transformation

DIR.UN completed additional 3.7 MW of renewable energy capacity added across 4 solar projects, bringing portfolio-wide total to 14 MW

DRR.U completed its first GRESB⁽¹⁾ Real Estate Assessment

DIR.UN closed €68.6 million or \$99 million sustainability-linked loan in Europe

Stakeholder Engagement

The Dream group fosters strong, long-term relationships and maintains an open and ongoing dialogue with all our stakeholders.

We make use of multiple engagement methods to continuously improve how we work together and create shared value in the communities where we operate. We continue to build on the feedback received from our stakeholders and use it to improve our business.

In 2023, we conducted site tours with all three levels of government at our Zibi, Quayside and Canary Landing development projects, as well as hosted a teach-in for our municipal partners. We also held public community meetings to solicit feedback from local community members on our Quayside project, in partnership with the City of Toronto and Waterfront Toronto.

Dream Group of Companies

Environmental

In this section we focus on the shared net zero strategy for the Dream group of companies.

Please refer to our [Net Zero by 2035 Action Plan](#) (“Net Zero Action Plan”) for more details on our targets and milestones, emissions boundary, investment boundary and delivery strategy.

Quayside
Toronto, ON

Net Zero Action Plan

To achieve our net zero targets at the asset level, we are focused on: high-performance new construction, operational improvements through conservation and energy efficiency retrofits, low carbon fuel selection, renewable power generation, and, if necessary, purchasing renewable energy certificates (“RECs”) and carbon offsets.

~30%

of Dream Office tenants have set GHG emissions reduction targets, including net zero ambitions⁽¹⁾

~13%

of Dream Industrial tenants have set GHG emissions reduction targets, including net zero ambitions⁽¹⁾

Tenants of Dream Office and Dream Industrial are increasingly looking for spaces that align with their net zero targets. This will play an important role in leasing over the next ten years.

Zibi
Ottawa, ON & Gatineau, QC

Taking Action

At an organizational level, our delivery strategy and implementation approach focus on the following actions, where applicable and appropriate:

Baselining

Action	2023 Progress ⁽¹⁾	Forward-looking Plans
Identify current baseline emissions and estimate future emissions	<ul style="list-style-type: none"> Confirmed emission source categories for Scope 1 (direct), Scope 2 (indirect) and Scope 3 (non-controlled indirect) emissions Estimated select Scope 3 emissions baselines using in-house tracking tool Standardized life cycle assessment ("LCA") scope of work and software tools Performed LCA for Dream LeBreton 	<ul style="list-style-type: none"> Continue to improve accuracy of GHG projections, expand Scope 2 and Scope 3 emissions data collection Perform LCAs at additional development projects, including Quayside
Quantify the emission source, materiality and reduction viability to inform strategy	<ul style="list-style-type: none"> Enhanced data collection, management and quality assurance practices 	<ul style="list-style-type: none"> Start evaluating portfolio level net zero pathways for Dream Industrial
Review existing capital plans and identify emission reduction options and associated incremental costs	<ul style="list-style-type: none"> Used Net Zero Action Plan checklists within capital planning process for existing assets, major renovations and developments Quantified Net Zero Action Plan considerations for new investments and acquisitions Updated capital plans to meet evolving local sustainability regulations 	<ul style="list-style-type: none"> Continue to track and prepare for upcoming local sustainability regulations and impact on our assets Continue to integrate net zero planning for new investments and acquisitions

Roadmapping

Action	2023 Progress ⁽¹⁾	Forward-looking Plans
Analyze appropriate material selection, energy efficiency upgrades, low carbon energy sources and renewable energy generation installations	<ul style="list-style-type: none"> Implemented previously developed renewable power and offset procurement strategy Developed in-house proprietary net zero engineering tools to compare and evaluate other types of GHG reduction projects at more asset types 	<ul style="list-style-type: none"> Develop embodied carbon reduction strategies for construction projects in our pipeline Continue to analyze business opportunities for integrating renewable energy technologies into new developments Update new construction and retrofit strategies with lessons learned Stay up to date with retrofit initiatives and decarbonization technologies
Develop costed net zero roadmap case studies to inform the budgeting process	<ul style="list-style-type: none"> Increased total number of detailed asset-level net zero roadmaps by 140% Created business case analysis and design option comparison Continued to use in-house asset-level roadmap tool to optimize timing, scope, cost and sequencing of decarbonization actions 	<ul style="list-style-type: none"> Scale up the number of asset level net zero roadmaps for more properties using our in-house engineering tools
Forecast emission reductions and estimate avoided costs using an internal price of carbon	<ul style="list-style-type: none"> Continued to use portfolio-level roadmap and forecasting tool to assess impact of planned energy efficiency initiatives and track progress toward meeting interim GHG emission targets Incorporated results of completed LCA study into portfolio roadmap Continued analyzing impact of carbon taxes and internal price of carbon on decarbonization business case 	<ul style="list-style-type: none"> Begin establishing embodied carbon targets at all new development projects
Integrate our base-case capital plans with optimized net zero roadmaps	<ul style="list-style-type: none"> Updated over 260 capital plans with net zero roadmap initiatives and projects Used asset level net zero roadmaps to update capital request forms 	

(1) Progress is reported on a consolidated basis and all figures at 100% unless otherwise stated.

Execution

Action	2023 Progress ⁽¹⁾	Forward-looking Plans
Secure attractive sustainable financing and incentives	<ul style="list-style-type: none"> Secured participation for three buildings in City of Toronto's Deep Retrofit Challenge, each eligible to receive grants to accelerate emissions reductions Increased capital funded by CIB facility to over \$23 million, cumulative to date, on decarbonization deep retrofits⁽²⁾ \$275 million deployed as part of Dream Industrial's Green Financing Framework Dream Industrial secured €68.6 million or \$99 million sustainability-linked loan 	<ul style="list-style-type: none"> Continue to position ourselves well to participate in incentive and grant programs as well as sustainable finance products
Engage with stakeholders	<ul style="list-style-type: none"> Achieved 19 Investor Ready Energy Efficiency ("IREE") certifications, cumulative to date, to demonstrate our commitment to decarbonization Engaged with select tenants to collaborate on net zero strategies and share expertise; by bringing tenants into our deep retrofit project management process, we can reduce project costs, disruptions to tenants, and overall construction risks 	<ul style="list-style-type: none"> Continue pursuing IREE certifications included in the business plans
Execute capital projects to realize GHG reductions	<ul style="list-style-type: none"> Completed 5+ energy efficiency, fuel-switching and renewable power projects with combined estimated GHG savings of 30+ tCO₂e/yr Increased portfolio-wide renewable energy capacity by 3.7 MW Conducted research on procurement and tendering policies and started incorporating learnings from net zero aligned projects completed to date Started defining standard requirements for product selection, on-site construction techniques, system sizing and redundancy, and the level of involvement required by tenants and property managers Created shortlist of preferred manufacturer, contractor and consulting partners to streamline procurement and reduce construction risk and timelines 	<ul style="list-style-type: none"> Continue to implement GHG emissions reductions and energy efficiency improvements across portfolio Continue implementing renewable power projects in our pipeline, including 7 MW of renewable energy capacity underway in 2024 Incorporate further procurement and tendering best practices Develop standard requirements for product selection, on-site construction techniques, system sizing and redundancy, and the level of involvement required by tenants and property managers Continue collaborating with preferred manufacturer, contractor and consulting partners and look for process improvements
Support conservation and energy efficiency in operating our assets	<ul style="list-style-type: none"> Continued energy management program in office and multi-family assets, recognized by the IESO Energy Managers of the Year award 	<ul style="list-style-type: none"> Evaluate technologies for energy management in industrial assets

Oversight

Action	2023 Progress ⁽¹⁾	Forward-looking Plans
Measure and Report on progress in a consistent and standardized manner	<ul style="list-style-type: none"> Started using energy modeling guidelines Updated data sources for utility and GHG emission tracking resources Published latest GHG emissions performance data in annual Sustainability Report in alignment with GHG Protocol 	<ul style="list-style-type: none"> Continue publishing latest GHG emissions data in annual Sustainability Report in alignment with GHG Protocol Continue monitoring our Net Zero Action Plan's alignment with leading net zero frameworks, including Science Based Targets initiative and Carbon Risk Real Estate Monitor project
Be accountable for our performance	<ul style="list-style-type: none"> Completed 2023 NZAM reporting Provided semi-annual strategy and performance updates to Net Zero Steering Committee, composed of executives and members of senior management from across the Dream group of companies 	<ul style="list-style-type: none"> Continue NZAM reporting to be transparent in our progress Continue providing semi-annual strategy and performance updates to the Net Zero Steering Committee
Create a feedback loop to iterate on our strategies and share learnings across organization	<ul style="list-style-type: none"> Net Zero Working Group hosted 15+ targeted educational, training and strategy collaboration sessions with departments from across Dream entities and third-party leasing agents on topics such as embodied and operational carbon Hired Senior Manager of Decarbonization to increase internal expertise and capacity 	<ul style="list-style-type: none"> Continue systematizing our approach to decarbonizing our portfolio efficiently Continue to develop and enhance the internal skills and competencies related to net zero and decarbonization strategies Refine strategies on a continuous basis

(1) Progress is reported on a consolidated basis and all figures at 100% unless otherwise stated.

(2) Based on cumulative draws to date as at Dec 31, 2023. Reflective of the Residence at Weston LP, Dream Impact Master LP and Dream Office LP credit facilities at 100%.

Making Net Zero Communities a Reality

We are taking action, while being good stewards of capital, to meet our net zero targets. We continue to see that achieving net zero in most of our communities and assets is complementary to our building improvement plans, and aligns with our objectives of meeting tenant demand, creating unique partnership opportunities, attracting creative financing solutions, reducing our operating costs and protecting asset value. There are challenges in adopting new technology, financing additional capital requirements and changing how we build and operate our buildings, but we work closely with our partners, including government, banks, contractors, suppliers and tenants, to find solutions.

In 2023, we continued to make significant progress on making our net zero developments a reality.

Dream is projected to develop \$6 billion worth of net zero communities, including Zibi, Dream LeBreton and Quayside.

Net Zero Development Project

Net Zero Goals

Zero Carbon Energy for whole community as part of One Planet Living certification

Targeting CaGBC's Zero Carbon Building Design Certification

Targeting Net Zero GHG Emissions

Achieved CaGBC's Zero Carbon Building Design Certification in Q1 2024

2023 Update

- Aalto II (Block 11; 148 residential units) - completed
- Common (Block 206; 207 residential units) - nearing completion
- Block 207 (76,000 sf commercial building) - nearing completion
- Block 204 - site plan approvals secured

Secured site plan approval from the City of Ottawa for 608-unit apartment building complex

Site plan approval applications have been submitted for three buildings in Phase 1 (over 2,000 apartment and condominium units)

Made significant construction progress (Q1 2024 anticipated completion date) on this 209,000 sf industrial building

Strategies for Net Zero Operational and Embodied Carbon Emissions

Dream LeBreton is an urban high-rise development targeting the Canada Green Building Council (“CaGBC”) Zero Carbon Building Design Certification. Comprising of two towers (36 and 31 stories, respectively), the project will include 608 residential units, with 41% designated as affordable housing, alongside at-grade retail space and two levels of below-grade parking, utility, and storage space. The project emphasizes social equity by awarding contracts to equity-seeking groups and ensuring significant employment opportunities for Indigenous workers, enhancing the community fabric of Dream LeBreton.

To meet our net zero goals, the design team is focusing on several key features:

- High-performance building envelope assemblies
- Optimized window area
- Efficient ground-source heat pumps connected to a geothermal system

- Efficient ventilation systems in residential units
- On-demand ventilation for corridors
- Reusing heat from wastewater and electrical rooms
- Low-flow water-saving fixtures
- CO₂ sensors for demand control ventilation in common areas
- High-efficacy lighting fixtures, such as LED, throughout the building
- Rooftop solar photovoltaic system
- Lower embodied carbon material selection

At Dream LeBreton, we are demonstrating our commitment to sustainability, aiming to achieve net zero operational carbon while simultaneously striving to reduce total embodied carbon by 10% compared to a typical new building.

Through collaboration with our consultants and stakeholders, we are implementing innovative solutions, such as low-carbon ready-mix concrete and recycled-content rebar, to meet, and in some cases surpass, our targets and pave the way for more sustainable construction practices.

(1) Set by the CaGBC's Zero Carbon Building Design Standards v3, https://www.cagbc.org/wp-content/uploads/2022/06/CAGBC_Zero_Carbon_Building-Design_Standard_v3.pdf.

(2) (NECB 2017).

(3) Typical new building was calculated by third-party LCA consultant using the criteria in CaGBC's Zero Carbon Building Design Standards v3 and industry-average environmental product declarations for construction products/materials. Typical new building is defined as the minimum Tier 1 energy efficiency requirements under the City of Ottawa's High Performance Standard 1, <https://ottawa.ca/en/planning-development-and-construction/residential-property-regulations/development-application-review-process/development-application-submission/high-performance-development-standards-hpds#>.

(4) Typical new building was calculated by third-party LCA consultant using the criteria in CaGBC's Zero Carbon Building Design Standards v3 and industry-average environmental product declarations for construction products/materials.

What is Embodied Carbon?

Embodied carbon refers to the greenhouse gas emissions arising from the manufacturing, transportation, installation, maintenance, and disposal of building materials. Embodied carbon can be overlooked when considering a building’s carbon footprint because it is hidden—or “embodied”—in materials and manufacturing processes rather than emitted while a building is being used. The embodied carbon of a product is sometimes also referred to as Global Warming Potential and is typically quantified for a product in an Environmental Product Declaration (“EPD”). Embodied carbon for a building is partially calculated by summing the embodied carbon values in the EPDs of the materials within the building, among other factors, during an LCA, which is the standard methodology for assessing the environmental impacts associated with all the stages of the life cycle of a building.

13%

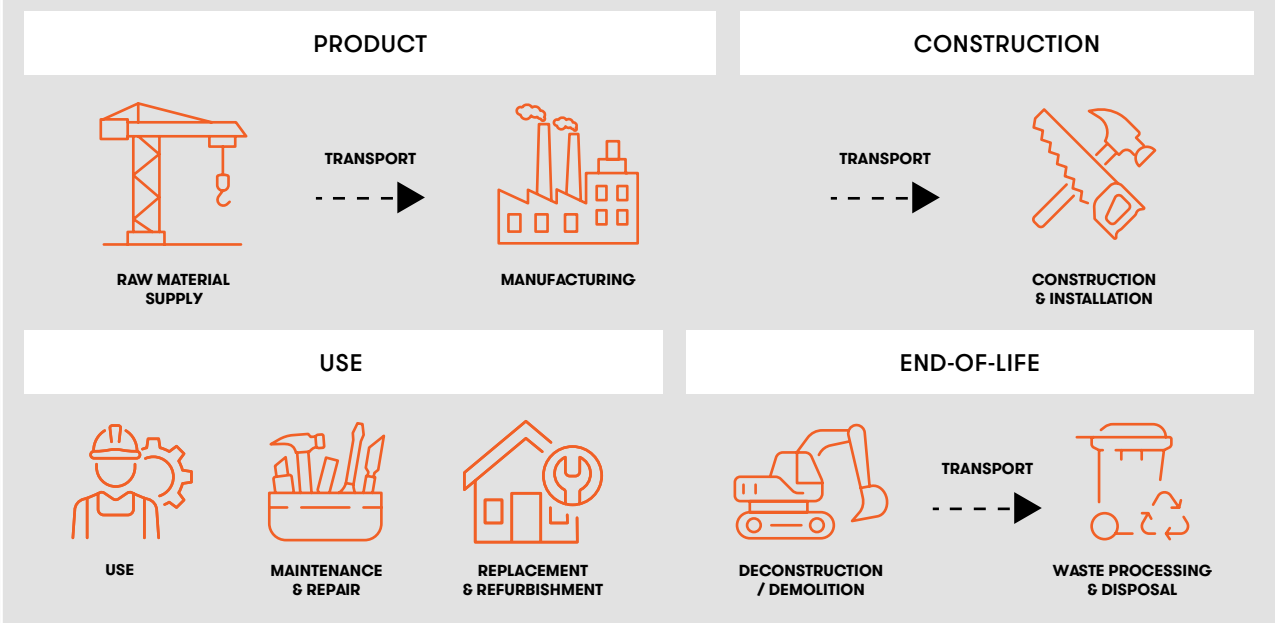

overall embodied carbon reduction can be achieved at Dream LeBreton from improvements on concrete and insulation material selection.

Buildings are currently responsible for 39% of global energy-related carbon emissions: 28% from operational emissions, from energy needed to heat, cool and power them, and the remaining 11% from materials, construction, use and end-of-life⁽²⁾. We are actively engaged in assessing the embodied carbon footprints of our projects and integrating comprehensive LCAs into our design and procurement processes. By doing so, we can make informed decisions regarding material selection and procurement strategies, ensuring that our developments align with our sustainability objectives. In order to work towards meeting our target of building net zero embodied carbon buildings by 2035, we have standardized our LCA scope of work and software tools so that we can scale this practice to more of our developments and we are identifying cost-effective strategies for design, procurement, construction and commissioning that reduce the green premiums.

Carbon Emissions in Buildings⁽²⁾

Whole life carbon: 39% of global energy-related carbon emissions

Embodied carbon: 11% of global energy-related carbon emissions

Operational carbon: 28% of global energy-related carbon emissions

Dream Group of Companies

Social

At Dream, our people set us apart. We take great pride in our workforce and know that investing in employees creates long-term value for our entities.

Employees across our entities come from a variety of backgrounds and experiences, bringing valuable skills and perspectives to our team. Together, we are united by our company values and common purpose of **Building Better Communities.**

Intern Lunch and Learn with Jane Gavan
Toronto, ON

Employee Engagement & Development

Employee development and engagement is managed by the People and Culture team. Our approach is guided by open communication with our employees. Their feedback helps us to constantly improve our culture and overall employee experience.

Our People and Culture and Health and Safety teams work with our Diversity, Inclusion & Advancement Committee to enhance engagement and employee development and embed wellness, diversity, and inclusion across all areas of the employee experience. We believe in unlocking everyone's potential to do their best work and contribute, regardless of their background.

Employee Summary⁽¹⁾

Employees ⁽¹⁾⁽⁶⁾	Total	Men	Women

average tenure for Dream group employees⁽¹⁾

New Hires and Voluntary Turnover Rates

In 2023, the Dream group hired a total of 111 new full-time employees and had an overall voluntary turnover rate of 16%, which is consistent with market trends across the real estate industry as per the REALPAC Canadian Real Estate Compensation Survey Report.

	Total	Men	Women	Age 34 & under	Age 35-54	Age 55 & over	Canada	United States	Europe
New Hires ⁽¹⁾	111	55	56	66	40	5	105	2	4
Voluntary Turnover Rates ⁽¹⁾⁽⁹⁾	16%	13%	18%	21%	15%	5%	15%	3%	22%

Employee Engagement

In April 2023, we conducted our third annual employee engagement survey to better understand employee satisfaction across a variety of topics. The survey was deployed by Great Place to Work® Canada, as part of the certification process. The Great Place to Work® certification is based upon the following factors:

- The level of trust that employees have in leadership
- The level of pride employees have in their jobs
- The extent to which employees get along with colleagues

The survey results provided our People and Culture team with meaningful insights regarding employee satisfaction and opportunities to improve employee engagement.

85%

of employees think Dream is a great place to work

94%

of employees think they are treated fairly regardless of their race or ethnicity

Employee Development

At Dream, we value our talent as our strength, which is why we have programs in place to provide career progression and networking opportunities to current and future talent. Our Young Talent Recruitment Program supports a broad range of students and provides them with the opportunity to experience a corporate environment while gaining professional and practical skills relevant to their field of study. To help ensure our employees continue to grow professionally, we host leadership sessions to promote career progression and fireside chats to facilitate internal connections and skill development.

Ten Thousand Coffees

Ten Thousand Coffees is a platform that Dream employees can use to help expand their internal networks. The tool offers Dream employees the option to set up one-on-one connections based on professional topics of interest, as well as participate in small-group discussions with leadership.

Dream 101 Learning Session at 30 Adelaide St. E
Toronto, ON

Case Study

Employee Suggestion Program

In 2023, we introduced an employee suggestion program. The aim of this program was to leverage ideas from the employees who experience and live the Dream culture every day. We asked for suggestions, ideas and recommendations to improve the performance and quality of their work and experience with the aim of being more proactive about actioning innovative ideas and process improvements that make a positive impact across the company.

Since launching in 2023, **we have received over 120 suggestions.** Based on these suggestions, we are proud to have introduced the following initiatives:

- 1. Introduced** communal prayer and meditation space at our head office in addition to individual prayer spaces.
- 2. Revamped** our employee fitness facility at our head office with state-of-the-art equipment.
- 3. Upgraded** coffee machines on all floors, enhancing options for those with specific dietary requirements.
- 4. Enhanced** Dream 101 program to give employees more insight into projects happening in other departments.
- 5. Provided** opportunities for employees to participate in blood drives throughout the year.

Employee Benefits

Dream’s benefits for full-time employees and their dependents are effective starting day one of employment and boast a wide variety of competitive perks, including a parental leave top-up program, annual bonuses, and retirement savings programs. Our People and Culture team is proactive in evolving our benefits program to prioritize employee health and well-being with flexible options to suit a variety of preferences.

Learning and Development Perks

- **Up to \$2,500** tuition reimbursement per employee, per year
- **Up to \$500** reimbursement for textbooks per employee, per year
- **Reimbursement** of professional membership or designation fees
- **Reimbursement** for job-related training, seminars, or conferences
- **Internal networking** through one-on-one connections and leadership fireside chats

In 2023, we were committed to enhancing our workplace through learning sessions aimed at fostering a culture of inclusivity, sustainability, and wellness. Our diversity and inclusion initiatives included enriching sessions on disability awareness and gender equality, alongside a special program celebrating International Women’s Day and an educational deaf culture and history lesson.

Additionally, our benefits and wellness programming took a holistic approach to employee well-being with a mental health series that provided tools and insights for managing stress, fostering resilience, and supporting overall mental health.

Awards and Recognition

Recognized as one of Canada’s **Best Workplaces™** in Real Estate & Property Development for the second consecutive year.

Selected as a four-time honoree of the Globe and Mail’s Report on Business Women Lead Here program that benchmarks executive gender parity.

Recognized as one of **Greater Toronto’s Top Employers™** for exceptional human resources programs and forward-thinking workplace policies.

Named one of the **Best Workplaces™ for Giving Back** for the second consecutive year.

Honoured as one of **Canada’s Best Employers for Recent Graduates** for the third consecutive year.

Three-time consecutive recipient of the **Great Place to Work®** certification.

(1) Tuition and professional fees reimbursed to employees are part of overall compensation.

Key Accomplishments

- Launched Dream employee suggestion program and implemented several initiatives
- Onboarded and integrated approximately 50 employees from Dream Summit
- Launched new self-service functionality for employees in our human resources information system called myDream
- Revamped Dream 360 Analyst Program by providing a more structured approach to compensation and advancement
- Enhanced mental health support for employees & their dependents
- Provided opportunities to 67 interns
- Refreshed our head office gym to promote physical well-being
- Launched a Canada-wide blood drive as a health initiative

Forward-looking Plans

- Enhance manager development programs
- Expand employee training offerings
- Provide updates on employee recognition programming and consider enhancements
- Continue to focus on employee wellness and well-being
- Revamp our Young Talent Program
- Revamp our mentorship, fireside chats and office hour programming
- Continue to focus efforts on our total compensation review

Dream Summit Employees
Toronto, ON

Highlight

Dream Summit Employees

In February 2023, Dream formally welcomed approximately 50 employees of Summit Industrial Income REIT into the Dream group. The acquisition represents a highly strategic transaction for Dream Industrial REIT, significantly increasing its exposure to the Canadian industrial market through a complementary portfolio and growing its property management vertical in geographies where Dream Industrial already operates.

Diversity, Inclusion & Advancement

Diversity, Inclusion and Advancement (“DIA”) is managed by the DIA Committee. The committee includes employees from multiple levels, including Executives, Directors, and Managers. The DIA Committee’s mandate is to listen, learn and develop best practices to enhance diversity and inclusion at Dream, as well as build accountability for advancing DIA across the business.

Evolving our DIA Program

The DIA Committee was established in 2020 with a mandate to elevate and build expertise across the business and instill a culture of inclusivity and belonging. In 2023, we expanded the committee by introducing engagement groups meant to expand the capabilities and reach of our DIA team.

We also developed a DIA Charter, which sets out the mission and vision for the expanded engagement groups at Dream and how they contribute to promoting inclusion among all employees, as well as a definition and plan for the inclusion of employee resource groups in 2024.

Highlight

Supporting Inclusivity at Dream’s Head Office

Accessibility is a key component for any inclusive and diverse community. At Dream, we are proud to have achieved the Rick Hansen Foundation’s Accessibility Certification™ (“RHFAC”) for our head office by adopting the program’s recommendation on vehicular access, exterior approach, interior circulation and entrance, signage, emergency systems, and use of additional space. RHFAC is the first program in Canada designed to rate the level of meaningful access to buildings based on the user experiences of people whose disabilities impact their mobility, vision, and/or hearing.

Highlight

Pride Celebration

In June 2023, Dream hosted a barbecue party at our Toronto Head Office, inviting Dream head office employees and tenants to celebrate Pride together. The event was driven by members of our DIA team and received strong top-level endorsement and encouragement from Executives. The event was put on in collaboration with tenants at 30 Adelaide Street East (our head office) and was accompanied by celebrations at our offices across Canada. Increasing visibility and support for 2SLGBTQIA+ individuals at Dream, and specifically enhancing inclusion of queer and trans individuals, were drivers of putting on this event.

The event featured:

- Engaging and inclusive performances from queer and trans drag performers
- Fundraising for Rainbow Railroad through accessibly priced raffle tickets
- A barbecue and happy hour featuring Indigenous and women-owned food vendors
- Speeches from leaders at Dream and tenant organizations on the importance of diversity and inclusion

Thanks to the dedication of our DIA committee and collaboration with our partners and tenants, the event was a huge success and received overwhelmingly positive feedback from attendees. It is our hope that through initiatives like this, all employees will feel comfortable coming to work as their whole selves and that we can build stronger social bonds between and among employees at Dream and in our neighbouring tenant businesses.

“

... an employee from a neighbouring tenant made a point to stop me in the lobby to thank Dream for being a leader in safe, inclusive workplaces - he loved the engagement and commitment.

”

Gordon Wadley

Chief Operating Officer, Dream Office REIT

Key Accomplishments

- All Dream occupied floors at our Toronto head office have **gender-neutral washroom options**
- **Achieved accessibility certification** through the Rick Hansen Foundation for our Toronto head office
- **15 DIA focused events** held to promote employee learning and advancement
- **Hosted an interactive panel discussion** for International Women's Day
- **Inaugural Pride celebration introduced** in collaboration with tenants at our Toronto head office
- **755 total attendees** in our 10 Thousand Coffees initiative⁽¹⁾
- **93% overall feedback rating** on our 10 Thousand Coffees initiative
- All manager and above level employees received **mandatory diversity training**

Forward-looking Plans

- **Designate a champion in each Dream office across Canada** with more than five employees to ensure we are leveraging a diverse range of perspectives and provide more opportunity for regional offices to lead DIA initiatives
- **Further expand employee resource groups** to increase employee participation and diversity

Health & Safety

Health and safety at Dream is collectively overseen by the VP & Head of People and Culture and the VP of Property Management. Day-to-day management of health and safety is the responsibility of our Health and Safety Manager who is responsible for monitoring and tracking health and safety incidents, training requirements and implementing corporate and property level preventative measures.

All managers and supervisors are responsible and accountable for the health and the safety of the individuals and workplaces under their oversight. They are expected to advise employees of the existence of potential or actual workplace hazards and help ensure that employees work safely in accordance with applicable legislation and its regulations, as well as all applicable policies and procedures. Health and Safety Committees and Representatives and on-site building operators are required to do regular inspections. Our Health and Safety department receives a copy of each inspection and may direct concerns to supervisors, schedule follow-up inspections, or investigate any instances of non-compliance. We provide health and safety training for all employees, specific to their roles and job requirements.

2023 Health and Safety Performance

Indicator	Lost-time injuries	Near misses
Men	1	1
Women	1	0
Central Canada	1	1
Western Canada	1	0
Injury Type	Slip and fall	0
Lost Days	2	0

Key Accomplishments

- **Engaged a third-party** to finalize updates to Emergency Response Plans for all Ontario properties
- **Collaborated with Dream Industrial** to complete third-party annual health and safety inspections and analyses across all properties
- **Completed annual review** of the health and safety program, safe work practices and safe job procedures
- **Continuously reviewed and tracked** inspections submitted by property operations and development teams and provided assistance where needed

Forward-looking Plans

- **Collaborate with a third-party service** provider to develop a lone operator app, providing real-time monitoring, emergency responses, and automatic alerts for extended inactivity to enhance safety at sites
- **Transition all construction teams** to eCompliance, our Health and Safety Management System
- **Coordinate with Industrial teams** to consider implementing third-party audits and site inspections for select properties on a rotational basis
- **Launch GTA Multi-site Joint Health and Safety Committee**
- **Update Quebec properties** with a French Health and Safety Program and French inspection forms on eCompliance
- **Maintain monthly inspections,** safety meetings, Health and Safety Committee meeting minutes and inspections, safety data sheets, documentation and training records through eCompliance

Volunteering & Giving

Nationally and locally, we prioritize charitable organizations that support youth in sport, women's health, youth services, people experiencing homelessness, and marginalized communities. Each Dream entity also supports additional initiatives of their choosing.

In 2023, our local and national charitable partners included, among others:

- [Play Forever](#)
- [Frontlines](#)
- [The Toronto Public Library](#)
- [Gem Girls E-Mentorship](#)
- [Ottawa Tool Library](#)

In 2023, Dream employees spent over 200 hours volunteering for various not-for-profits such as:

- [Daily Bread Food Bank](#)
- [Ronald McDonald House](#)
- [Scott Mission](#)
- [Good Shepherd Centre](#)
- [Kit packing for New Circles](#)
- [Jessie's Place](#)
- [Engage & Change](#)
- [Shoebox Project](#)

To encourage our employees to give back to their communities, we offer:

- One paid volunteering day per year
- \$500 annually through our employee donation program whereby we contribute to charitable organizations that employees are actively involved with
- \$1,000 awarded to five employees through our ETHOS awards program to contribute to a cause they believe in
- Partnering with local charities and organizations endorsed by our employees

\$1.1 million

donated to charities in 2023, up by 24% from 2022⁽¹⁾

Dream Volunteers at Good Shepherd Ministries
Toronto, ON

Highlight

Electronics Recycling

In 2023, Dream partnered with [Free Geek Toronto](#), a not-for-profit organization specializing in technology reuse, digital accessibility, and equitable employment to develop an Employee Used Electronic Donations Program, which collects used electronics/computers from Dream employees.

This program enhances technology accessibility for lower-income groups while supporting Free Geek to provide employment and training opportunities for people facing barriers to participating in the labour market such as individuals with disabilities, criminal records, and newcomers to Canada, among others.

Highlight

One Tree Planted

In 2023, Dream partnered with [One Tree Planted](#), a nonprofit that is dedicated to global reforestation. Their projects span the globe and are done in partnership with local communities and environmental organizations to create an impact for nature, people, and wildlife. Many projects have overlapping objectives that contribute to the UN's Sustainable Development Goals. Through the engagement Dream financially supported the planting of 7,000+ trees in Ontario, Canada, as a part of the 50 Million Tree Program, assisting restoration of ~7 acres of land.

(1) Includes Dream Community Foundation's spend on programming, donations and sponsorship

Dream Community Foundation

Dream Community Foundation is a non-profit organization founded in 2022 that builds stronger communities through programs that bring people together. Its initiatives prioritize fostering connections and empowering individuals to reach their full potential.

18

after school club days, over 200 attendees were able to participate in sports, arts and crafts, and socializing activities

24

Artscape workshops, over 100 attendees received career support, skills training and networking opportunities

1

back-to-school hair cut event for 65 kids to boost their confidence and get them excited for the school year

2

senior citizen field trips to promote social interaction, new experiences and building community

12

scholarships to youth experiencing financial barriers

14

tutoring days for kids

\$850,000

in donations to other non-profit organizations

>400 hours

hours of programming with over 845 attendees

Dream & Play Forever Summer Camp
Toronto, ON

Dream & Play Forever Hair Cut Day
Toronto, ON

Dream Community Foundation Culinary Program
Toronto, ON

Key Accomplishments

- 10 scholarships at \$5,000 each awarded to high school students experiencing financial barriers
- 10 curated volunteer opportunities offered for Dream employees to participate in
- Provided employees with the option to donate to charities through payroll deduction
- \$1.1 million total donated to charities in 2023
- 200 hours volunteered by Dream employees for various not-for-profits in 2023

Forward-looking Plans

- Expand programming to Western Canada and Ottawa through new partnerships with not-for-profits and new events
- Continue to promote and enhance payroll giving
- Work with Dream's internal marketing team to promote employee volunteering and giving back within our communities

Dream Group of Companies

Governance

The Dream group is committed to sound and effective corporate governance. Our goal is to not only meet requirements established by regulators, but also to uphold excellent corporate governance principles and practices. We believe that strong governance reduces investment risk, leads to more consistent outcomes, and attracts global investors.

30 Adelaide St. E
Toronto, ON

Corporate Governance

Our governance approach includes nominating diverse, independent and experienced board members to each of the Dream entities, as well as providing transparency in all aspects of our business.

The following sections in this chapter illustrate how we are integrating ESG and climate considerations throughout our governance structure and risk management processes. For information on entity-level board oversight, management’s approach and ESG risk management practices, please refer to each entity chapter.

Board Composition

The boards of each Dream entity are composed of highly experienced, dedicated and knowledgeable professionals who each have expertise in key areas of our businesses.

We periodically assess the skills, knowledge and backgrounds of Directors and Trustees in light of the needs of the boards, including the extent to which the current composition of the boards reflects a diverse mix of skills, experience, knowledge and backgrounds, and an appropriate number of women Directors and Trustees. Our boards target a composition in which women comprise a minimum of 30% of Directors or Trustees.

Board Oversight

To support integration of sustainability across our business and help ensure that non-financial considerations such as ESG matters and, for certain Dream group entities, impact objectives, are considered alongside financial considerations, our governance policies specify oversight and accountability for ESG matters at the board level. Such policy language is also reflected in relevant board mandates, committee charters and corporate policies.⁽¹⁾

On a quarterly basis, the applicable governance committee of each Dream entity is provided with an ESG update from the Head of Sustainability and Technical Services. The Chair of each governance committee then provides an update at each of the entity board meetings.

In addition, we intend to conduct ESG education sessions for the applicable governance committee every three years. In 2022, ESG training was provided by Quinn+Partners, sustainability advisors, and focused on key ESG trends affecting Dream’s business and best practices for strong and effective ESG governance.

⁽¹⁾ The names of boards and committees vary across Dream entities. Please refer to the charter or mandate of the applicable board or committee of each Dream entity for a complete reference to the name of such board or committee. Such mandates, charters and policies are available on the website of each entity. See the [Forward-Looking Information](#) section of this Report for links to such websites.

Sustainability and Climate Disclosure Regulations

As Canada, the United States, and Europe move toward adopting mandatory ESG reporting regulations, we continue to monitor the regulatory environment, trends, and investor requirements, adjusting our strategies accordingly.

In 2023, the International Financial Reporting Standards (“IFRS”) Foundation took over the Task Force on Climate-related Financial Disclosures (“TCFD”), and published the IFRS S1 and S2 standards, which incorporate the TCFD recommendations. In 2024, the Canadian Securities Administrators (“CSA”) is considering the Canadian Sustainability Standards Board’s (“CSSB”) recommendations with regards to the IFRS S1 and S2 standards.

In addition, parts of our businesses may be subject in the future to the Sustainable Finance Disclosure Regulation (“SFDR”) and the Corporate Sustainability Reporting Directive (“CSRD”) frameworks that have been coming into effect.

We view the adoption of mandatory reporting as an opportunity to improve our understanding of the risks and opportunities for our business, improve our processes, and effectively communicate our sustainability initiatives to our stakeholders. Having aligned our reporting with TCFD, SASB, and GRI and developed robust internal control processes over the past four years, we believe we are well-positioned to cost-effectively meet future expected disclosure regulation requirements without impeding our global business operations.

2023 PRI Results and NZAM Update

The PRI is the world’s leading responsible investor coalition, with over 3,000 investment managers overseeing a total of U.S. \$112 trillion in assets as members. Signatories are publicly accountable for their responsible investment commitments and can benefit from enhanced ESG ratings, attracting investors with responsible investment allocations.

Dream Unlimited, on behalf of the Dream group of companies, became a signatory of the PRI in October 2021. We reported through the PRI Reporting Framework for the first time in 2023 and are proud that we outperformed the peer median in two out of the three modules:

- **4 out of 5 stars (78%)** in the Policy Governance and Strategy module (PRI Median score was 59%)

- **4 out of 5 stars (67%)** in the Real Estate module (PRI Median score was 62%)
- **3 out of 5 stars (63%)** in the Confidence Building Measures module (PRI Median score was 80%)

The annual PRI submission also fulfills the reporting requirements of NZAM, a global alliance of asset managers committed to achieving net zero emissions by 2050 or sooner. The NZAM initiative covers 315 signatories and U.S. \$57 trillion in assets under management. Dream Unlimited, representing the Dream group of companies, was among the first Canadian companies to join NZAM in 2021. In 2023, 69% of the Dream group of companies’ total assets under management were committed to be managed in line with net zero by 2050, an increase from 61% in 2022.

Risk Management

Risk management is embedded into our critical business units and workflows, managed by our Risk Management group and overseen by the applicable governance committee of each Dream entity. The Senior Director of Risk and Insurance provides annual reports to these committees.

Risk management across the Dream group of companies is conducted through procedures aimed at identifying, analyzing, responding to, managing and reporting on our exposure to risks. Through this process, risks are assessed based on their anticipated frequency, severity and likelihood, then either transferred, mitigated, or managed accordingly as appropriate.

Site Tour of Canary Landing with Associate Minister of Small Business Nina Tangri
Toronto, ON

ESG Risk Management

Our ESG risk management constitutes a process that helps us to continuously identify and mitigate risks that could impact our companies. It requires collaboration with numerous teams across entities, including Risk and Insurance, Sustainability and ESG, Development, Construction and Technical Services. Our processes for identifying and managing ESG risks involve understanding the potential risks that arise during acquisition, developments and operations, as applicable in accordance with the risk management practices of each Dream entity.

Operations

We are focused on managing and operating our buildings efficiently to help mitigate risk associated with physical damage, escalating utility costs, shifting regulations and tenant preferences. We manage utility risks by conducting energy and water audits and implementing applicable efficiency measures to reduce our consumption where relevant and commercially reasonable.

Leaks, for example, can pose a significant risk of costly water damage. In 2023, Dream Office continued to deploy leak detection sensors across its portfolio, with 250+ sensors installed to date. These

sensors detected one significant leak in 2023 which allowed our property management teams to quickly respond to mitigate damage, costs and disruptions to tenants. Dream Impact Trust also launched a leak detection program at one multi-family asset in 2023, which identified an opportunity to save \$40,000 in annual water utility costs by repairing leaky plumbing fixtures.

Acquisition, Investments and Developments

ESG risk management activities in the acquisition and development stages include evaluating risks and opportunities using checklists to review a comprehensive set of risks, tailored for each investment opportunity. Due diligence checklists generally involve assessments of building systems to determine the business case and feasibility of capital improvements to enhance resource efficiency. Other ESG risk management tools include environmental site assessments (“ESA”) and building condition assessments (“BCA”). We have incorporated additional ESG considerations into our ESAs and BCAs to learn more about our standing investments and potential acquisitions during the due diligence process. Information pertaining to climate change adaptation strategies, waste management, renewable energy and biodiversity helps us make impactful decisions as a responsible real estate owner, manager, and developer.

Climate Change Risk

Climate change poses a significant risk for our properties, employees, tenants and communities. Dream is proactively managing climate-related risks to help support the transition to a low-carbon economy and protecting our portfolio and developments against the shocks and stressors of climate change. Climate change risk informs our business strategy and decision-making by establishing the order of priority for making the capital and operational investments needed to help future-proof assets.

Oversight of Climate Change Risk

The boards and management teams of each Dream entity are made aware of the risks posed by climate change and remain informed about climate-related risks and opportunities through internal reporting processes.

Boards receive annual updates from the Risk and Insurance team on physical climate risk management activities and performance. Transition climate risk management updates are also presented to the boards on a quarterly basis by the Sustainability and ESG team.

Physical Risk

We conduct analyses on an ongoing basis to identify physical climate risks in our portfolios and assess our level of resiliency. Climate resiliency refers to our actions to prepare, adapt and endure shocks and stressors related to climate change. Our goal with respect to climate resilience is to reduce the likelihood and impact of a catastrophic or disruptive event on our properties and our tenants.

We leverage third-party climate data to assess property-level physical climate risks across all Dream entities from the following physical climate risks:

- **Acute:** flooding, wildfire, earthquake, hailstorm, lightning, windstorm, tornado
- **Chronic:** temperature change, precipitation change, sea-level rise, air-quality, water security/ water stress

We also conduct an annual flood and catastrophic loss risk assessment to determine which properties in our portfolio are at risk of losses from 50, 100, 200 and 500-year floods. Using these tools and assessments, we identify specific regions and properties with increased climate risk and identify opportunities to improve resilience through ongoing capital and operational investments.

30 Adelaide St. E
Toronto, ON

Spotlight

A Climate Resilient Business: Physical Risk and Resiliency Working Group

In 2023, we established a working group to develop a physical risk and resiliency strategy. The group’s ultimate objective is to standardize our approach to physical climate risk adaptation strategies to be incorporated into property-specific capital and operation plans.

The group includes representation from several teams including Technical Services, Risk & Insurance, Dream Office Property Management, Dream Industrial Portfolio Management, and the Sustainability and ESG team. As a starting point, the focus of the working group over the past year was on developing tactical methodologies for reducing our Toronto office assets’ exposure to modeled climate perils.

The working group used a climate risk scenario analysis tool to aggregate and prioritize asset type-specific climate risks based on likelihood and severity. A survey was also

conducted among property management and operations teams to understand known risks and mitigation strategies for each asset type.

This analysis provided actionable insights to address the increasing climate risk compared to the existing building codes. For example, for buildings with moderate to high wind exposure, a standard approach is being implemented, such as retrofitting with resilient roofing materials to withstand extreme winds.

In 2024 and beyond, the working group intends to use this data to establish standardized adaptation strategies for the most pertinent climate risks, which will be incorporated into property-specific capital plans. Strategies identified for office assets will be tailored for other asset types in the same region as well as adapted to other asset types and regions.

Transition Risk

Our GHG reduction targets and Net Zero Action Plan help mitigate transition risk by proactively reducing emissions ahead of potential future regulations and anticipated future changes in tenant preferences and market supply and demand.

Our Risk Management and Sustainability and ESG teams continuously monitor our exposure to transition risks associated with policy and legislative changes, market, and reputational shifts. Additionally, we continue to enhance our climate reporting to align with best practice climate standards.

The adjacent table provides a high-level summary of our key physical and transition risks, time horizons and associated potential impacts.

Type of Risk ⁽¹⁾	Identified Risks	Potential Impact	Mitigating Action
Physical, acute Short-to long-term time horizon	<ul style="list-style-type: none"> Natural disasters and increasingly frequent and severe weather conditions including wildfire, windstorms, tornadoes, hailstorms, lightning and earthquake 	<ul style="list-style-type: none"> Could interrupt operations and activities, threaten tenant health and safety, damage properties and may decrease property values or require additional expenses to be incurred, including increased insurance costs 	Across all entities we use third-party climate data to assess property-level physical climate risks from the following hazards: <ul style="list-style-type: none"> Flooding Wildfire Earthquake Hailstorm Lightning Windstorm Tornado
	<ul style="list-style-type: none"> 50, 100, 200 and 500-year flood events 		
Physical, chronic Long-term time horizon	<ul style="list-style-type: none"> Temperature change Precipitation change Sea-level rise Air quality Water security/water stress 	<ul style="list-style-type: none"> Temperature change could increase cooling loads and costs Sea-level rise could alter geographies targeted for future investment Water security/water stress risk may impact approach to water management and capital expenditures on efficiency upgrades 	Property-level risk is assessed using third-party climate data against the listed chronic physical climate risks: <ul style="list-style-type: none"> Temperature change Precipitation change Sea-level rise Air quality Water security/water stress
Transition, policy and legal Short-to long-term time horizon	<ul style="list-style-type: none"> Greenhouse gas emissions reduction regulations 	<ul style="list-style-type: none"> Could impose constraints on operational flexibility or result in financial costs or fines to comply with various reforms 	<ul style="list-style-type: none"> Our GHG reduction targets and Net Zero Action Plan help mitigate transition risk by proactively reducing emissions ahead of potential future regulations and anticipated future changes in tenant preferences and market supply and demand. Our Risk Management and Sustainability and ESG teams continuously monitor our exposure to transition risk associated with policy and legislative changes, market, and reputational shifts. Additionally, we continue to strengthen alignment with TCFD recommendations.
Transition, market and reputation Long-term time horizon	<ul style="list-style-type: none"> Shift in supply and demand for products and services Changing tenant preferences Increased stakeholder expectations on climate-related risk 	<ul style="list-style-type: none"> Failure to adapt to climate change reforms could adversely affect our reputation Costs to build net zero assets, or upgrade assets to net zero could increase May require increased internal resources to manage climate risk and produce climate disclosure 	

⁽¹⁾ Short-term is used to describe risks with the highest likelihood and greatest severity between present and 2030. Long-term is used to describe risks with the highest likelihood and greatest severity after 2030.

Scenario Analysis

The Dream group has identified climate change as a significant risk, as well as a catalyst for opportunities to create long-term value through proactive strategic decisions. In 2022, we conducted a climate scenario analysis to explore how the potential risks and opportunities associated with different climate scenarios could impact our businesses. The objective of the exercise was to build our teams’ understanding of the specific ways climate change may impact the way we conduct business and identify how we can prepare to mitigate risks and capitalize on opportunities.

The scope of the scenario analysis covered all Dream public entities and included input from decision makers and key stakeholders across the Dream group with expertise in business functions including sustainability and ESG, corporate finance, compliance, portfolio management, risk management, asset management, and development.

While the uncertainty about the future is an inherent challenge and limitation of this exercise, we have incorporated assumptions about macroeconomic trends, such as the likelihood of ESG regulations increasing in tandem with more extreme weather events.

Scenario Development

Our analysis used two divergent climate scenarios:

	Scenario 1: Failure to act	Scenario 2: Paris-aligned
GHG emissions	Emissions continue to rise through 2100	Advanced economies reach net zero by 2050
Temperature rise	Over 4° C in Canada	Lower than 2° C
Climate action policies	Least aggressive	Most aggressive
Greatest risks to Dream	Physical risks	Transition risks
Guided by	Intergovernmental Panel on Climate Change (“IPCC”) Representative Concentration Pathway (“RCP”) 6.0 and 8.5 ⁽¹⁾	International Energy Agency (“IEA”) Sustainable Development Scenario (“SDS”), IPCC RCP 2.6 ⁽²⁾

These scenarios were chosen because they are:

Plausible: the scenario events are possible based on research from credible sources

Differentiated: each scenario focuses on different combination of factors and thus allows Dream to identify a variety of possible risks and opportunities

TCFD aligned: the TCFD recommends using a warming scenario of 2° C or lower

The scenarios are also aligned with IFRS S2 which requires the use of climate-related scenarios aligned with the latest international agreement on climate change.

(1) Representative Concentration Pathways are greenhouse gas concentration trajectories used to model climate change outcomes. More information on RCPs published by the IPCC can be found at https://ipcc-data.org/guidelines/pages/glossary/glossary_r.html

(2) The SDS outlines one potential path to 2040 to meet the objectives of the Paris Agreement through assumptions about policies aimed at increasing efficiencies and renewable energy sources to limit energy demand growth. More information can be found at <https://www.iea.org/data-and-statistics/charts/energy-sector-carbon-intensity-historical-and-sds>

Scenario 1: Failure to Act

Risk	
Market variability	<ul style="list-style-type: none"> Increased time and cost to comply with varying regulations Varying tenant and investor expectations lead to confusion and inefficiencies
Asset value protection	<ul style="list-style-type: none"> Higher capital expenditure costs to protect assets from increased physical risk Potential for stranded assets in high-risk, uninsurable areas
Repair costs and disruptions	<ul style="list-style-type: none"> Unpredictable operating expenditures Increased repair costs Decrease in availability of assets to acquire Business disruption due to climate events Health and safety risks
Tenant needs shift	<ul style="list-style-type: none"> Misaligned climate objectives deter progress Increased tenant demand for resilience Decreased demand in high-risk areas Tenant operations suffer due to physical risk, depressed economic activity
Supply chain issues	<ul style="list-style-type: none"> Risk to development timelines and budgets Product availability and transportation becomes a challenge
Opportunities	
Differentiate and attract via resilience	<ul style="list-style-type: none"> Strengthen existing relationships by increasing awareness of the importance of resilience Invest in resilience to differentiate from peers and attract tenants and investors Improve resilience to create investment opportunities in higher risk areas
Opportunities for new and creative leadership innovations	<ul style="list-style-type: none"> Contribute to resilience-related standards or certifications Sell renewable energy
Collaborate to lessen impact	<ul style="list-style-type: none"> Pursue industry leadership and collaboration through resilience Build relationships with local suppliers who can mitigate potential disruptions better than global supply chain partners Capitalize on increased availability of skilled workers and potential tenants as local population grows

Scenario 2: Paris-aligned

Risk	
Net zero investment	<ul style="list-style-type: none"> High capital expenditure costs to achieve net zero at existing buildings and protect value Up-skilling for new technology and operational practices Technology risk as first-movers Risk of stranded assets
Development costs	<ul style="list-style-type: none"> Increased costs to develop net zero capabilities Reduced rent premiums and affordability challenges due to increase in minimum sustainability requirements Longer permitting and development timelines
Infrastructure challenges	<ul style="list-style-type: none"> Limits to capacity and reliability of electrical grids Increased demand leads to brownouts, business disruption Lack of renewable energy infrastructure and materials
Tenant collaboration challenges	<ul style="list-style-type: none"> Pursue industry leadership and collaboration through resilience Resistant tenants could impact net zero target achievement and relationships
Reputational expectations and risk	<ul style="list-style-type: none"> Reputational risk to not achieving net zero target Increased reporting requirements and costs to communicate climate action
Opportunities	
Attract tenants and capital	<ul style="list-style-type: none"> Differentiate from peers through ambitious GHG reduction programs and partnerships Attract tenants and investors with similar decarbonization goals Lower risk profiles from investors by committing to transparent reporting
Opportunity for low-carbon products and services	<ul style="list-style-type: none"> Increased demand for renewable energy certificates and solar energy Invest in low-carbon technology ventures
Early action reduces future costs	<ul style="list-style-type: none"> Reduce future costs by building low-carbon assets ahead of peers Decrease future costs by conducting early pilots of new technology Lower insurance costs by increasing asset resilience and longevity

Forward-looking Plans

We are using the results of the climate scenario analysis to:

- **Identify and prioritize** which climate risks may impact our assets based on likelihood and severity to help prioritize property-specific capital plans and future-proof our assets
- **Prioritize mitigation efforts** and engage in proactive positioning to pursue relevant opportunities
- **Protect our financial position** by investing and building competence in resilience and adaptation
- **Advance opportunities** to be a low-carbon leader, benefit from increased tenant demand for net zero assets, and gain access to capital for clean technology innovations

In addition, we intend to expand the scope of the climate resiliency working group to more assets, risk types and regions.

Cybersecurity and Information Governance

We are committed to cybersecurity and privacy through a combination of regular security awareness activities and the use of next-generation protection technologies. Our Cybersecurity and Information Governance program is overseen by our Chief Information Officer.

Cybersecurity

In 2023, our cybersecurity program was focused on the following areas in order to help minimize the likelihood and impact of cyber incidents on our systems:

- Monitoring threats and implementing preventative measures to ensure that all systems and employees are protected
- Performing regular assurance activities, including internal and third-party vulnerability scanning and assessments in order to manage exposure and risk
- Incident management and resolution, guided by internally developed processes, policies and procedures, supported by continuous improvement
- Benchmarking our security controls against leading cybersecurity frameworks
- Conducting mandatory cyber-awareness training program for all employees

Information Governance

Our data governance program aims to strengthen our data posture and data privacy oversight across the business. The program monitors security threats, malicious events, incidents, employee data, and file sharing by implementing new monitoring processes and tools. We generate monthly reports tracking malicious attempts that are shared with our senior leadership team.

Forward-looking Plans

- **We continuously evaluate and implement new technologies,** processes, and tools in order to adapt to emerging cybersecurity threats.

Business Ethics

As one of Canada's leading real estate organizations, we are committed to maintaining the highest standards as it relates to ethical business conduct.

We are steadfast in our commitment to maintaining the highest business and personal ethical standards by dealing openly and honestly with each other and with our Directors, Trustees, investors, tenants, and suppliers. We are also acutely aware of the laws and regulations that govern our conduct at work, in the marketplace, and in our communities.

Our various policies governing business ethics and norms of behaviour are developed by the respective entity boards. Compliance with these policies is the responsibility of all employees.

Each Dream entity is governed by a Code of Conduct (the "Codes") which are reviewed annually. The Codes are our statement of the values and principles that guide us in our daily business activities. The keystones of our Codes are: integrity, respect, fairness, accountability and transparency. The Codes support our commitment to operate our businesses at the highest level of legal, moral and ethical standards, and they provide the overriding principles for all of our policies and our approach to business. Each Code of Conduct applies to all members of the organization, including Directors, Trustees, Officers, and employees.

These Codes have guidelines for expected behaviours and practices in daily business activities, and direct employees to report conflicts of interest to the applicable supervising individual. Conflicts of interests related to Directors, Trustees and Officers are disclosed in our [Annual Information Forms](#).

ESG Scorecard⁽¹⁾

Energy consumption, Scope 1 and Scope 2 GHG emissions, and water consumption intensities under Dream Unlimited's control increased year-over-year by 2%, 2% and 44%, respectively. The increase was due to visitor volumes, tenant activity and routine fluctuations in normal operations, compared to 2022, which was still affected by COVID-related impacts. The waste diversion rate decreased by 3% in 2023 for similar reasons.

ENERGY⁽²⁾

Energy intensity:

(1) Each year's energy, GHG, water, waste, building certification and energy rating data is based on the relevant properties owned for the calendar year in that year unless otherwise stated. Floor area square footage is based on Gross Leasable Area ("GLA") as of end of reporting year.
 (2) The scope of boundary of the data includes standing investments where DRM has direct operational control. As a result, investment assets Gladstone Hotel, Broadview Hotel and Zibi Community Utility are outside DRM's organizational boundaries.
 (3) Data coverage includes Distillery District and Arapahoe Basin Ski Resort.
 (4) Data coverage includes Distillery District.
 (5) Dashed lines represent data that was not tracked during the noted time period. Dashed lines are shown for illustrative purposes only and do not represent any correlation with any other consumption or intensity values shown on same chart.
 (6) GHG emissions are calculated in accordance with the World Resource Institute Greenhouse Gas Protocol. The captured activities include DRM's operational control over: Scope 1 emissions generated directly from its operations; Scope 2 emissions indirectly associated with generation of purchased electricity, heating, cooling, and steam consumed by properties, Scope 3 emissions generated from Category 13 (downstream-leased assets).

Waste Diversion Rate:

Environmental

Approach

Dream Unlimited is committed to integrating sustainability into the design, construction, and operations of its buildings. Dream Unlimited has a legacy of building communities that showcase best practices in sustainability.

As outlined in its Environmental Policy, Dream Unlimited is committed to, when applicable and where appropriate to its business:

- **Consider** environmental protection in its operations, developments and procurement, including investing in climate resilience and enhancing local biodiversity
- **Promote** a comprehensive approach to resource management, energy efficiency and emissions reduction, which encompasses reduction, reuse, and recycling throughout its operations, developments, and procurement processes
- **Implement** commercially prudent measures to minimize negative environmental impacts of its operations
- **Engage** in ongoing dialogues with stakeholders to promote environmental sustainability in commercial real estate
- **Develop** internal environmental awareness programs and engage employees by establishing sustainability working groups
- **Identify** and manage environmental risks, and monitor environmental performance

Quayside
Toronto, ON

Net Zero Action Plan

Dream Unlimited has committed to be net zero by 2035 for operations and new developments, including Scope 1, Scope 2 and select Scope 3 emissions.

In 2023, Dream Unlimited made progress by developing asset-level net zero roadmaps for a number of assets in its portfolio, integrating net zero thinking into the development of capital plans, enhancing energy management practices, and improving data collection.

Dream Unlimited is also focused on developing new high-performance, net zero buildings that will help meet its net zero targets. In 2023, Dream Unlimited made progress on several of these developments and started exploring strategies to minimize embodied carbon throughout its development process.

As a benefit of being a first mover, Dream Unlimited is focused on partnering with governments and participating in programs that offer financial incentives to encourage and support the capital investments needed to accelerate decarbonization of the building sector.

For more information on Dream Unlimited’s net zero commitments, please refer to the [Net Zero by 2035 Action Plan](#).

(1) As at December 31, 2023. “Assets under management (“AUM”)” is the respective carrying value of gross assets managed by the Company on behalf of its clients, investors or partners under asset management agreements, development management agreements and/or management services agreements at 1 of the client’s total assets. All other investments are reflected at the Company’s proportionate share of the investment’s total assets without duplication. Assets under management is a measure of success against the competition and consists of growth or decline due to asset appreciation, changes in fair market value, acquisitions and dispositions, operations gains and losses, and inflows and outflows of capital. Please refer to our [Annual Report](#) for more information.

(2) At 100% ownership level. Net zero communities in development consist of Zibi, Dream LeBreton and Quayside.

(3) For more information on DRM’s net zero commitments with respect to investment boundary and emissions boundary, please refer to pages 20-22 in our [Net Zero by 2035 Action Plan](#).

Spotlight —

Arapahoe Basin Achieves Carbon Neutrality

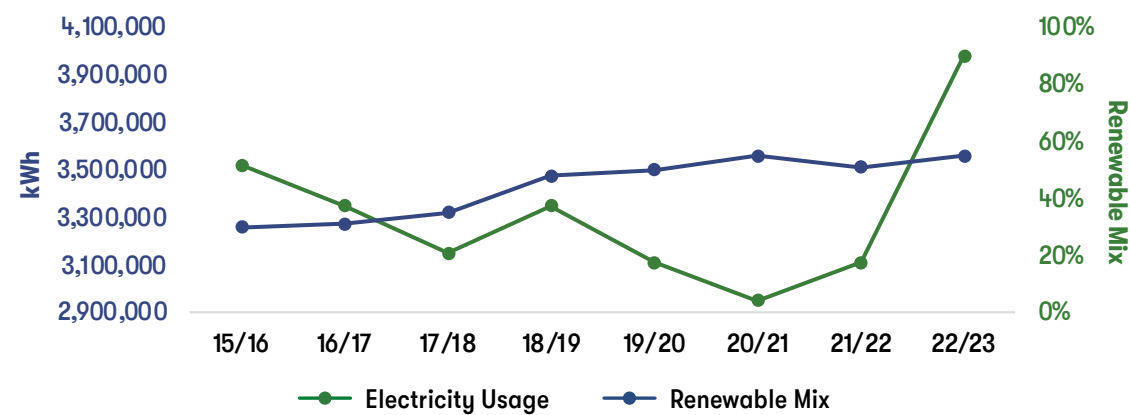

Dream Unlimited acquired Arapahoe Basin in 1997 and over the last 27 years, together with the Arapahoe Basin management team, the ski area was expanded and modernized, the two highest elevation restaurants in North America were opened, industry leading sustainability goals were set.

In 2023, Arapahoe Basin was honoured by the National Ski Areas Association’s Golden Eagle Award for Community and Partnerships, for its collaboration with community organizations, industry-wide sustainability initiatives, and climate advocacy work. In the same year, Arapahoe Basin also achieved its ambitious goal to source 100% of electricity from renewables, two years ahead of schedule. By fully switching to renewable electricity, Arapahoe Basin has reduced its GHG emissions by over two thirds. The target to achieve 100% renewable electricity by 2025 was set in 2018, alongside six other environmental sustainability targets which together support a pledge to achieve carbon neutrality by 2025.

Key to the success of achieving 100% renewable electricity is Arapahoe Basin’s partnerships with like-minded organizations. These include Xcel Energy, an electric utility pursuing a net zero by 2050 target, and Jack’s Solar Farm, a visionary social enterprise pioneering innovative agrivoltaic techniques to increase both food and energy security.

On February 5, 2024, Dream announced it had entered into an agreement to sell Arapahoe Basin to Alterra Mountain Company for an after-tax profit of \$110 million⁽¹⁾. The sale is expected to close in 2024 and is subject to regulatory approvals.

Electricity Use and Renewables

For more information on Arapahoe Basin’s carbon neutral goals and progress, please visit arapahoebasin.com/sustainability/

Arapahoe Basin
Dillon, CO

“

Our approach to securing a sustainable future is rooted in collaboration and knowledge exchange. From working with Xcel Energy to promote electric vehicles, to sharing our sustainability roadmap with peers, to testifying on Capitol Hill in support of climate solutions, we use engagement as a powerful tool to multiply our impact.

”

Mike Nathan
Sustainability Manager, Arapahoe Basin

⁽¹⁾ Based on the exchange rate and internal estimates of taxes payable, management believes this sale will result in after-tax profit of \$110 million before closing costs and adjustments. For more information, please see: <https://www.businesswire.com/news/home/20240205202394/en/Dream-Unlimited-Corp.-Announces-Sale-of-Arapahoe-Basin>

Resource Management

Energy Management

Dream Unlimited is committed to using energy in an efficient, cost effective and environmentally responsible manner. [Dream Unlimited's Environmental Policy](#) is focused on benchmarking energy use, meeting its energy reduction targets, enrolling in demand response programs and educating employees and tenants on energy conservation.

Water Management

Dream Unlimited is committed to reducing water consumption at its properties through preventative maintenance programs. Dream Unlimited's Environmental Policy sets forth objectives that support this goal, including monitoring major water consuming equipment through building management systems, leak reporting through the tenant service program, routine inspections by staff, installing low-flow water fixtures during washroom renovations, and monitoring landscape irrigation using rain sensors and control timers.

(1) Includes employees employed by Dream Asset Management Corporation, which includes DRM and MPCTJUN employees, and Canadian DRRJU employees. Does not include employees at recreational properties, employees on leaves of absence (e.g., permanent disability, long-term disability, parental leave), interns, and DRRJU employees of Pauls Corp.
 (2) Includes employees at all levels.
 (3) Includes Managers and above.
 (4) Includes Vice Presidents and above.
 (5) For the purposes of this report, Executives include: the Chief Responsible Officer and Chief Financial Officer of DRM
 (6) Numbers represented as total headcount, not full-time equivalent.
 (7) Includes permanent part-time employees.
 (8) Includes all employees with a work schedule of 35 hours or greater.

Inclusive Communities

Dream Unlimited also supports the communities in which it operates through its partnerships, programming, and inclusivity commitments.

Social Procurement Strategy

Dream Unlimited, together with Dream Impact and Dream Office, released its Social Procurement Strategy in 2021, focusing on using its spending power on real estate activities to create economic benefits for diverse⁽¹⁾ vendors and local⁽²⁾, independent⁽³⁾ and/or socially responsible⁽⁴⁾ vendors, as well as employment opportunities for equity-seeking groups⁽⁵⁾.

In 2023, Dream Unlimited, in coordination with Dream Impact and Dream Office, continued to implement and improve the Social Procurement Strategy and exceeded the initial 2025 published targets for spending across categories that included major development projects (Dream LeBreton and Quayside), decarbonization retrofits in office and multi-family rental buildings, general operational spending, and partnerships through the Dream Community Foundation.

For detailed information on Dream’s Social Procurement Strategy, please refer to the [2023 Impact Report](#). ↗

The following are the targets set in the Social Procurement Strategy:

2025 Targets	2023 Progress
20% of the annual value of all contracts awarded to businesses that are majority owned or managed by an equity-seeking group	Exceeded Target Awarded 25% or \$15.9 million ⁽⁶⁾
20% of the annual value of all contracts awarded to local, independent, and/or socially responsible businesses	Exceeded Target Awarded 80% or \$50.4 million ⁽⁶⁾
20% of annual jobs created through capital and operating spending filled by individuals from an equity-seeking group	In Progress launched pilot to track progress against target
30% of apprentice hours worked by individuals from an equity-seeking group	In Progress launched pilot to track progress against target

The following is a summary of progress made in 2023 as measured against the Implementing Actions established in the initial strategy:

Implementing Actions	2023 Progress
Seek external memberships to support the work	100%
Support vendors	15%
Implement a monitoring and reporting system for tracking progress on published targets	80%
Create template language for updated bid and contract documents	95%
Establish a baseline of existing vendors	80%

(1) A Diverse Vendor is defined as a vendor who is at least 50% owned or managed by equity-seeking groups.
 (2) A Local Vendor is defined as a vendor with a billing address that falls within a defined geographic catchment radius to a given asset.
 (3) An Independent Vendor is defined as a vendor with demonstrable independent ownership.
 (4) A Socially Responsible Vendor is defined as a vendor that can provide evidence of a CSR/ESG report or equivalent, or third-party certification from groups such as EcoVadis, B-Corp or equivalent.
 (5) Dream’s definition of an Equity-Seeking Group is one or more of the following: Black, Indigenous, People of Colour (BIPOC), Women, New Canadians (Having immigrated within the last 10 years), Lesbian, Gay, Bisexual, Transgender, Queer (2SLGBTQIA+), Individuals with Disabilities or Accessibility needs and Indigenous Peoples.
 (6) The figures shown are derived from spending on vendors meeting aforementioned Social Procurement definitions on select DRM, MPCTJUN and DJUN assets, over total cumulative asset spending and excludes spending on vendors that are determined as exempt as defined by the Social Procurement Strategy

Community Building at Scale⁽¹⁾

Dream Unlimited has been an active developer and landowner in Toronto’s Downtown East since 2004 with Dream Unlimited’s investment in the 13-acre Distillery District. Over the last two decades Dream Unlimited has partnered with several other leading developers to become the largest developer in the area, currently owning or developing over 70 acres. Dream Unlimited takes pride in honouring the past and legacy of the neighbourhoods it creates while using innovative techniques and partnerships to integrate sustainability and provide housing across the income spectrum.

Quayside is one of the most exciting development projects in Canada, integrating multiple levels of government and ambitious sustainability and inclusivity targets. This 12-acre site at the east end of downtown Toronto’s waterfront is targeting to be a net zero GHG emissions master-planned community and will also include 3.5 acres of public forested green space, a significant urban farm, and one of Canada’s largest residential mass timber structures.

Before initiating the application process for a city-transforming project like this, Dream Unlimited, as Dream Impact’s asset manager and development partner on Quayside engages with the public to incorporate community needs and minimize environmental impact. It collaborates with leading urban designers and master community planners to create attractive, community oriented, and environmentally sustainable concepts.

In 2023, stakeholder outreach efforts began to raise awareness and gather feedback on project details, including programming, land use, density, massing and site plan design, and landscape. Meetings were attended by staff from Waterfront Toronto, the City of Toronto, Quayside Impact Limited Partnership and their consultant team. Additionally, the City hosted two Community Consultation meetings in November.

Key tools like the project website and social media accounts were created to educate the public about the development, share updates, and engage them in future phases.

Governance Structures and Policies

As part of the ESG Framework, Dream Unlimited links ESG considerations to executive goals and compensation. Sustainability, ESG and impact related matters are managed by the following:

Board, Committee or Team	Responsibilities ⁽¹⁾
Board of Directors	<ul style="list-style-type: none"> The Dream Unlimited board is responsible for the oversight of ESG matters and has delegated such oversight to the Governance, Environmental and Nominating Committee
Governance, Environmental and Nominating Committee	<ul style="list-style-type: none"> Oversee approach to environmental, social, governance and impact investing matters
Chief Responsible Officer	<ul style="list-style-type: none"> Highest-level executive with oversight over ESG and impact matters, including sustainability and climate change, at Dream Unlimited Works with the Chief Financial Officer to provide leadership over the sustainability strategy and oversee adoption of the ESG Framework

Climate Change Risk

Climate change poses a significant risk for Dream Unlimited’s properties, employees, tenants and communities.

Dream Unlimited is proactively managing climate-related risks to meet its net zero commitment and protect against the shocks and stressors of climate change and the transition to a low-carbon economy. Climate change risk informs Dream Unlimited’s business strategy and decision-making by establishing the order of priority for making the capital and operational investments needed to future-proof assets.

The adjacent table provides a high-level summary of key physical and transition risks and their associated potential impacts on Dream Unlimited’s business. For details on how Dream Unlimited identifies, manages and mitigates climate risks, please refer to the shared [Climate Change Risk](#) section.

Type of Risk ⁽¹⁾	Identified Risks	Potential Impact	Mitigating Action
Physical, acute Short-to long term time horizon	<ul style="list-style-type: none"> Natural disasters and increasingly frequent and severe weather conditions including wildfire, windstorms, tornadoes, hailstorms, lightning and earthquakes 	<ul style="list-style-type: none"> Could interrupt operations and activities, threaten tenant health and safety, damage properties and may decrease property values or require additional expenses to be incurred, including increased insurance costs 	Across all entities we use third-party climate data to assess property-level physical climate risks from the following hazards: <ul style="list-style-type: none"> Flooding · Wildfire · Earthquake · Hailstorm Lightning · Windstorm · Tornado
	<ul style="list-style-type: none"> 50, 100, 200 and 500-year flood events 		
Physical, chronic Short-to long term time horizon	<ul style="list-style-type: none"> Temperature change Precipitation change Sea-level rise Air quality Water security/water stress 	<ul style="list-style-type: none"> Temperature change could increase cooling loads and costs Sea-level rise could alter geographies targeted for future investment Water security/water stress risk may impact approach to water management and capital expenditures on efficiency upgrades 	Property-level risk is assessed using third-party climate data against the listed chronic physical climate risks: <ul style="list-style-type: none"> Temperature change · Air quality Precipitation change · Water security/water stress Sea-level rise
Transition, policy and legal Short-to long term time horizon	<ul style="list-style-type: none"> Greenhouse gas emissions reduction regulations 	<ul style="list-style-type: none"> Could impose constraints on operational flexibility or result in financial costs or fines to comply with various reforms 	<ul style="list-style-type: none"> GHG reduction targets and Dream Unlimited’s Net Zero Action Plan help mitigate transition risk by proactively reducing emissions ahead of potential future regulations and anticipating future changes in tenant preferences and market supply and demand.
Transition, market and reputation Short-to long term time horizon	<ul style="list-style-type: none"> Shift in supply and demand for products and services Changing tenant preferences Increased stakeholder expectations on climate-related risk 	<ul style="list-style-type: none"> Failure to adapt to climate change reforms could adversely affect reputation Costs to build net zero assets, or upgrade assets to net zero could increase May require increased internal resources to manage climate risk and produce climate disclosures 	<ul style="list-style-type: none"> The Risk Management and Sustainability and ESG teams continuously monitor exposure to transition risk associated with policy and legislative changes, market, and reputational shifts. Additionally, Dream Unlimited continues to strengthen alignment with TCFD recommendations.

⁽¹⁾ Short-term is used to describe risks with the highest likelihood and greatest severity between present and 2030. Long-term is used to describe risks with the highest likelihood and greatest severity after 2030.

GRESB is an independent organization that validates ESG performance data. It is the global standard for ESG benchmarking and reporting for listed property companies, private property funds, developers and investors that invest directly in real estate.

In 2023, Dream Unlimited completed its third consecutive submission to the GRESB Public Disclosure assessment. GRESB is an industry-driven organization that is committed to assessing the ESG performance of real estate portfolios around the globe. Participation in the GRESB Public Disclosure assessment provides Dream Unlimited with a globally recognized benchmark to evaluate the progression of its ESG strategy and targets, and the recent results validate its accomplishments to date.

Zibi
Ottawa, ON & Gatineau, QC

Spotlight

Incorporating Climate Resiliency into Developments

Physical climate risks can impact developments by driving up operational costs, repair and maintenance costs and influencing tenant preferences in areas with exposure to certain types of climate perils.

In 2023, the Dream group established a working group which brings together various teams across the entities, including Dream Unlimited, to standardize an approach to climate risk adaptation and incorporate that approach into its existing properties and developments.

Using a physical climate risk scenario analysis tool, the working group has aggregated asset type-specific climate risks and prioritized

them on the basis of likelihood and severity. This information will be used to develop tactical methodologies for reducing the exposure of assets across the Dream Unlimited portfolio to climate perils identified to be relevant to each asset.

Dream Unlimited has a strong track record of building communities to last by identifying and preparing for physical climate risks. In Ottawa and Gatineau, while it is typical to design to withstand a 1-in-100 flood risk, Zibi was designed to withstand a 1-in-1000 flood risk due to the increased flood risk as a result of climate change. This helped Zibi avoid water damage during the two 100-year floods that occurred between 2016-2019.

(1) All intellectual property rights to this data belong exclusively to GRESB B.V. All rights reserved. GRESB B.V. has no liability to any person (including a natural person, corporate or unincorporated body) for any losses, damages, costs, expenses, or other liabilities suffered as a result of any use of or reliance on any of the information which may be attributed to it.

Case Study

Mitigating Flood Risk at Brightwater

Brightwater is a 72-acre lakeside neighbourhood in Mississauga's Port Credit area. Upon completion, the site is expected to be transformed into a vibrant and diverse community, including an elementary school, YMCA, and 18 acres of parks and outdoor space.

The development, located on remediated Imperial Oil refinery lands, won the Building Industry and Land Development Association Pinnacle Award in 2020 for Best New Community Planned/Under Development. Due to its proximity to Lake Ontario, physical climate risk mitigation strategies have been used to mitigate flood risk.

These include the installation of berms and the use of low impact development tactics such as naturalized boulevards and permeable pavements. Investing in flood mitigation provides several benefits:

- Preserving long-term asset value
- Increasing tenant comfort and satisfaction when investing in waterfront real estate
- Reducing business interruptions for retail tenants

Brightwater
Mississauga, ON

Forward-looking Plans

Canopy Park at Alpine Park
Calgary, AB

Environmental

- **Continue** to implement GHG emissions reductions and energy efficiency improvements across the portfolio and pilot retrofit projects to meet 2025 targets
- **Scale up** the development of asset level net zero roadmaps for more properties using in-house engineering tools
- **Continue** strategizing the most efficient approach to decarbonize the Dream Unlimited portfolio
- **Develop** embodied carbon reduction strategies for each construction project in the pipeline
- **Continue** to develop and enhance the internal skills and competencies related to net zero and decarbonization strategies
- **Continue** to improve the accuracy of GHG emissions projections and data collection for Scope 3 emissions and increase GHG emissions data coverage boundary to more assets as appropriate
- **Analyze** business opportunities and options for procurement of renewable energy technologies
- **Continue** incorporating the Digital Transformation Standard, which was developed to future-proof Dream Unlimited's assets, information, and operational technology infrastructure, for wholly owned new high-rise construction projects

Dream Community Foundation & Play Forever summer camp
Toronto, ON

Social

- **Continue** developing 672 affordable housing units that are expected to be completed between 2024 and 2027
- **Continue** to expand affordable rental housing units in the pipeline
- **Scale up** social procurement tracking to more projects and refine tracking procedures
- **Engage** with more vendors on, build internal knowledge of and generate more external awareness of Social Procurement Strategy
- **Expand** inclusive community programming across Canadian multi-family assets in partnership with the Dream Community Foundation, guided around the strategic pillars of "Grow Together, Eat Together, and Play Together"

Fireside Chat with Alexander Sannikov
Toronto, ON

Governance

- **Evaluate** and plan for compliance with future sustainability regulatory reporting requirements such as the International Financial Reporting Standards ("IFRS") S1 and S2 standards
- **Continue** reporting to PRI and NZAM
- **Create** Dream Unlimited's Construction Waste Management Guideline for New Developments (applicable to high-rise office and apartment construction, wholly owned and developed by Dream Unlimited)
- **Evaluate** the impact and opportunities of aligning with the recommendations of the Task Force on Nature-related Financial Disclosures ("TNFD") on Dream Unlimited's portfolio
- **Develop** a plan to systematically assess climate change risk based on the short- and long-term risks and opportunities identified in scenario analysis
- **Expand** the scope of the climate resiliency working group to more assets, risk types and regions

Dream Impact Trust

About Dream Impact Trust⁽¹⁾

Dream Impact Trust (TSX: MPCT.UN) (“Dream Impact”, or “MPCT.UN”) is an open-ended trust dedicated to impact investing. Impact investing is the intention of creating measurable positive, social, or environmental change in its communities and for its stakeholders, while generating attractive financial returns.

Dream Impact provides investors with access to an exceptional portfolio of real estate development and income properties that would not be otherwise available in a public and fully transparent vehicle, managed by an experienced team with a successful track record in these areas.

1st

publicly traded impact investing vehicle in Canada

“

We are pleased to have delivered over 900 housing units in 2023 to address the urgent need for affordable and market housing options. We intend to continue executing on our significant net zero and affordable housing development pipeline to create positive and lasting social and environmental impact, while generating attractive financial returns for our investors.

”

Meaghan Peloso
Chief Financial Officer, Dream Impact Trust

(1) All figures as at December 31, 2023, unless otherwise stated. As of December 31, 2023, substantially all of MPCT.UN’s portfolio qualified under the MPCT.UN’s definition of an impact investment or are in the impact planning stage. Over the next few years, MPCT.UN intends to wind down or exit remaining non-impact investments and increase financial flexibility from the build-to-sell assets.
(2) Debt-to-asset value is a non-GAAP ratio calculated as total debt payable (a non-GAAP financial measure) divided by the total asset value of Dream Impact as at the applicable reporting date. The most directly comparable financial measure to total debt payable is total debt with respect to Dream Impact. Please refer to the [Specified Financial Measures and Other Disclosures](#) section of this Report.
(3) Excludes properties acquired or transferred into the recurring income segment in 2023 and 2022.

Impact Verticals

As an owner and developer of real estate, Dream Impact is focused on building and operating its properties to contribute to the betterment of their communities by managing resource efficiency to minimize environmental impact, providing attainable and affordable housing, and fostering inclusivity as it pursues attractive financial returns.

In line with its overarching strategy to be a pure-play impact investment vehicle, Dream Impact utilizes assets in both segments (development and investment holdings, and recurring income) to generate positive impact across its impact verticals. These verticals are aligned with the United Nations Sustainable Development Goals (“SDGs”), with a focus on SDG 11: Sustainable Cities and Communities.

To measure, verify and communicate the impact created within its communities, Dream Impact has developed a proprietary impact management system and shares progress towards meeting its impact goals annually. Please refer to the most recent [Impact Report](#).

These impact verticals directly address some of the largest issues facing Canada today: **climate change, an affordable housing crisis, and fairness and inclusion in society.**

Impact Vertical	Issue Addressed
 <p>Environmental Sustainability and Resilience</p> <p>Develop sustainable real estate that optimizes energy use, limits GHG emissions, reduces water and waste usage, while also creating resiliency against natural disasters and major climatic events.</p>	<p>Climate Change</p> <p>Canada is targeting a 40-45% greenhouse gas (“GHG”) emissions reduction target by 2030 and a transition to net zero by 2050⁽¹⁾. This includes transitioning Canada’s building stock towards a climate resilient built environment through low carbon supply chain, adoption of net zero building codes, and fostering innovation in construction practices. This target also includes embracing affordability by enhancing energy efficiency through renewable solutions, transforming space and water heating, and improving workforce development to align with SDGs that all contribute to a sustainable future⁽²⁾.</p>
 <p>Attainable and Affordable Housing</p> <p>Invest in and develop mixed-income communities that are transit-oriented, located close to employment opportunities, and support an overall lower cost of living with a higher quality of life.</p>	<p>Affordable Housing</p> <p>To achieve housing affordability for all Canadians, an additional 3.5 million units are required to be developed by 2030⁽³⁾. The development of mixed-income communities through leveraging federal affordable housing initiatives and collaborating with diverse stakeholders can accommodate a variety of income levels while aligning with Canada’s “Building More Homes, Faster” initiative.</p>
 <p>Inclusive Communities</p> <p>Intentionally design and build communities that are inclusive for everyone. This includes creating spaces that encourage mental and physical well-being, foster social connections, and support economic growth.</p>	<p>Increasing Social Inclusion</p> <p>Canada continues to be one of the most diverse countries in the world, aiming to add 485,000 permanent residents for 2024 and 500,000 in 2025⁽⁴⁾. To support Dream Impact’s growing diversity it requires that we create communities which bring people together through initiatives focused on reducing disparities and providing equitable opportunities.</p>

(1) DRM completed the submission on behalf of the Dream group of companies, including MPCT.UN.

(2) All intellectual property rights to this data belong exclusively to GRESB B.V. All rights reserved. GRESB B.V. has no liability to any person (including a natural person, corporate or unincorporated body) for any losses, damages, costs, expenses, or other liabilities suffered as a result of any use of or reliance on any of the information which may be attributed to it. Green Stars recognize Real Estate entities with a score higher than 50% of the points allocated to each relevant component.

(3) By MPCT.UN's asset manager, DRM.

ESG Scorecard⁽¹⁾⁽²⁾

The Dream Impact income portfolio is comprised of office and multi-family assets. Across the office portfolio, like-for-like energy, water and Scope 1 and 2 GHG emissions intensities are down year-over-year by 4%, 11% and 18%, respectively, due to continued efforts to improve operational efficiency and the increasing weighting of newer, higher performing assets, like Zibi, within the portfolio. In addition, the waste diversion rate, at 30% in 2023, continued to be challenging to improve to meet the target. Dream Impact intends to continue working on a strategy to improve its waste diversion rates at its office assets.

The portfolio-wide data is influenced by the changing portfolio make up, as Dream Impact has intentionally purchased assets where it can deliver positive impact through improvements and have diversified into the multi-family asset class over the last few years. As a result, year-over-year, energy consumption, GHG emissions, water consumption and waste generated has increased due to the acquisition of multi-family assets and completion of development projects.

✓ Externally assured; please refer to note in the [About this Report](#) section

ENERGY⁽³⁾

Energy intensity:

Target:

SCOPE 1 & 2 GHG EMISSIONS⁽³⁾⁽⁵⁾

Scope 1 and 2 GHG emissions intensity:

Target:

WATER⁽³⁾

Water intensity:

Target:

(1) Each year's energy, GHG, water, waste, building certification and energy rating data is based on the relevant properties owned for the calendar year in that year unless otherwise stated. Floor area square footage is based on Gross Leasable Area ("GLA") as of end of reporting year.
 (2) Refer to [Supplemental Disclosure and Standard Index](#) for more information including sources of emission factors, data coverage, inclusions, and exclusions.
 (3) Represents absolute data and not like-for-like data.
 (4) Includes office-type assets with GLA at 100% operational for the full year.
 (5) GHG emissions are calculated in accordance with the World Resource Institute Greenhouse Gas Protocol. They capture activities MPCT.UN has direct and indirect operational control over: Scope 1 emissions generated directly from its operations, including heating at MPCT.UN's properties. Scope 2 emissions indirectly associated with generation of purchased electricity, heating, cooling, and steam consumed by properties.

Certifications and Ratings

73%⁽²⁾
of portfolio with green building certification

71%⁽²⁾⁽⁷⁾
of eligible portfolio with energy rating

Target: 100% certification (any program) of all office buildings by 2025

ESG Ratings Summary

Dream Impact is evaluated periodically by the following rating agency:

ISS  **Governance: 6**⁽⁸⁾
1-10 (1 = Best)

Dream Impact performs annual flood and catastrophic loss risk assessments to determine which properties in its portfolio are at risk of losses from 50, 100, 200 and 500-year floods.

✓ Externally assured; please refer to note in the [About this Report](#) section

(1) Represents absolute data not like-for-like data.
 (2) Represents all office-type assets with GLA at 100%.
 (3) Includes office-type assets with GLA at 100% operational for the full year.
 (4) Assets that may be classified under more than one category by default are not duplicated in the figures in the other time categories. Changes from the previous reporting year are the result of acquisitions or dispositions of assets. As at December 31, 2023.
 (5) Includes recurring income, development, and investment assets. Floor area (in sf) of assets under development are subject to change pending various development approvals. Owned land is included in the number of assets and excluded from the affected area.
 (6) Floor area square footage is based on GLA.
 (7) Represents the percentage of office-type asset portfolio based on sf using ENERGY STAR Portfolio Manager ("ESPM").
 (8) As at December 31, 2023.

Environmental

Environmental Sustainability and Resiliency

As an owner and developer of real estate, with a focus on impact investing, Dream Impact is committed to integrating sustainability into the design, construction, and operations of its buildings and communities. Dream Impact is focused on developing and operating its properties to optimize energy use, limit GHG emissions, reduce water use and waste while also creating resiliency against natural disasters and major climatic events.

Building Certifications

Green building certifications provide guidelines for the design, construction and operation of sustainable buildings, and help Dream Impact incorporate features that are energy-efficient, environmentally friendly, and healthy for occupants.

According to the Canada Green Building Council (“CaGBC”), green-certified buildings have lower operational expenses, leading to premium rents, better occupancy rates for commercial owners, and lower utility costs for tenants.

Dream Impact Portfolio Certification by Type and Level⁽¹⁾

Maple House at Canary Landing
Toronto, ON

⁽¹⁾ The chart is based on GLA of assets as at December 31, 2023, including all Canadian office-type properties including co-owned assets at 100% of GLA. Properties may have more than one certification which is why the chart adds up to more than 100%.

Net Zero Action Plan

Dream Impact has committed to be net zero by 2035 for operations and new developments, including Scope 1, Scope 2 and select Scope 3 emissions.

Retrofitting existing assets to be more energy efficient is an important component of Dream Impact's net zero action plan. Dream Impact has a strong track record of implementing energy efficiency measures in existing buildings that not only reduce emissions but also reduce operating costs and improve financial performance.

In 2023, Dream Impact made progress by developing asset-level net zero roadmaps for five more assets in its portfolio, integrating net zero thinking into the development of capital plans, enhancing energy management practices, and improving data collection.

Dream Impact is also focused on developing high-performance, net zero buildings that help meet its net zero targets. In 2023, Dream Impact made progress on several of these developments and started exploring strategies to minimize embodied carbon throughout its development process.

As a benefit of being a first mover, Dream Impact is focused on partnering with governments and participating in programs that offer financial incentives to encourage and support the capital investments needed to accelerate decarbonization of the building sector.

For more information on Dream Impact's net zero commitments, please refer to the [Net Zero by 2035 Action Plan](#)

59%

of Dream Impact's AUM is targeting net zero GHG emissions by 2035⁽¹⁾

\$6 billion

worth of projected net zero communities are being developed in partnership with Dream Impact⁽²⁾

2025

20% reduction in carbon intensity within the net zero boundary⁽³⁾

2030

50% reduction in carbon intensity within the net zero boundary⁽³⁾

2035

Net zero Scope 1, Scope 2 and select Scope 3 emissions (operational and development)⁽³⁾

(1) As at December 31, 2023. Includes fair value of investment properties and working capital under management.

(2) At 100% ownership level. Net zero communities in development consist of Zibi, Dream LeBreton and Quayside.

Leading Energy Efficiency Retrofits with the Canada Infrastructure Bank (“CIB”)

\$2.6 million

funded by the CIB for decarbonization projects⁽¹⁾

40+%

targeted GHG emissions reduction

In 2022, Dream Impact Trust, alongside Dream Unlimited and Dream Office REIT, were awarded \$136.6 million under the CIB’s Commercial Building Retrofits Initiative to undertake energy efficiency retrofit projects. The CIB’s purpose is to invest in revenue-generating infrastructure which benefits Canadians and supports sustainable economic growth, connected communities, and energy competitiveness.

Investor Ready Energy Efficiency

The CIB’s Building Retrofits Initiative requires that funded projects receive the CaGBC Investor Ready Energy Efficiency (“IREE”) certification. The certification helps to increase investor confidence by providing third-party verification for retrofit projects that meet desired energy targets. Using the IREE benefits project developers like Dream by outlining best practices for creating baseline energy usage, savings calculations, commissioning, operations, and maintenance, as well as measurement and verification.

In 2023, Dream Impact achieved the IREE certification for three additional multifamily buildings, bringing the total number of IREE certified projects within its portfolio to six.

Our participation in the Buildings Retrofits Initiative demonstrates how through valuable government and private sector partnerships we can achieve our sustainability goals by decarbonizing and modernizing our assets. We have drawn \$2.6M⁽¹⁾ in total to date from the CIB, which provides low-cost fixed rate financing that will be repaid over a 20-year term. The result of the properties being retrofitted is an expected GHG emissions reduction by over 40%, on average, by the end of 2027, helping us meet our net zero by 2035 goal, and the broader national climate goals for 2050.

177 St. George Street
Toronto, ON

⁽¹⁾ Based on cumulative draws to date as at December 31, 2023. Reflective of the Residence at Weston LP credit facility at 100%.

Toronto Deep Retrofit Challenge

In 2023, two Dream Impact properties, 723 Bloor St. West and 177 St. George St. were approved by the City of Toronto to participate in the Deep Retrofit Challenge (“DRC”). The DRC, launched in 2022, is a competition-style program aimed at supporting deep energy retrofit projects that significantly reduce GHG emissions and energy consumption. The goal is to accelerate the implementation of such projects in alignment with the City’s Net Zero Existing Buildings Strategy by 2026, and create comprehensive case studies.

Design and energy modeling were completed in 2023 for measures that will meet the program’s requirements. This includes installing new air source heat pumps, upgrading Heating, Ventilation and Air Conditioning (“HVAC”) controls and other energy efficiency upgrades. Construction commenced at both buildings in 2023 and is targeting substantial completion by end of 2024.

As part of the DRC, each building will receive grants of up to \$500,000 to offset the incremental design and construction costs of retrofit projects to achieve the following:

1. A maximum payback of 20 years or better
2. A minimum 50 percent reduction in the building’s GHG emissions
3. A minimum 50 percent reduction in the building’s total energy use intensity

“

There are numerous benefits to investing in decarbonizing buildings via comprehensive, multi-measure energy retrofit projects. Dream’s participation in the Deep Retrofit Challenge in Toronto is a great example. Projects like this align with the overarching goal of TransformTO, Toronto’s strategy aimed at achieving net-zero emissions by 2040. The designs, learnings, and energy data will be crucial in showcasing the pathway to decarbonization across the sector.

”

James Nowlan

Executive Director, Environment & Climate Division, City of Toronto

Highlight —

Decarbonizing 723 Bloor St. West as part of the DRC

723 Bloor Street West is a 16 unit, mid-rise multi-family residential apartment building in Toronto. The building, constructed in 1920, originally had natural gas boilers for space heating and domestic water heating. Deep retrofits planned at the building include electrifying of the heating system by replacing the gas boilers with heat pump technology for the domestic hot water systems, and installation of mini-split heat pump systems in each unit for efficient heating and the provision of cooling for residents. Each suite was also fitted with low flow faucets and shower heads to further drive down energy consumption and resulting emissions.

Advantages of heat pump technologies:

- **Highly energy efficient and can produce lower GHG emissions**
- **Precise temperature control in each thermal zone to improve occupant comfort**
- **Ability to increase the number of thermal zones in the building**
- **Provides cooling capabilities for residents in the summer months**

Estimated savings:

55%

reduction in energy use intensity⁽¹⁾

77%

reduction in GHG emissions⁽¹⁾

⁽¹⁾ Compared to baseline.

Canary District
Toronto, ON

Environmental Management

Dream Impact uses a third-party platform as an Environmental Management System (“EMS”) to manage and improve elements of the portfolio’s environmental performance. The platform benchmarks low and high performers within the portfolio. It also supports Dream Impact in meeting its overall sustainability goals and net zero emission reduction targets. The platform covers a wide range of environmental topics including energy, water, waste, GHG emissions and risk management.

The platform’s EMS is aligned with the four stages of ISO 14001 EMS standards as indicated in the steps of the Plan-Do-Check-Act model and was in use by Dream Impact throughout the 2023 reporting period.

The four stages of the third-party platform’s EMS include:

Plan

Set environmental objectives to comply with legal and environmental sustainability certifications (ENERGY STAR, LEED, city benchmarking requirements)

Do

Provide consulting services on energy efficiency, sustainability, ENERGY STAR, GRESB⁽¹⁾ and green certifications for Dream Impact’s environmental goals

Check

Establish and monitor programs to meet environmental objectives

Act

Evaluate performance against targets

Urban Farm at Quayside
Toronto, ON

Resource Management

Dream Impact is continuously identifying and implementing initiatives to improve the energy, water and emission intensity of its properties. This includes undertaking net zero development projects, implementing energy, water and emission management programs, and retrofitting existing assets to reduce energy, water and emissions.

Sustainability at Dream Impact is guided by the [Environmental Policy](#) of its asset manager, Dream Unlimited. The policy encompasses development and operational activities, focusing on energy and water conservation. It is based on Dream Unlimited’s commitment to achieving the 2035 net zero goals, protecting local biodiversity, complying with environmental laws, engaging with stakeholder groups, and improving environmental performance. The policy outlines the approach for collecting, quantifying, verifying, and reporting pertinent ESG data, targets, timelines, and progress in accordance with globally recognized standards and reporting frameworks.

The energy management section of the policy establishes objectives such as benchmarking energy usage at all facilities, conducting energy audits, implementing energy efficiency measures, performing timely maintenance, and educating employees and tenants on energy conservation.

The water and water risk management section of the policy specifies an approach for reducing water consumption through the installation of retrofits and efficiency upgrades (such as low-flow water fixtures, and irrigation sensors and timers), and reusing and recycling water wherever feasible.

(1) All intellectual property rights to this data belong exclusively to GRESB B.V. All rights reserved. GRESB B.V. has no liability to any person (including a natural person, corporate or unincorporated body) for any losses, damages, costs, expenses, or other liabilities suffered as a result of any use of or reliance on any of the information which may be attributed to it.

Highlight —

Leak Detection and Prevention at 262 Jarvis

262 Jarvis Street is a 71-unit, mid-rise multi-family residential apartment building. The art deco style building in downtown Toronto, constructed in 1929, was acquired in 2021 by Dream Impact, Dream Unlimited and Dream Impact Fund.

Water utility system inefficiencies contribute to water scarcity, reduced resource availability, and increased GHG emissions from energy use in water pumps. A 2021 RCCAO (Residential and Civil Construction Alliance of Ontario) study found that leaky pipes cost the average Ontario household nearly a third more on monthly water bills, with CBC reporting that this translates to Toronto losing water equivalent to 15,000 Olympic-sized pools annually.⁽¹⁾⁽²⁾

In 2023, an assessment carried out at 262 Jarvis revealed that the building had higher water consumption and water utility bill costs than a typical building in Dream Impact's portfolio. To address the high water consumption, Dream Impact installed a non-invasive, wireless water intelligence platform with sensors at the utility meter to identify these inefficiencies, and as a measure to safeguard major leaks. The platform identified unusually high water use in 8 suites at the building in June 2023, caused by leaky faucets, shower heads and toilets.

The leak detection system, along with the subsequent repairs cost Dream Impact less than \$5,000, and saved an estimated \$40,000 in annual water utility costs. As a result of the success of this project, Dream Impact is currently rolling this technology out to five additional buildings in 2024.

10,000+ m³

of water estimated to be saved per year

Part-time	6	1	5

271
employees⁽¹⁾

4 years
average tenure for Dream Impact Trust employees⁽¹⁾

For detailed information on Dream Impact's approach to Employee Development and Engagement, Diversity, Inclusion and Advancement, Health and Safety, and Volunteering and Giving, please refer to the shared **Social section** in the front of this report.

(1) Includes employees employed by Dream Asset Management Corporation, which includes DRM and MPCTJUN employees, and Canadian DRRJU employees. Does not include employees at recreational properties, employees on leaves of absence (e.g., permanent disability, long-term disability, parental leave), interns, and DRRJU employees of Pauls Corp.
 (2) Includes employees at all levels.
 (3) Includes Managers and above.
 (4) Includes Vice Presidents and above.
 (5) For the purposes of this report, Executives include: the Portfolio Manager and Chief Financial Officer of MPCTJUN.
 (6) Numbers represented as total headcount, not full-time equivalent.
 (7) Includes permanent part-time employees.
 (8) Includes all employees with a work schedule of 35 hours or greater.

Inclusive Communities

Dream Impact also supports the communities in which it operates through its partnerships, programming, and inclusivity commitments.

Social Procurement Strategy

Dream Impact, together with Dream Office and Dream Unlimited, released its Social Procurement Strategy in 2021, focusing on using its spending power on real estate activities to create economic benefits for diverse⁽¹⁾ vendors and local⁽²⁾, independent⁽³⁾ and/or socially responsible⁽⁴⁾ vendors, as well as employment opportunities for equity-seeking groups⁽⁵⁾.

In 2023, Dream Impact, in coordination with Dream Unlimited and Dream Office, continued to implement and improve the Social Procurement Strategy and exceeded the initial 2025 published targets for spending across categories that included major development projects (Dream LeBreton and Quayside), decarbonization retrofits in office and multi-family rental buildings, general operational spending, and partnerships through the Dream Community Foundation.

For detailed information on Dream’s Social Procurement Strategy, please refer to the [2023 Impact Report](#). ↗

(1) A Diverse Vendor is defined as a vendor who is at least 50% owned or managed by equity-seeking groups.
 (2) A Local Vendor is defined as a vendor with a billing address that falls within a defined geographic catchment radius to a given asset.
 (3) An Independent Vendor is defined as a vendor with demonstrable independent ownership.
 (4) A Socially Responsible Vendor is defined as a vendor that can provide evidence of a CSR/ESG report or equivalent, or third-party certification from groups such as EcoVadis, B-Corp or equivalent.
 (5) Dream’s definition of an Equity-Seeking Group is one or more of the following: Black, Indigenous, People of Colour (BIPOC), Women, New Canadians (Having immigrated within the last 10 years), Lesbian, Gay, Bisexual, Transgender, Queer (2SLGBTQIA+), Individuals with Disabilities or Accessibility needs and Indigenous Peoples.
 (6) The figures shown are derived from spending on vendors meeting aforementioned Social Procurement definitions on select DRM, MPCT:UN and D:UN assets, over total cumulative asset spending and excludes spending on vendors that are determined as exempt as defined by the Social Procurement Strategy.

Dream Impact tracks the diversity of vendors who are awarded contracts and implements actions that improve the ability for all vendors to compete for work. It also works with construction and property management teams to monitor and track the employment created through spending and implement actions that improve access to jobs and training for equity-seeking groups.

The following are the targets set in the Social Procurement Strategy:

2025 Targets	2023 Progress
20% of the annual value of all contracts awarded to businesses that are majority owned or managed by an equity-seeking group	Exceeded Target Awarded 25% or \$15.9 million ⁽⁶⁾
20% of the annual value of all contracts awarded to local, independent, and/or socially responsible businesses	Exceeded Target Awarded 80% or \$50.4 million ⁽⁶⁾
20% of annual jobs created through capital and operating spending filled by individuals from an equity-seeking group	In Progress launched pilot to track progress against target
30% of apprentice hours worked by individuals from an equity-seeking group	In Progress launched pilot to track progress against target

The following is a summary of progress made in 2023 as measured against the Implementing Actions established in the initial strategy:

Implementing Actions	2023 Progress
Seek external memberships to support the work	<div style="width: 100%; background-color: #28a745;">100%</div>
Support vendors	<div style="width: 15%; background-color: #ffc107;">15%</div>
Implement a monitoring and reporting system for tracking progress on published targets	<div style="width: 80%; background-color: #ffc107;">80%</div>
Create template language for updated bid and contract documents	<div style="width: 95%; background-color: #ffc107;">95%</div>
Establish a baseline of existing vendors	<div style="width: 80%; background-color: #ffc107;">80%</div>

Building Affordable and Attainable Housing

Providing affordable and attainable housing is one of Dream Impact’s three impact verticals. As such Dream Impact is dedicated to the development and integration of market and affordable units with a focus on investing in mixed-income communities that are transit oriented, located close to employment opportunities, and support an overall lower relative cost of living with a high quality of life. Dream Impact provides access to housing for people across all income levels and are proud to have built one of the largest affordable housing portfolios in Canada.

Quayside is one of the most exciting development projects in Canada, integrating multiple levels of government and ambitious sustainability and inclusivity targets. This 12-acre site at the east end of downtown Toronto’s waterfront is expected to be net zero GHG emissions master-planned community and will also include 3.5 acres of public forested green space, a significant urban farm, and one of Canada’s largest residential mass timber structures.

Before initiating the application process for a city-transforming project like this, Dream Unlimited, as Dream Impact’s asset manager and development partner on Quayside, engages with the public to incorporate community needs and minimize environmental impact. It collaborates with leading urban designers and master community planners to create attractive, community oriented, and environmentally sustainable concepts.

In 2023, stakeholder outreach efforts began to raise awareness and gather feedback on project details, including programming, land use, density, massing and site plan design, and landscape. Meetings were attended by staff from Waterfront Toronto, the City of Toronto, Quayside Impact Limited Partnership and their consultant team. Additionally, the City hosted two Community Consultation meetings in November.

Key tools like the project website and social media accounts were created to educate the public about the development, share updates, and engage them in future phases.

Governance Structures and Policies

Sustainability at Dream Impact is overseen and managed by Dream Unlimited, with whom Dream Impact co-invests on many of its projects. As part of the ESG Framework, Dream Impact links ESG considerations to executive goals and compensation. Sustainability, ESG and impact related matters are managed by the following:

Board, Committee or Team	Responsibilities ⁽¹⁾
Board of Trustees	<ul style="list-style-type: none"> The Dream Impact Board discharges such oversight together with the Board of directors of Dream Impact Master GP Inc., which delegates such oversight to its Governance, Compensation and Environmental Committee⁽²⁾
Governance, Compensation and Environmental Committee of Dream Impact Master GP Inc.	<ul style="list-style-type: none"> Oversee approach to environmental, social, governance and impact investing matters

Climate Change Risk

Climate change poses a significant risk for Dream Impact’s properties, employees, tenants and communities.

Dream Impact is proactively managing climate-related risks to meet its net zero commitment and protect against the shocks and stressors of climate change and the transition to a low-carbon economy. Climate change risk informs Dream Impact’s business strategy and decision-making by establishing the order of priority for making the capital and operational investments needed to future-proof assets.

The adjacent table provides a high-level summary of key physical and transition risks and their associated potential impacts on Dream Impact’s business. For details on how Dream Impact identifies, manages and mitigates climate risks, please refer to the shared [Climate Change Risk](#) section.

Type of Risk ⁽¹⁾	Identified Risks	Potential Impact	Mitigating Action
Physical, acute Short- to long-term time horizon	<ul style="list-style-type: none"> Natural disasters and increasingly frequent and severe weather conditions including wildfire, windstorms, tornadoes, hailstorms, lightning and earthquakes 	<ul style="list-style-type: none"> Could interrupt operations and activities, threaten tenant health and safety, damage properties and may decrease property values or require additional expenses to be incurred, including increased insurance costs 	Across all entities we use third-party climate data to assess property-level physical climate risks from the following hazards: <ul style="list-style-type: none"> Flooding Wildfire Earthquake Hailstorm Lightning Windstorm Tornado
	<ul style="list-style-type: none"> 50, 100, 200 and 500-year flood events 		
Physical, chronic Long-term time horizon	<ul style="list-style-type: none"> Temperature change Precipitation change Sea-level rise Air quality Water security/water stress 	<ul style="list-style-type: none"> Temperature change could increase cooling loads and costs Sea-level rise could alter geographies targeted for future investment Water security/water stress risk may impact approach to water management and capital expenditures on efficiency upgrades 	Property-level risk is assessed using third-party climate data against the listed chronic physical climate risks: <ul style="list-style-type: none"> Temperature change Air quality Precipitation change Water security/water stress Sea-level rise
Transition, policy and legal Short- to long-term time horizon	<ul style="list-style-type: none"> Greenhouse gas emissions reduction regulations 	<ul style="list-style-type: none"> Could impose constraints on operational flexibility or result in financial costs or fines to comply with various reforms 	<ul style="list-style-type: none"> GHG reduction targets and Dream Impact’s Net Zero Action Plan help mitigate transition risk by proactively reducing emissions ahead of potential future regulations and anticipating future changes in tenant preferences and market supply and demand.
Transition, market and reputation Long-term time horizon	<ul style="list-style-type: none"> Shift in supply and demand for products and services Changing tenant preferences Increased stakeholder expectations on climate-related risk 	<ul style="list-style-type: none"> Failure to adapt to climate change reforms could adversely affect reputation Costs to build net zero assets, or upgrade assets to net zero could increase May require increased internal resources to manage climate risk and produce climate disclosures 	<ul style="list-style-type: none"> The Risk Management and Sustainability and ESG teams continuously monitor exposure to transition risk associated with policy and legislative changes, market, and reputational shifts. Additionally, Dream Impact continues to strengthen alignment with TCFD recommendations.

⁽¹⁾ Short-term is used to describe risks with the highest likelihood and greatest severity between present and 2030. Long-term is used to describe risks with the highest likelihood and greatest severity after 2030.

Spotlight

Incorporating Climate Resiliency into Dream Impact’s Developments

In 2023, the Dream group established a working group which brings together various teams across the entities, including Dream Impact, to standardize an approach to climate risk adaptation and incorporate that approach into existing properties and developments.

Physical climate risks can impact developments by driving up operational costs, repair and maintenance costs and influencing tenant preferences in areas with exposure to certain types of climate perils.

Using a physical climate risk scenario analysis tool, the working group has aggregated asset type-specific climate risks and prioritized them on the basis of likelihood and severity. This information will be used to develop tactical methodologies for reducing the exposure of assets across the Dream Impact portfolio to climate perils identified to be relevant to each asset.

Dream Impact has a strong track record of building communities to last by identifying and preparing for physical climate risks. In Ottawa and Gatineau, while it is typical to design to withstand a 1-in-100-year flood risk, Zibi was designed to withstand a 1-in-1000-year flood risk due to the increased flood risk as a result of climate change. This helped Zibi avoid water damage during the two 100-year floods that occurred between 2016-2019.

In 2023, Dream Impact completed its third consecutive submission to the GRESB Real Estate Assessment (GRESB). GRESB is an industry-driven organization that is committed to assessing the ESG performance of real estate portfolios around the globe. Participation in GRESB provides Dream Impact with a globally recognized benchmark to evaluate the progression of its ESG strategy and targets, the recent results validate its accomplishments to date.

As Dream Impact is an impact investor, it intentionally purchases assets that are energy and GHG inefficient, have inefficient building systems and low data coverage. As a result, Dream Impact expects to see fluctuations in its Environmental indicators and Performance Component within its GRESB Score. Over time, Dream Impact intends to improve the environmental performance of its assets in alignment with its net zero by 2035 Action Plan, which will improve its GRESB score. At the corporate level, Dream Impact continues to stay consistent with its Impact verticals and perform at the highest level, as evidenced by its 100% score on Social Indicators (3 years in a row) and 95% score on Governance Indicators (2 years in a row).

The GRESB Real Estate Assessment participation increased in 2023 by 15% to include 2,084 listed and non-listed portfolios, a benchmark that covers US \$7.2 trillion of gross asset value (“GAV”) across 75 countries. The growth in participation serves as a clear indicator that the global investment community is considering ESG factors in investment decisions, values transparency and standardized reporting for real estate investments.

	2021	2022	2023	Max Score
GRESB Score	90	88	81	100
Management Score	27	29	30	30
Performance Score	63	58	51	70

Impact Methodologies and Standards

Operating Principles for Impact Management ↗

Acting in its capacity as Dream Impact’s asset manager, Dream Unlimited is a signatory to the Operating Principles for Impact Management (the Impact Principles). The Impact Principles provide a framework for investors to ensure that impact considerations are purposefully integrated throughout the investment life cycle and require signatories to undergo independent verification at regular intervals to ensure consistent application across their portfolios.

Global Impact Investing Network ↗

Dream Unlimited is a member of the Global Impact Investing Network (“GIIN”), acting in its capacity as the asset manager for Dream Impact. The GIIN is the leading non-profit dedicated to increasing the scale and effectiveness of impact investing. Impact investments are made into companies, organizations, and funds with the intention to generate social and environmental impact alongside a financial return. Impact investments can be made in both emerging and developed markets and target a range of returns from below market to market rate, depending upon the circumstances. As the asset manager of Dream Impact, Dream Unlimited’s membership signifies its commitment to deepening its engagement in the impact investing industry.

Forward-looking Plans

Maple House at Canary Landing
Toronto, ON

Environmental

- **Continue** to implement GHG emissions reductions and energy efficiency improvements across the portfolio and pilot retrofit projects to meet 2025 targets
- **Scale up** the development of asset level net zero roadmaps for properties using in-house engineering tools
- **Continue** to strategize how to most efficiently decarbonize the portfolio
- **Develop** embodied carbon reduction strategies for each construction project in the pipeline
- **Continue** to develop and enhance the internal skills and competencies related to net zero and decarbonization strategies
- **Continue** to improve the accuracy of GHG projections and data collection for Scope 3 emissions and increase GHG emissions data coverage boundary to more assets as appropriate
- **Analyze** business opportunities and options for procurement of renewable energy technologies
- **Target** green building certification, such as FRPO Certified Rental Building, for at least 5 multi-family buildings in 2024
- **Re-certify** office portfolio with WELL Health and Safety Rating in 2024
- **Expand** leak detection program to five additional buildings in 2024

Quayside Engagement Pop-up
Toronto, ON

Social

- **Continue** developing 672 affordable housing units that are expected to be completed between 2024 and 2027
- **Engage** with more vendors on, build internal knowledge of and generate more external awareness of Social Procurement Strategy
- **Expand** inclusive community programming across Canadian multi-family assets in partnership with the Dream Community Foundation
- **Continue** to engage with office tenants on their net zero goals and sustainability goals
- **Conduct** tenant satisfaction survey

30 Adelaide St. E
Toronto, ON

Governance

- **Evaluate** and plan for compliance with future sustainability regulatory reporting requirements such as the International Financial Reporting Standards (“IFRS”) S1 and S2 standards
- **Continue** reporting to PRI and NZAM
- **Evaluate** impact and opportunities of aligning with the recommendations of the Task Force on Nature-related Financial Disclosures (“TNFD”) on Dream Impact’s portfolio
- **Develop** a plan to systematically assess climate change risk based on the short- and long-term risks and opportunities identified in scenario analysis
- **Expand** the scope of the climate resiliency working group to more assets, risk types and regions

ESG Scorecard⁽¹⁾⁽²⁾

Energy and GHG emissions intensities have decreased year-over-year by 8% individually, due to the completion of energy efficiency projects in previous years and continuous improvement in property operations.

Water intensity, however, increased year-over-year by 8% due to increased office occupancy and restaurant activity at some of the properties in the Dream Office portfolio.

Reduced energy consumption, GHG emissions, and water consumption in 2020 and 2021 can be attributed to COVID-related occupancy reductions. Dream Office's previous absolute energy and water targets have been replaced with intensity based targets to align with industry best practice and the reporting practice for the other Dream entities.

In addition, the waste diversion rate, at 32% in 2023, continued to be challenging to improve and meet the target. Dream Office intends to continue working on a strategy to improve its waste diversion rates at its office assets as described in the [Waste Management section](#).

Environmental

Approach

Prioritizing efficient and comfortable buildings has always been a part of Dream Office’s core values and connects to the Dream group’s mission to Build Better Communities.

Dream Office’s extensive experience as a property manager and building operator gives it a competitive advantage in executing impactful capital planning initiatives that improve both the environmental footprint and the tenant experience in its buildings as well as protects asset value.

Sustainability at Dream Office is guided by policies that cover activities across the value chain:

- **Property management and operations** - Environmental Policy, Guide to Sustainable Building Operations and Environmental Management Handbook
- **Suppliers and Contractors** - Supplier Code of Conduct
- **Tenants** - Green Leases, Tenant Sustainability Handbook and Occupant Environmental Communication Program

Building Certifications

Green building certifications provide guidelines for the design, construction and operation of sustainable buildings, and help Dream Office incorporate features that are energy-efficient, environmentally friendly, and healthy for occupants. According to the Canada Green Building Council (“CaGBC”), green-certified buildings have lower operational expenses, leading to premium rents, better occupancy rates for commercial owners, and lower utility costs for tenants.

Dream Office Portfolio Certification by Type and Level⁽¹⁾

97% of Dream Office’s Canadian properties over 100,000 sf are certified by BOMA BEST with operating standards requiring ongoing management of energy, water, and waste. Additionally, Dream Office is raising the bar and challenging its property managers to achieve a BOMA BEST Gold Certification standard across the portfolio moving forward.

⁽¹⁾ The chart is based on GLA of assets as at December 31, 2023, including all operational Canadian properties at 100% of GLA.

~15%

estimated energy savings at Victory Building in 2023 vs 2019 baseline, in part due to smart building pilot program

Dream Office strives to be at the cusp of the intersection of technology and real estate, offering superior office spaces and a best-in-class tenant experience.

The BOMA BEST Smart Buildings certification serves as an industry benchmark to define how building owners and managers can leverage technology in their assets and drive sustainability. Dream Office is proud to be one of the founding pilot project members of BOMA BEST's Smart Buildings certification and to have also achieved SmartScore Gold certification at the Victory Building.

WiredScore's SmartScore certification helps landlords and developers build cutting-edge smart buildings that deliver exceptional user experiences, drive cost efficiency, meet high standards of sustainability, and are future ready.

Dream Office's smart building program focuses on the following technologies and use cases:

- **Smart Lighting** combines occupancy and daylight sensors to automatically dim lights in response to natural light levels.
- **Indoor Air Quality ("IAQ") Monitoring** ensures that tenants are provided with spaces that are healthy and flags issues to be addressed when contaminants of concern are identified.
- **Tenant Experience App** elevates how tenants interact with their building, communicate with property staff, and access amenities.

- **Leak Detection** sensors identify leaks and automatically shut off valves to prevent water damage in tenant spaces. This avoids tenant disruption, insurance claims and costly utility bills. Over time, this can also reduce insurance premiums.
- Utilizing **advanced HVAC control optimization and fault detection and diagnosis** allows for efficient energy use and quickly identifying and resolving faults in equipment.
- **Metering** tenant and key equipment loads provides visibility to operations teams and tenants on energy consumption that allows for data driven decisions.
- **Occupancy sensing** tracks the number of people entering the property, providing improved visibility into how and when the building is used.
- **Cybersecurity and Connectivity** is provided by a base building network to help ensure secure and monitored connectivity.
- **Guest Wi-Fi** is provided in public areas to improve visitor experience.

In 2023, Dream Office launched its second smart building pilot project at 6 Adelaide St E., Toronto, leveraging lessons learned from the inaugural pilot project at the Victory Building. As Dream Office's centralized expertise and capabilities grow, these smart building technologies can be cost-effectively scaled across the portfolio where there is tenant interest, operational cost savings to be realized and asset value to be created.

(1) Based on an internal review performed on Dream Office's claims history over the last 5 years.

Net Zero Action Plan

Dream Office has committed to be net zero by 2035 for operations and new developments, including Scope 1, Scope 2 and select Scope 3 emissions.

Retrofitting existing assets to be more energy efficient is an important component of Dream Office’s net zero action plan. Dream Office has a strong track record of implementing energy efficiency measures in existing buildings that not only reduce emissions but also reduce operating costs and improve financial performance.

In 2023, Dream Office made progress by developing asset-level net zero roadmaps for 5 more assets in its portfolio, integrating net zero thinking into the development of capital plans, enhancing energy management practices, and improving data collection.

As a benefit of being a first mover, Dream Office is focused on partnering with governments and participating in programs that offer financial incentives to encourage and support the capital investments needed to accelerate decarbonization of the building sector.

For more information on Dream Office’s net zero commitments, please refer to the [Net Zero by 2035 Action Plan](#).

82%

of Dream Office’s assets are targeting net zero GHG emissions by 2035⁽¹⁾

~30%

of Dream Office’s tenants have public commitments on GHG emissions reduction targets, including net zero ambitions⁽²⁾

“

An increasing number of office tenants are focused on leasing buildings that align with their net zero targets and we are helping to meet that demand. We continue to see a positive response to our net zero commitments and ESG track record, providing us with the opportunity to attract more tenants and secure lease commitments in this highly competitive market.

Championing Energy Efficiency Retrofits with Canada Infrastructure Bank Funding

Dream Office is taking concrete steps to achieve its ambitious net zero by 2035 targets.

In 2023, Dream Office completed 24 energy efficiency projects across its portfolio. With CIB financing, Dream Office has 13 IREE certified projects underway, targeting 40% GHG emission reductions across these buildings by end of Q1 2027. This makes Dream Office the largest portfolio of IREE certified projects in Canada. Dream Office has already drawn \$20.5 million⁽¹⁾ in total from CIB, which provides low-cost fixed-rate financing that will be repaid over a 20-year term.

Dream Office is a proven leader in building decarbonization and doing so with financial discipline.

366 Bay Street was the first retrofit project financed by the CIB and one of the first projects in Canada to achieve the IREE certification. The building is part of Dream Office's sustainable redevelopment program, which leverages in-house expertise to re-use as much of the existing buildings as possible, instead of demolishing carbon intensive materials, and lower the overall embodied carbon of the redevelopment. Dream Office has secured a commitment for a lease for the entire building with a global financial institution attracted by the asset's location, modernization, and lower carbon footprint.

The IREE certification is a third-party certification offered through the CaGBC to help guide and verify retrofit projects. IREE recognizes retrofit projects that adhere to industry best practices and standards for creating baseline energy usage, savings calculations, commissioning, operations, and maintenance, as well as measurement and verification. The certification signals to investors that retrofit projects were developed by qualified professionals and meet the requirements of the Investor Confidence Project protocols.

67 Richmond Street West
Toronto, ON

Highlight

67 Richmond St. W AeroBarrier Project

As part of the CIB deep retrofit project at 67 Richmond Street West, Toronto, Dream Office engaged AeroBarrier to improve the building envelope and air tightness, reducing the installed HVAC system sizing by approximately 20%.

Net Zero Roadmap for Victory Building⁽¹⁾

The Victory Building, a historical and architectural gem at 80 Richmond Street West in the Toronto financial district, combines old-world design and modern conveniences. Completed in 1937 and standing at 21 storeys, the Victory Building was the first office tower in Canada to be completely air conditioned, courtesy of General Electric.

Using the CIB credit facility and in alignment with the Net Zero by 2035 Action Plan, Dream Office has developed a property-level net zero GHG emissions roadmap and started executing a multi-year capital plan that decarbonizes the 88 year-old building, repositions it to attract tenants and competes with modern downtown office buildings.

At the start of this redevelopment, Dream Office engaged a leading sustainability engineering firm to conduct an in-depth GHG audit, create a calibrated energy model, and produce a comprehensive ASHRAE Level 2 energy audit in alignment with its Net Zero Action Plan. The sustainability engineering firm worked closely with Dream Office’s mechanical and electrical consultants to optimize a retrofit plan that created operational improvements while controlling for costs and construction risk.

Post-Retrofit Systems:

- R-30 roof insulation
- LEDs and smart lighting system
- 4-pipe hydronic fan coils spread over 6-8 zones per floor
- Energy recovery ventilator (“ERV”) for fresh air
- Variable frequency drives (“VFDs”) on pumps
- Centralized heat pumps for heating and cooling
- Smart building technologies

Typically, this scale of retrofit requires a vacant building for construction. However, Dream Office was able to develop a cost-effective, multi-year retrofit plan that allows existing tenants to continue using their spaces without disruption.

Toronto, ON

Environmental Management

Dream Office uses a third-party platform as an Environmental Management System (“EMS”) to manage and improve portfolio environmental performance. The platform benchmarks low and high performers within the portfolio, and then through adopting more efficient operating practices, Dream Office effectively manages the financial and environmental performance of its assets. It also supports Dream Office in meeting its overall sustainability goals and net zero emission reduction targets. The platform covers a wide range of environmental topics including, but not limited to, energy, water, waste, GHG emissions and risk management.

The platform’s EMS is aligned with the four stages of ISO 14001 EMS standards as indicated in the steps of the Plan-Do-Check-Act model and was in use by Dream Office throughout the 2023 reporting period.

The four stages of the third-party platform’s EMS include:

Plan

Set environmental objectives to comply with legal and environmental sustainability certifications (ENERGY STAR, LEED, city benchmarking requirements).

Do

Provide consulting services on energy efficiency, sustainability, ENERGY STAR, GRESB and Green Certifications for the Dream Office’s environmental goals.

Check

Establish and monitor programs to meet environmental objectives.

Act

Evaluate performance against targets.

438 University Ave.
Toronto, ON

Resource Management

Energy Management

Dream Office achieves energy efficiency and conservation through capital investments in technological and operational improvements, process changes and working with tenants to influence occupant behaviour. In addition, Dream Office has a comprehensive energy and water tracking process that includes real-time data monitoring, utility bill reviews with data analytics and working with its property managers to help ensure required improvements and upgrades are completed in a timely manner.

Where monitoring systems are in place, data insights are regularly reviewed by Dream Office’s in-house energy managers. When appropriate, the energy managers will provide the building operations team with a snapshot of energy and water usage versus the previous year, as well as identify trends, explain drivers, and flag concerns. This information assists Dream Office’s team in improving building performance by pinpointing demand spikes, identifying atypical consumption, and troubleshooting efficiency challenges more easily.

Case Study

IESO Energy Manager of the Year

In 2023, Sumit Khatri and Tugrul Kodaz, Senior Energy Managers at Dream Office, received the Energy Manager of the Year award from Ontario's IESO Save on Energy program.

The Save on Energy program has been awarding these industry leading awards since 2017 to recognize Ontario's most creative and forward-thinking energy managers championing energy efficiency at their organizations. As part of the Technical Services team at Dream Office, the energy managers work closely with property managers and building operators to identify opportunities to drive energy efficiency and implement projects that generate energy, water, waste and GHG savings and improve tenant comfort across Dream Office's portfolio.

A project focusing on HVAC, lighting system optimization, and other GHG reduction strategies at 50 and 90 Burnhamthorpe Road West in Mississauga, and at Adelaide Place in Toronto, resulted in electricity reductions of 23%, 11% and 12%, respectively, in 2022, yielding over \$514,000 in cost savings.

Other projects that are being overseen by the energy managers include piloting smart building technologies like smart LED lighting and new building automation systems, as well as real-time metering upgrades to identify operational energy and water efficiency opportunities.

Dream Office is proud to be recognized for its energy management efforts which directly support its Net Zero by 2035 Action Plan and generating utility cost savings.

Certificates of Achievement in Energy Efficiency

Certificates were given to 67 Richmond Street West and 80 Richmond Street West, both in Toronto, by Enbridge Gas for performing a steam trap audit and replacement program, which will save an estimated 64 tCO₂e annually.

Water Management

Dream Office aims to minimize its use of potable water and decrease water consumption where possible through fixture retrofits and efficiency upgrades. Water management plans at each building provide a framework for identifying water conservation measures, developing implementation plans and setting building targets. In addition, Dream Office benchmarks water consumption per sf to identify areas of high consumption and conducts water audits to identify opportunities for conservation.

Waste Management

As part of its ongoing commitment to waste management, Dream Office continues to make efforts to improve its waste management practices. This includes working to increase waste diversion by cooperating with tenants to help ensure they have the tools to meet common objectives.

In 2023, for the Toronto & GTA properties, Dream Office engaged new waste haulers with better alignment to its goals who will play a vital role in improving waste management practices at these sites.

Dream Office looks to improve sorting practices at all levels as well as to reduce the amount of landfill waste produced. To achieve this, it implemented a pilot to assess the feasibility and benefits of a centralized waste system. Centralized waste is the use of strategically placed sorting stations throughout the office instead of individual waste and recycling bins at each desk. The key environmental benefits include reducing cross-stream contamination, therefore decreasing the volume of waste directed to landfills, in addition to reducing the number of plastic liners used by eliminating desk-side bins, which reduces the amount of landfill produced.

This initial roll-out resulted in an average increase in diversion rate by 12.8% across the participating floors and provided insight into the areas needed to be addressed during further roll-outs. In 2024, Dream Office aims to take the key learnings from the pilot project and further implement the centralized waste program into tenant spaces, continuing this roll-out across the portfolio.

Social

Strong and Diverse Workforce

Dream Office's strength as an organization comes from its strong and diverse workforce. Dream Office's employees possess expertise in a wide variety of areas that benefit its business, from real estate management and development to capital markets, risk, and insurance. The people come from a wide range of backgrounds and experiences, bringing many valuable skills and perspectives to the Dream Office team.

average tenure for Dream Office REIT employees⁽⁹⁾

For detailed information on the Dream Impact' approach to Employee Development and Engagement, Diversity, Inclusion and advancement, Health and Safety, and Volunteering and Giving please refer to the shared [Social section](#) at the front of this report.

(1) Includes employees employed by Dream Asset Management Corporation, which includes DRM and MPCTJUN employees, and Canadian DRRJU employees. Does not include employees at recreational properties, employees on leaves of absence (e.g., permanent disability, long-term disability, parental leave), interns, and DRRJU employees of Pauls Corp.
 (2) Includes employees at all levels.
 (3) Includes Managers and above.
 (4) Includes Vice Presidents and above.
 (5) For the purposes of this report, Executives include: the Chief Executive Officer, Chief Financial Officer, and Chief Operating Officer of D.JUN.
 (6) Numbers represented as total headcount, not full-time equivalent.
 (7) Includes permanent part-time employees.
 (8) Includes all employees with a work schedule of 35 hours or greater.
 (9) Includes only employees 100% dedicated to D.JUN and shared services functions for the Dream entities. Excludes employees on unpaid leaves of absence (e.g., permanent disability, long-term disability, parental leave) and interns.

Social Procurement Strategy⁽¹⁾

Dream Office, together with Dream Unlimited and Dream Impact, released its Social Procurement Strategy in 2021, focusing on using its spending power on real estate activities to create economic benefits for diverse⁽²⁾ vendors and local⁽³⁾, independent⁽⁴⁾ and/or socially responsible⁽⁵⁾ (LISR) Vendors, as well as employment opportunities for equity-seeking⁽⁶⁾ groups.

In 2023, Dream Office, in coordination with Dream Unlimited and Dream Impact, continued to implement and improve the Social Procurement Strategy and made progress on the initial 2025 published targets.

For detailed information on Dream’s Social Procurement Strategy, please refer to the [2023 Impact Report](#) ↗

⁽¹⁾ The figures shown are derived from spending on vendors meeting aforementioned Social Procurement definitions on select DRM, MPCTJUN and DJUN assets, over total cumulative asset spending and excludes spending on vendors that are determined as exempt as defined by the Social Procurement Strategy.

⁽²⁾ A Diverse Vendor is defined as a vendor who is at least 50% owned or managed by equity-seeking groups.

⁽³⁾ A Local Vendor is defined as a vendor with a billing address that falls within a defined geographic catchment radius to a given asset.

⁽⁴⁾ An Independent Vendor is defined as a vendor with demonstrable independent ownership.

⁽⁵⁾ A Socially Responsible Vendor is defined as a vendor that can provide evidence of a CSR/ESG report or equivalent, or third-party certification from groups such as EcoVadis, B-Corp or equivalent.

⁽⁶⁾ Dream’s definition of an Equity-Seeking Group is one or more of the following: Black, Indigenous, People of Colour (BIPOC), Women, New Canadians (Having immigrated within the last 10 years), Lesbian, Gay, Bisexual, Transgender, Queer (2SLGBTQIA+), Individuals with Disabilities or Accessibility needs and Indigenous Peoples.

Dream Office tracks the diversity of vendors who are awarded contracts and implements actions that improve the ability for all vendors to compete for work. It also works with construction and property management teams to monitor and track the employment created through spending and implement actions that improve access to jobs and training for equity-seeking groups.

The following are the targets set in the Social Procurement Strategy:

2025 Targets	2023 Progress
20% of the annual value of all contracts awarded to businesses that are majority owned or managed by an equity-seeking group	Exceeded Target Awarded 25% or \$15.9 million ⁽¹⁾
20% of the annual value of all contracts awarded to local, independent, and/or socially responsible businesses	Exceeded Target Awarded 80% or \$50.4 million ⁽¹⁾
20% of annual jobs created through capital and operating spending filled by individuals from an equity-seeking group	In Progress Launched pilot to track progress against target
30% of apprentice hours worked by individuals from an equity-seeking group	In Progress Launched pilot to track progress against target

The following is a summary of progress made in 2023 as measured against the Implementing Actions established in the initial strategy:

Implementing Actions	2023 Progress
Seek external memberships to support the work	100%
Support vendors	15%
Implement a monitoring and reporting system for tracking progress on published targets	80%
Create template language for updated bid and contract documents	95%
Establish a baseline of existing vendors	80%

Spotlight

Green Lease Leaders

After being the only Canadian company to achieve the Green Lease Leaders Platinum Landlord award in 2022, Dream Office continued its leadership by once again receiving the award in 2023. This achievement was announced at the Better Buildings, Better Planets Summit, hosted by the Institute for Market Transformation and the U.S. Department of Energy's Better Buildings Alliance.

Through ambitious net zero commitments, GHG emissions reduction targets, and sustainability goals, as well as the uses of its green leases, Dream Office strives to increase the positive environmental, social, and financial outcomes for its tenants and key stakeholders. This Platinum Level recognition reflects a proactive approach towards achieving net zero by 2035 by engaging with tenants across several environmental and social focus areas.

“

Dream Office's sustainability and ESG leadership helped get a whole building lease across the door with a multi-national tenant. It played a meaningful role in both the site selection and the financial underwriting. As leasing agents, it definitely makes our lives easier with tenants when we bring a building and landlord forward with a robust sustainability track record. Dream has created a benchmark for all other landlords in Canada and we found their significant investments in creating a Green Lease to be well aligned with what our tenant was looking for. I can say without a doubt that Dream's early and progressive leadership in this area helped close this deal.

”

Daniel Hunt

Founding Partner, Lennard Commercial Realty

36 Toronto St.
Toronto, ON

Governance Structures and Policies

As part of the ESG Framework, Dream Office links ESG considerations to executive goals and compensation. Sustainability, ESG and impact investing matters at Dream Office are managed by the following:

Board, Committee or Team	Responsibilities ⁽¹⁾
Board of Trustees	<ul style="list-style-type: none"> The Dream Office board has delegated such oversight to the Governance, Environmental and Nominating Committee
Governance, Environmental and Nominating Committee	<ul style="list-style-type: none"> Oversees approach to environmental, social, governance and impact investing matters
Chief Executive Officer	<ul style="list-style-type: none"> Highest-level executive with oversight over ESG and impact matters, including sustainability and climate change, at Dream Office Works with the Chief Financial Officer and Chief Operating Officer to provide leadership over the sustainability strategy and oversee adoption of the ESG Framework
ESG Executive Committee (Members of the executive leadership team from each Dream entity)	<ul style="list-style-type: none"> Receives regular updates from the Sustainability and ESG team on behalf of all departments and the sustainability working groups Adopts ESG Framework for Dream Office Communicates sustainability strategy and commitment across the company and to key external stakeholders Delegates implementations to Dream Office’s Sustainability and ESG team Reports to the Governance, Environmental and Nominating Committee
Sustainability and ESG Team	<ul style="list-style-type: none"> Embeds sustainability strategies and commitments across the company and with key external stakeholders Oversees the implementation of the ESG Framework for each Dream entity Manages portfolio sustainability initiatives including building certifications, energy, water and waste management and monitoring, as well as strategic initiatives Meets quarterly with the ESG Executive Committee
Investment Committee	<ul style="list-style-type: none"> Reviews each investment’s Acquisition Checklist and approves investments that meet both financial and impact goals Holds the project team accountable to achieve goals and create impact
Sustainability Working Groups	<ul style="list-style-type: none"> Responsible for advancing sustainability initiatives and activities at company and property level Includes three working groups covering the following focus areas: Green Property Operations, Employee Engagement, Tenant Engagement Includes representatives from central functions, regions, and properties Each group reports regularly to the Sustainability and ESG team

Climate Change Risk

Climate change poses a significant risk for Dream Office’s properties, employees, tenants and communities.

Dream Office is proactively managing climate-related risks to meet its net zero commitment and protect against the shocks and stressors of climate change and the transition to a low-carbon economy. Climate change risk informs its business strategy and decision-making by establishing the order of priority for making the capital and operational investments needed to future-proof assets.

The adjacent table provides a high-level summary of key physical and transition risks and their associated potential impacts on Dream Office’s business. For detailed information on how Dream Office identifies, manages and mitigates climate risks, please refer to the shared [Climate Change Risk](#) section.

Type of Risk ⁽¹⁾	Identified Risks	Potential Impact	Mitigating Action
Physical, acute Short- to long-term time horizon	<ul style="list-style-type: none"> Natural disasters and increasingly frequent and severe weather conditions including wildfire, windstorms, tornadoes, hailstorms, lightning and earthquake 	<ul style="list-style-type: none"> Could interrupt operations and activities, threaten tenant health and safety, damage properties and may decrease property values or require additional expenses to be incurred, including increased insurance costs 	Dream Office uses third-party climate data to assess property-level physical climate risks from the following hazards: <ul style="list-style-type: none"> Flooding Wildfire Earthquake Hailstorm Lightning Windstorm Tornado
	<ul style="list-style-type: none"> 50, 100, 200 and 500-year flood events 		
Physical, chronic Long-term time horizon	<ul style="list-style-type: none"> Temperature change Precipitation change Sea-level rise Air quality Water security/water stress 	<ul style="list-style-type: none"> Temperature change could increase cooling loads and costs Sea-level rise could alter geographies targeted for future investment Water security/water stress risk may impact approach to water management and capital expenditures on efficiency upgrades 	Property-level risk is assessed using third-party climate data against the listed chronic physical climate risks: <ul style="list-style-type: none"> Temperature change Air quality Precipitation change Water security/water stress Sea-level rise
Transition, policy and legal Short- to long-term time horizon	<ul style="list-style-type: none"> Greenhouse gas emissions reduction regulations 	<ul style="list-style-type: none"> Could impose constraints on operational flexibility or result in financial costs or fines to comply with various reforms 	<ul style="list-style-type: none"> Dream Office’s GHG emissions reduction targets and net zero action plan help mitigate transition risk by proactively reducing emissions ahead of potential future regulations and anticipated future changes in tenant preferences and market supply and demand.
Transition, market and reputation Long-term time horizon	<ul style="list-style-type: none"> Shift in supply and demand for products and services Changing tenant preferences Increased stakeholder expectations on climate-related risk 	<ul style="list-style-type: none"> Failure to adapt to climate change reforms could adversely affect our reputation Costs to build net zero assets, or upgrade assets to net zero could increase May require increased internal resources to manage climate risk and produce climate disclosures 	<ul style="list-style-type: none"> The Risk Management and Sustainability and ESG teams continuously monitor the exposure to transition risk associated with policy and legislative changes, market, and reputational shifts. Additionally, Dream Office continues to strengthen alignment with the Task Force on Climate-related Financial Disclosures (“TCFD”) recommendations and climate disclosure regulations.

⁽¹⁾ Short-term is used to describe risks with the highest likelihood and greatest severity between present and 2030. Long-term is used to describe risks with the highest likelihood and greatest severity after 2030.

Spotlight

Incorporating Climate Resiliency into Operations

Physical climate risks can impact operations and property management by driving up repair and maintenance costs, insurance costs, and disrupting business continuity. As a result, Dream Office annually uses the physical climate risk analysis tool to identify risks and incorporate adaptation strategies into capital plans and property operations.

In 2023, the Dream group established a resiliency working group, bringing together various teams to work across the entities, including Dream Office, to share knowledge and expertise and to standardize an approach to climate risk adaptation and incorporate it into the property-specific capital planning process and building operations.

Using a physical climate risk scenario analysis tool, the working group has aggregated asset type-specific climate risks and prioritized them on the basis of likelihood and severity. In 2023, the working group focused on developing tactical methodologies for reducing the exposure of assets across the Dream Office portfolio in Toronto to relevant climate perils.

In 2024 and beyond, the resiliency working group will work towards creating additional tailored adaptation strategies for other regions.

GRESB is an independent organization that validates ESG performance data. It is the global standard for ESG benchmarking and reporting for listed property companies, private property funds, developers and investors that invest directly in real estate.

In 2023, Dream Office completed its third consecutive submission to the GRESB Real Estate Assessment and received a 4 Star Rating. GRESB is an industry-driven organization that is committed to assessing the ESG performance of real estate portfolios around the globe. Participation in the GRESB Real Estate Assessment provides Dream Office with a globally recognized benchmark to evaluate the progression of its ESG strategy and targets, and the recent results validate its accomplishments to date.

Dream Office received its third consecutive Green Star in 2023, and scored full points in the Leadership, Policies, Reporting, Targets, and Data Monitoring & Review aspects.

	2021	2022	2023	Max Score
GRESB Score	91	92	87	100
Management Score	27	29	30	30
Performance Score	63	63	58	70

The GRESB Real Estate Assessment participation increased in 2023 by 15% to include 2,084 listed and non-listed portfolios generating a benchmark that covers U.S. \$7.2 trillion of gross asset value across 75 countries. The growth in participation serves as a clear indicator that the global investment community is considering ESG factors in its investment decisions and values transparency and standardized reporting from its real estate investments.

Forward-looking Plans

36 Toronto St.
Toronto, ON

Environmental

- **Continue** to implement GHG emissions reductions and energy efficiency improvements across the portfolio and pilot retrofit projects to meet 2025 targets
- **Scale** up the development of asset level net zero roadmaps for more properties using in-house engineering tools
- **Continue** strategizing the most efficient approach to decarbonize the portfolio
- **Continue** to develop and enhance the internal skills and competencies related to net zero and decarbonization strategies
- **Continue** to improve the accuracy of GHG projections and data collection for Scope 3 emissions
- **Support** tenants to reduce their Scope 3 emissions by assessing opportunities to install EV chargers
- **Re-certify** office portfolio with WELL Health and Safety Rating in 2024
- **Continue** striving for BOMA BEST Gold on building recertifications

Construction at 67 Richmond St. W
Toronto, ON

Social

- **Engage** with more vendors on, build internal knowledge of and generate more external awareness of Social Procurement Strategy
- **Establish** tenant sustainability working group to improve environmental performance at a minimum of one building
- **Continue** to engage with tenants on their net zero goals and sustainability goals
- **Achieve** 100% reach out in tenant satisfaction survey

Ontario's IESO Save on Energy program
Toronto, ON

Governance

- **Evaluate** and plan for compliance with future sustainability regulatory reporting requirements such as the International Financial Reporting Standards ("IFRS") S1 and S2 standards
- **Continue** reporting to PRI and NZAM
- **Evaluate** the impact and opportunities of aligning with the recommendations of the Task Force on Nature-related Financial Disclosures ("TNFD") on Dream Office's portfolio
- **Develop** a plan to systematically assess climate change risk based on the short- and long-term risks and opportunities identified in scenario analysis
- **Expand** the scope of the climate resiliency working group to more assets, risk types and regions

Dream Industrial REIT

About Dream Industrial REIT⁽¹⁾

Dream Industrial Real Estate Investment Trust (TSX: DIR.UN) (“Dream Industrial”, or “DIR.UN”) owns, manages and operates a global portfolio of well-located, diversified industrial properties comprising 327 assets totaling approximately 71.4 million square feet (“sf”) of high quality distribution and urban logistics assets in key markets across Canada, Europe, and the United States.

Dream Industrial’s goal is to deliver strong total returns to its unitholders through secure distributions as well as growth in net asset value and cash flow per unit, underpinned by its high-quality portfolio and an investment grade balance sheet.

ESG Scorecard⁽¹⁾

Dream Industrial's portfolio undergoes changes every year that cause significant year-to-year variances in environmental data, including energy consumption, GHG emissions and water consumption. For absolute and intensity data values, the variances can be caused by acquisitions, dispositions, redevelopments, tenant vacancies, change in tenant user types (e.g. from more emissions intensive to less emissions intensive tenant businesses), change in grid emission factors, change in approach to determine operational control at a utility meter level and other factors. Across 300+ assets, these factors cause significant fluctuations impacting comparability across periods.

Dream Industrial is committed to continuing to increase data coverage, improve data quality and work towards meeting its net zero goals.

In 2023, Dream Industrial is proud to have increased landlord-controlled energy data coverage in Canada and Europe to 99% and 87%, respectively, installed over 3.7 MW of renewable power to decarbonize its portfolio and retrofitted over 1.2 million sf of properties with LED lighting to reduce energy consumption. Collectively, these actions represent significant year-over-year sustainability progress.

✓ Externally assured; please refer to note in the [About this Report](#) section

(1) Excludes co-owned properties in the US Portfolio and Dream Summit JV. Please refer to Supplemental Disclosures for more detail including data coverage, regional breakdown, sources of emission factors and breakdown of Scopes of emissions.
 (2) Dashed lines represent data that was not tracked during the noted time period. Dashed lines are shown for illustrative purposes only and do not represent any correlation with any other consumption or intensity values shown on same chart.
 (3) The 2023 data is collected from utility meters under Dream's operational control as at December 31, 2023 across the portfolio. Please refer to Supplemental Disclosures for more details.
 (4) Commencing 2023, the data coverage is expanded to European portfolio (including Netherlands).
 (5) The comparison is done on absolute data and not like-for-like data. Due to changes in portfolio size, data coverage and change of control over the utility meters, the comparison is not an explicit result of efficiency measures.
 (6) The 2021 data coverage is significantly lower than other years, hence, the value is not used for representation in the chart but is available in Supplemental Disclosures.
 (7) Data is collected from 46 buildings in Calgary, Alberta.

Environmental

Approach

Dream Industrial aspires to be a market leader in sustainability.

Dream Industrial has a responsibility to manage and mitigate its overall impact on the environment, and recognizes that investing in sustainability is a key driver of creating long-term value for its stakeholders. Dream Industrial’s approach to sustainability is to enhance asset value and lower operational costs by incorporating energy management initiatives into capital expenditures and to pursue opportunities to future-proof its assets against the impacts of climate change.

In 2023, Dream Industrial continued to implement its ESG action plan and increased the resiliency of its assets to the physical and transition impacts of climate change through numerous initiatives including investing in solar energy, developing net zero roadmaps, pursuing green building certifications, building EV infrastructure, and investing in and engaging with tenants on energy management. Sustainability initiatives mitigate climate change and manage transition risks, reduce resource intensity, increase building efficiency, and help to reduce costs for tenants.

(2) Includes EV chargers owned or installed by tenants.

Environmental

Building Certifications

Green building certifications help Dream Industrial incorporate a range of sustainable features into its global portfolio of properties and provide tenants, investors and lenders with credible proof points of the value of sustainability features in buildings.

In 2023, Dream Industrial made significant progress on its commitment to increase the number of green building certifications in the portfolio and executed on its commitment to obtain green building certification for all new developments including:

- **LEED Silver Certification** on a 154,000 sf new development in Caledon, Ontario
- **The German Sustainable Building Council (“DGNB”) Gold Certification** on a 241,000 sf expansion in Dresden, Germany
- **LEED Silver Certification** on a 43,000 sf expansion in Richmond Hill, Ontario

Highlight

Target Achieved 2 Years in Advance

In 2023, Dream Industrial achieved and exceeded its 2025 target to obtain green building certifications for an additional 2.7 million sf (includes LEED, BREEAM, ZCB, BOMA or DGNB) vs. the 2020 baseline.

3.6 million sf

of green building certifications were completed in 2023, an increase of 123% in GLA over 2022⁽¹⁾

2 million sf

of green building certifications are underway (for 8 properties), including properties under development

Net Zero Action Plan

Dream Industrial has committed to be net zero on Scope 1 and Scope 2 emissions by 2035 and select Scope 3 emissions by 2050.

In 2023, Dream Industrial advanced its net zero commitments by continuing to develop asset-level net zero roadmaps and creating data estimation and capital planning tools to efficiently scale up the development of net zero roadmaps in 2024 and beyond. In addition, at its existing assets, Dream Industrial is integrating net zero thinking into the assessment of capital plans, enhancing energy management practices, expanding its renewable energy program, and improving data collection.

Dream Industrial is also focused on developing new high-performance, net zero buildings that will help meet its net zero targets. In 2023, Dream Industrial made progress on several of these developments and started exploring strategies to minimize embodied carbon throughout its development process.

99%

of Dream Industrial's AUM is targeting net zero GHG emissions by 2050⁽¹⁾

~13%

of Dream Industrial's tenants have public commitments on GHG emissions reduction targets, including net zero ambitions⁽²⁾

For more information on Dream Industrial's net zero commitments, please refer to the [Net Zero by 2035 Action Plan](#) ↗

(1) Includes fair value of investment wholly owned investment properties and working capital as at December 31, 2023. Please refer to Net Zero by 2035 Action Plan report for more details on our boundary.
 (2) GLA and tenant list as at December 31, 2023. Includes owned assets. Internally performed review based on publicly available information from tenant websites and published sustainability reports as at April 2024.
 (3) For more information on DIRUN's net zero commitments with respect to investment boundary and emissions boundary, please refer to pages 20-22 in our [Net Zero by 2035 Action Plan](#) ↗.

“

We are well-positioned to meet the growing demand for net zero spaces from large multi-national industrial tenants, both through our development program and our capital planning in existing assets. Tenants are positively responding to our renewable energy program and our decarbonization efforts underway.

”

Andrew Cunningham
 VP, Portfolio Management, Dream Industrial REIT

Highlight

Dream Industrial Expands its Net Zero Development Program at 220 Water Street

Dream Industrial is taking action to meet its net zero goals and, in 2023, commenced construction of its second net zero development project at **220 Water Street located in Whitby, Ontario**, which is targeting Canada Green Building Council’s (“CaGBC”) Zero Carbon Building Design Certification. This redevelopment project is comprised of two buildings currently undergoing construction and slated for completion by 2025.

Dream Industrial has enlisted the expertise of an independent consultant to develop a net zero roadmap. This involved conducting comprehensive whole building energy and GHG emissions simulations, value engineering various design options and conducting a life-cycle assessment for GHG emissions.

The design strategy for 220 Water Street delineates a clear pathway for the asset to attain CaGBC’s Zero Carbon Building Performance Certification in the future:

- **Approximately 70% of all building systems are designed to be electric;**
- **High-efficiency upgrades, including HVAC systems and roof insulation will be implemented;**
- **The building design includes a reinforced roof, giving it the capacity to install a rooftop solar PV system to generate a minimum of 5% of the site’s energy consumption.**
- **Increased electrical capacity to accommodate a future transition to an all-electric building.**

Pre-planning for these net zero upgrades in the construction design minimizes the need for costly renovations and tenant disruptions in the future, underscoring Dream Industrial’s commitment to progression in its net zero strategy.

Dream Industrial will continue to refine and improve its net zero development process and to expand its portfolio of high-efficiency and low carbon buildings to deliver on its net zero commitments.

The building’s design and construction concepts are similar to the **Courtneypark Project 7** redevelopment in Mississauga, Ontario, which achieved the Zero Carbon Building Design Certification in early 2024. The transferability of the high-performance design enables Dream Industrial to achieve scale and speed in the construction of highly efficient, future-proof buildings.

Embodied Carbon in Construction

To minimize embodied carbon at the property, Dream Industrial actively pursues opportunities to recycle and re-purpose equipment and materials from existing on-site structures. Throughout the construction and development phases, project management teams identify items suitable for re-purposing, such as steel, doors, concrete slabs and mechanical systems which can lead to significant cost savings as well as reducing the development’s embodied carbon. The coordination of material reuse to realize these dual benefits is facilitated through the collaboration of Dream Industrial’s development and property management teams.

Energy Management

Data Collection

Dream Industrial has established a robust strategy to collect data, measure emissions and monitor and target Scope 1, 2 and 3 GHG emissions, and continues to expand the scale of its data coverage. In 2023, Dream Industrial achieved landlord-controlled energy data coverage of 99% in Canada, and 87% in Europe. Landlord-controlled energy and Scope 1 and 2 GHG emissions from a typical industrial building come from exterior and interior lighting, and heating and cooling of vacant and common areas. Dream Industrial's Scope 3 emissions are mostly from tenant-controlled sources.

In 2023, Dream Industrial continued to work with a third-party data service provider to automate the collection and analysis of energy data, and collaborated with tenants to collect and track Scope 3 energy data. The automation of data collection contributes to Dream Industrial's submission of annual energy data in compliance with numerous regulatory reporting frameworks including Ontario's Energy and Water Reporting and Benchmarking ("EWRB") program, the City of Montreal's By-law concerning greenhouse gas emission disclosures and ratings of large buildings, and the OPERAT platform in France.

Dream Industrial continues to develop and implement strategies to expand its data coverage for Scope 3 tenant emissions. In 2023, Dream Industrial continued to install smart meters in its buildings, and is proactively planning for the installation of smart meters across its European portfolio. In addition, sub-metering has been implemented at all LEED buildings that were recently certified and is a requirement for new developments.

Environmental Management System

Dream Industrial has engaged with a third-party utility data collection and management provider to collect electricity consumption, natural gas consumption, and water consumption data. The system enables Dream Industrial to:

- Automate the collection of energy data
- Benchmark low and high performing assets within the portfolio
- Analyze irregular consumption patterns
- Inform carbon management planning and implementation.

Currently, the environmental management system is focused on collecting and managing energy and water data within Dream Industrial's operational control. Dream Industrial will strategically use the system to target data collection of its material Scope 3 GHG emission sources, which includes emissions from downstream-leased assets. The platform covers a wide range of energy and sustainability features including, but not limited to, energy, water, wastewater and GHG emissions.

Zoetermeer, Netherlands

LED Lighting

	2020	2021	2022	2023
LED Upgrades (sf) ⁽¹⁾	556,000	1,022,000	1,396,000	1,244,000

Lighting is one of the most significant and consistent sources of energy consumption and utility costs in the portfolio. Light emitting diodes (“LED”) lights require substantially less energy, have a longer lifespan, produce less heat, and provide more illumination than conventional lighting such as incandescent bulbs. Dream Industrial is focused on transitioning interior and exterior lighting to LEDs and has developed an in-house software tool to track LED upgrades that have been completed in the portfolio. Dream Industrial continues to optimize opportunities to upgrade lighting when tenants renew, when space is returned, and also works directly with tenants during their lease term to negotiate LED upgrades that reduce tenant’s operational costs and increase building efficiency. In 2023, Dream Industrial upgraded over 1.2 million sf to LED lighting.

14.7 million sf

cumulative GLA with LED lighting upgrades

1.2 million sf

of upgrades completed in 2023

1 million kWh

estimated annual electricity savings, equal to 80 tCO₂e in GHG emissions⁽²⁾

Sustainable Financing

Dream Industrial recognizes that a strong sustainability strategy enables greater access to capital, and continues to expand its portfolio of green financing instruments. Dream Industrial allocates significant capital towards material and measurable sustainable initiatives within its existing portfolio, new developments and investment opportunities.

Dream Industrial has issued \$846 million in net proceeds from Green Bonds to support its corporate strategy. In 2021 and 2022, a total of \$416 million was deployed in eligible green buildings and projects. In 2023, Dream Industrial deployed an estimated \$275 million in eligible green buildings and projects⁽³⁾. \$155 million in net proceeds remain to be deployed. Dream Industrial’s green projects pipeline includes \$225 million in eligible projects that are expected to be completed in 2024, \$90 million in 2025, and an additional \$10 million in eligible green projects are in feasibility or preliminary stages.

Green Bond Allocations (millions)	
Allocations Completed ⁽³⁾	691
Expected 2024 Allocation	155
Total Net Proceeds	846

In February 2024, DBRS Limited confirmed the Issuer Rating on Dream Industrial at BBB with Stable trends.

In 2023, Dream Industrial closed on a **€68.6 million or \$99 million** sustainability-linked loan (“SLL”) in Europe, which established ambitious and quantifiable sustainability performance objectives for renewable energy, data collection and Carbon Risk Real Estate Monitor (“CRREM”) analysis for the properties secured under the loan. Dream Industrial met the sustainability performance targets in the first reporting period, resulting in a 6 basis point reduction to the interest rate of the loan.

(1) Table excludes retrofits for external areas of the building.

(2) Emissions for Canadian projects were calculated using the National Inventory Report (NIR) published in 2022. For European projects they were calculated using the latest JRC-COM-NEEFC (National and European Emission Factors for Electricity Consumption) dataset provided by the Joint Research Centre.

(3) Actual deployment for 2023 will be confirmed in Use of Proceeds report for the year ended December 31, 2023 that will be issued in 2024.

Renewable Energy

115,000 tCO₂e

GHG emissions expected to be saved over the lifetime of Dream Industrial's 18 renewable energy projects⁽¹⁾

2,000 homes

The 14 MW of renewable power installed is enough to power 2,000 homes⁽²⁾

\$1.4 million

in revenue generated in 2023 by Dream Industrial's renewable energy program⁽³⁾

Dream Industrial is continually exploring opportunities to invest in clean power generation and expand its robust renewable energy platform in Canada and Europe. Capital investments in solar panels provide Dream Industrial with an opportunity to significantly reduce GHG emissions while creating a financially viable revenue stream. It also offers an element of utility cost certainty to tenants in an unpredictable energy market.

In 2023, Dream Industrial completed three rooftop solar projects in the Netherlands and one solar project in Alberta, representing a total capital investment of **\$4 million** and **3.7** megawatts ("MW") of system capacity. As at the end of 2023, Dream Industrial has completed a cumulative total of 18 renewable energy projects representing a total system capacity of 14 MW, which are estimated to save approximately 115,000 tonnes of carbon dioxide equivalent (tCO₂e)⁽¹⁾ over the lifetime of the projects. Dream Industrial owns and manages these solar panel installations directly as well as the associated revenue stream, which exceeded **\$1.4 million** in 2023.⁽³⁾

As at the end of 2023, construction is underway on four additional solar projects - two projects in the Netherlands and two projects in Alberta - representing 7 MW of renewable energy capacity. In addition, feasibility assessments are underway on ten potential projects in Ontario and Europe.

Securing Government Incentives

Dream Industrial has a proven track record of successfully securing governmental incentives and funding that are offered to encourage the development of renewable energy projects and reduce GHG emissions. In the Netherlands, all of the solar projects completed and underway have been granted the government's energy production subsidy scheme

("SDE++", or "SDE+"), which guarantees a fixed energy rate for the solar project for 15 years. In 2023, 17 additional projects were approved for SDE++ and feasibility assessments are being scheduled in the near term. Preliminary analysis suggests these projects have the potential to add approximately 32 MW of solar capacity.

In Alberta, all nine solar projects that are either completed or underway have either received or been approved for funding through the provincial Energy Savings for Business ("ESB") program offered via Emissions Reductions Alberta. Currently, Dream Industrial is reviewing and planning for Canada's Investment Tax Credit ("ITC"), a refundable tax credit of up to 30% of the capital cost of "clean technology property" that was finalized in 2023. These incentives enhance project returns and enable Dream Industrial to achieve scale in its renewable energy program.

Tenant Outreach Program

Dream Industrial has developed a successful tenant outreach program to inform tenants of its renewable energy program. The 10 tenants in Alberta that are purchasing renewable energy from the completed solar projects recognize that procuring solar power from Dream Industrial enables them to reduce their Scope 2 GHG emissions and also provides cost certainty in an unpredictable energy market. Two of these Alberta tenants are demonstrating their enthusiasm for Dream Industrial's renewable energy program by signing to procure more renewable energy, from the solar projects that are currently underway. Repeat tenant participation demonstrates the success and value of Dream Industrial's renewable energy program.

“

The results of the Dream solar panel project exceeded our expectations. The installation and transition were seamless. We are now recognizing financial savings on utilities and have added significantly to our environmental sustainability initiatives.

”

Rob Steeves

VP, Manufacturing, Cornerstone Building Brands
Tenant at 7140-40th St. S.E., Calgary, AB

(1) Emission Factor released in the National Inventory Report during the year of completion is used in the estimation. The values are not updated annually to reflect updated and changes to the emission factors.
(2) Typical homes located in Ontario, Canada, based on typical residential customer use as per Ontario Energy Board's report "Defining Ontario's Typical Electricity Residential Customer 2023 Update"
(3) Includes revenue from rooftop solar systems that were in place upon building acquisition

Generating Renewable Energy Certificates

Dream Industrial currently produces and owns Renewable Energy Certificates (“RECs”, also referred to as Guarantees of Origin) generated from its solar arrays in the Netherlands. Dream Industrial is exploring how to utilize these RECs as part of its net zero strategy, which could include using the RECs for Dream Industrial’s own operations or selling them as an additional revenue stream to tenants or other organizations, based on local carbon markets.

In 2023, Dream Industrial generated €12,000 or \$18,000 in revenue from RECs which were sold in the European carbon market, and anticipates that this revenue stream will continue to grow in tandem with the scale of its renewable energy program. Demand for RECs is expected to increase in the future, which could enhance revenues and create GHG emissions reduction opportunities for the Dream Industrial portfolio.

Sustainable Roofing

Dream Industrial defines sustainable roofs as building roofs with higher levels of insulation than code, cool roofs or green roofs. Highly insulated roofs can achieve energy savings during heating and cooling seasons.

Cool roofs: save energy during the air-conditioning season by reflecting sunlight and reducing heat absorption as well as reducing the urban heat island effect.

Green roofs: also reduce urban heat island effect, control water runoff and provide habitat for local species.

Dream Industrial continues to implement its Sustainable Roofing Policy for its Canadian assets, which formalizes the integration of sustainable attributes into standard specifications for roof repairs and replacements. Prior to commencing any major roof work, the team evaluates if a building is a potential candidate for rooftop renewable energy and considers adapting the roof specification to ensure the roof is solar ready.

23%

percentage of portfolio GLA with sustainable roofs⁽¹⁾

(1) Sustainable roofs include cool roofs and green roofs with vegetation.

Solar project installation at 10 Bessemerstraat
Dordrecht, Netherlands

Sustainable Development

Dream Industrial has an active development program. The development strategy has three key components:

- New developments
- Intensification of excess land on the income-producing properties
- Redevelopment of existing properties

The near-term development pipeline includes approximately 2.8 million⁽¹⁾ sf of development projects that are recently completed, currently underway or in advanced planning stages across Canada and Europe.

In addition to building best-in-class, modern logistics premises that meet the requirements of occupants, Dream Industrial is pursuing industry-leading building design and technologies with the objective to maximize the energy efficiency of its portfolio and minimize the environmental footprint from the construction process.

For detailed information on Dream Industrial’s net zero development program, please refer to the [Case Study - Dream Industrial Expands its Net Zero Development Program at 220 Water Street](#).

2.4 million sf

of new developments are targeting or have achieved LEED or DGNB certifications

598,000 sf

of new developments are targeting or have achieved CaGBC’s Zero Carbon Building Design Certification

Dream Industrial has committed to obtaining green building certifications on 100% of new developments

Case Study

Biodiversity in Europe

Dream Industrial strives to be a steward of the natural environment, and has proactively established biodiversity attributes within its European portfolio, which include sites with eco-grazing for goats and sheep, beehives, nesting and shelter boxes for a number of species including bats, birds, and hedgehogs, an insect hotel, green roofs, the integration of native species in landscaping and the implementation of water ditches and canals to prevent soil erosion.

The Task Force on Nature-related Financial Disclosures (“TNFD”) released its final recommendations for managing and disclosing nature-related risks in September 2023. The initiative aims to assist businesses in properly addressing risks, opportunities, and impacts related to nature, highlighting the connection between financial risks and the loss of biodiversity and destruction of ecosystems. The recommendations serve as a tool for policymakers, regulators, asset owners, asset managers, and corporations to increase their focus on managing nature-related risks, and to encourage private sector engagement and financing for addressing nature loss and expanding nature-based solutions.

Dream Industrial intends to evaluate the impact and opportunities of aligning with the TNFD on its portfolio over time.

(1) GLA includes developments held in the GTA Development joint venture.

Interview

European Perspectives on Integrating Sustainability

Bonnie Crews, Director of Sustainability and Portfolio Management with Dream Industrial's global head office in Toronto, interviewed Sjoerd Barmentloo, Vice-President of Portfolio Management, and Matthias Femes, Director of Investments, both of whom are with Dream Industrial Europe based in the offices in Amsterdam, Netherlands and Düsseldorf, Germany. Their discussion focused on how European perspectives contribute to Dream's ESG leadership and advancement. As at December 31, 2023, Dream Industrial owns 102 buildings and approximately 17.4 million sf of GLA across its European Portfolio. Dream Industrial employs local asset management and acquisition teams in Europe to support its operations.

Industrial Europe

Guldenweg 6
Varsseveld, Netherlands

Environmental

Bonnie: The ESG landscape in Europe is moving at a different pace from North America, what are the key trends that you are seeing in Europe?

Sjoerd: One of the most dominant ESG trends in Europe, particularly in the last few years, is the increasing impact of government regulation. The European real estate industry is impacted by European sustainability regulations, as well as by regional regulatory frameworks that various jurisdictions are introducing to adapt European regulations to their regional context.

Matthias: Despite the proliferation of regulatory frameworks in recent years, our regulatory risk has not risen significantly. Our teams are proactive and stay informed about regulatory changes in the regions where we operate. We work closely with our legal advisers, as well as our asset and property management partners as they often have in-depth knowledge about local regulations.

Other key ESG trends in Europe include an increasing focus from industrial tenants on improving building performance through efficiency upgrades, as well as the growth of preferential financing opportunities from banks prioritizing sustainability.

Bonnie: How have these trends created opportunities for Dream Industrial in Europe?

Sjoerd: Through our proactive monitoring of the ESG landscape, close relationships with partners and continued focus on improving the ESG performance of our assets, we've been able to take advantage of both

financing opportunities and government incentives to achieve our sustainability goals while minimizing costs.

The banking sector in Europe is increasingly focused on the sustainability impacts of their financing activities. We have seen a shift towards financing incentives that prioritize minimizing carbon emissions and improving asset sustainability performance. For example, in 2023 we successfully closed our first sustainability-linked loan and worked with our bank to create a structure that offers us preferred terms if we can achieve sustainability-related KPIs.

Matthias: Sjoerd and the local team were also able to secure government funding to install Building Management Installations and install utility tracking systems in our French portfolio. In 2023, the French government offered funding to install smart meters and building management systems to accelerate compliance with regulatory requirements to report asset utility consumption. The funding was only available for systems assigned before the end of 2023. Since our team had already started to install utility tracking systems in our portfolio, we had existing close relationships with our suppliers and contractors. These relationships enabled us to act quickly on this opportunity to secure a €1.7 million investment from the French government and install utility tracking systems across our French portfolio.

Bonnie: Are there any synergies in how Dream benefits from operating in both Europe and North America?

Matthias: Our culture prioritizes sharing knowledge between teams in Europe and North America to allow both teams to benefit from our unique perspectives. For instance, because Europe has been the global leader in adopting ESG reporting requirements, our European teams gain insight for embedding ESG into business strategy and decision-making. Our European teams share best practices and lessons learned with our North American team, ensuring that leading practices and standards set in Europe are adopted across our global real estate portfolio.

Sjoerd: Conversely, our North American teams have led the development of asset and portfolio-level decarbonization tools in support of our net zero commitments. The European teams have been able to leverage these tools to support compliance with regulations requiring portfolio emissions tracking and decarbonization planning.

Bonnie: What best practices or lessons learned have you recently shared?

Matthias: Since our teams have similar ESG priorities, we've seen a lot of value in sharing our experiences with solar energy and electric vehicle ("EV") infrastructure. Both teams have ambitious plans to increase solar energy capacity because of the opportunity it creates from a revenue

perspective. Similarly, we are increasing the number of EV chargers installed in both Europe and North America due to growing tenant demand.

Sjoerd: We collaborate with our North American teams to understand how to decarbonize our portfolio. In Europe, we have incorporated the CRREM analysis into our acquisition due diligence process to improve our climate risk management. In 2024, we have committed to conducting a CRREM analysis for all existing European assets due to the strategic benefits it provides in understanding asset-level pathways to net zero. The North American team has helped us significantly to understand the CRREM analysis and we leveraged their research on CRREM platform providers to help us find our ideal data partner.

Matthias: Lastly, our teams have frequent conversations about RECs or Guarantee of Origins ("GoOs"), as they are called in European markets. In Europe, there is an active trading market, and we have partnerships and a dedicated asset manager to help us maximize revenue from RECs generated by our solar energy projects. While the REC trading market in North America is still nascent, it is projected to continue to grow and mature in the coming years. Sharing the learnings we've gained about REC trading strategies here in Europe will help ensure Dream is well-positioned to capitalize on future revenue-generating opportunities in North America.

Social

Strong and Diverse Workforce

Dream Industrial's success as an organization comes from its strong and diverse workforce. Dream Industrial has committed to promoting the highest standards of social responsibility throughout the organization and aims to improve the lives of everyone who works there. Employees come from a wide range of backgrounds and experiences, bringing many valuable skills and perspectives to the team.

Tenant Engagement

Tenant satisfaction is crucial to Dream Industrial’s success. Dream Industrial has developed a holistic tenant engagement program that focuses on engaging tenants on their sustainability goals including net zero targets, renewable energy procurement, green building certifications and facilitation of EV chargers. Utilizing industry best practices, Dream Industrial employs several mechanisms to engage with tenants, including feedback sessions, survey questionnaires and use of its social media/ online platform to understand and align tenant operational requirements with sustainability initiatives and also to assess satisfaction levels and plan for future leasing requirements.

In addition, Dream Industrial leverages its sustainability platform in its marketing materials, incorporating aspects of its renewable energy program and net zero developments when working with both current and prospective tenants. Dream Industrial’s sustainability program can be the differentiator when tenants are assessing their space requirements, particularly for large national and multi-national tenants with corporate sustainability commitments and targets.

In 2023, Dream Industrial improved building amenities, accessibility, and EV infrastructure at select properties, in response to its tenant outreach and engagement program. As the transition to net zero continues to support the need for EV charging infrastructure, Dream Industrial’s EV portfolio increased by 90%, to 258 EV chargers. Installing EV chargers future proofs assets to address tenant demand and proactively prepares for governmental policies in Canada and Europe that intend to accelerate EV adoption.

Tenant Satisfaction Survey

Dream Industrial continues to work with tenants to benchmark sustainability priorities and goals, and to identify priority initiatives and assets for sustainable investments. In addition, tenant surveys provide insight into tenant satisfaction levels with their premises, property management services, engagement frequency and the feedback process.

100%

of tenants in Canada were surveyed by Dream Industrial in 2023

2.5 million

sf of green leases were executed in Canada and Europe in 2023

Green Lease Program

Dream Industrial has adopted a green lease as its standard lease across Canada, and has integrated green lease considerations into its lease negotiations in Europe. The green lease program includes tenant commitments to energy disclosures, low carbon construction practices, the purchase of on-site renewable energy (if available), energy efficiency engagement and training, and cost recovery clauses for energy efficiency upgrades.

Green Lease Leaders

In 2023, **Dream Industrial received Platinum level recognition** from the Green Lease Leaders program during the Better

Buildings, Better Plants Summit, held by the Institute for Market Transformation and the U.S. Department of Energy’s Better Buildings Alliance. The improvement from Gold to Platinum level is attributable to training and engagement sessions that were held in 2023 with internal leasing teams and external brokers on energy efficiency, climate change, and net zero building design. Dream Industrial’s progress on the development of building-level net zero transition plans and the implementation of energy management best practices also supported the year-over-year advancement from Gold to Platinum level. Dream Industrial will continue to integrate innovative and leading sustainability initiatives into its leasing program.

Highlight

Charitable Giving Within Our Communities

In 2023, Dream Industrial’s regional teams in Canada and Europe selected charities that support causes and impact the communities within which it operates. For example, the Dream Industrial GTA office launched a funding drive to support Nutrition for Learning, an organization that strives to elevate the experience of universal food access at schools and provide nourishment to students in the Waterloo Region. Nutrition for Learning is also a tenant in the portfolio.

Across all of the regional offices located in Canada and Europe, Dream Industrial teams supported and participated in numerous charitable initiatives in 2023 including social gardening projects, Earth Day litter collection, food and clothing drives and volunteering at food banks and food recovery networks.

“

Nutrition for Learning has been providing unfailing support in feeding children grades K-12 across both school boards in Waterloo Region for 26 years. In the current economic crisis, Nutrition for Learning needed to scale up quickly in 2023 with a much larger distribution centre and office. The team at Dream Industrial became our new landlords just in time for us to launch last September. Not only are they incredible landlords, they launched a fundraising campaign in our honour raising \$10K - many thousands of meals - for our schools! We’re so lucky to run our organization here in this beautiful, functional space with Dream landlords. We finally feel “home” and know we can grow here to continue meeting the need of kids here where we work and live.

Climate Change Risk

Climate change poses a significant risk for Dream Industrial’s properties, employees, tenants and communities.

Dream Industrial is proactively managing climate-related risks to meet its net zero commitment and protect against the shocks and stressors of climate change and the transition to a low-carbon economy. Climate change risk informs Dream Industrial’s business strategy and decision-making by establishing the order of priority for making the capital and operational investments needed to future-proof assets.

The adjacent table provides a high-level summary of key physical and transition risks and their associated potential impacts on Dream Industrial’s business. For detailed information on how Dream Industrial identifies, manages and mitigates climate risks, please refer to the shared [Climate Change Risk](#) section.

Type of Risk ⁽¹⁾	Identified Risks	Potential Impact	Mitigating Action
Physical, acute Short- to long-term time horizon	<ul style="list-style-type: none"> Natural disasters and increasingly frequent and severe weather conditions including wildfire, windstorms, tornadoes, hailstorms, lightning and earthquake 	<ul style="list-style-type: none"> Could interrupt operations and activities, threaten tenant health and safety, damage properties and may decrease property values or require additional expenses to be incurred, including increased insurance costs 	Dream Industrial uses third-party climate data to assess property-level physical climate risks from the following hazards: <ul style="list-style-type: none"> Flooding Wildfire Earthquake Hailstorm Lightning Windstorm Tornado
	<ul style="list-style-type: none"> 50, 100, 200 and 500-year flood events 		
Physical, chronic Long-term time horizon	<ul style="list-style-type: none"> Temperature change Precipitation change Sea-level rise Air quality Water security/water stress 	<ul style="list-style-type: none"> Temperature change could increase cooling loads and costs Sea-level rise could alter geographies targeted for future investment Water security/water stress risk may impact approach to water management and capital expenditures on efficiency upgrades 	Property-level risk is assessed using third-party climate data against the listed chronic physical climate risks: <ul style="list-style-type: none"> Temperature change Air quality Precipitation change Water security/water stress Sea-level rise
Transition, policy and legal Short- to long-term time horizon	<ul style="list-style-type: none"> Greenhouse gas emissions reduction regulations 	<ul style="list-style-type: none"> Could impose constraints on operational flexibility or result in financial costs or fines to comply with various reforms 	<ul style="list-style-type: none"> Dream Industrial’s GHG emissions reduction targets and net zero action plan help mitigate transition risk by proactively reducing emissions ahead of potential future regulations and anticipated future changes in tenant preferences and market supply and demand.
Transition, market and reputation Long-term time horizon	<ul style="list-style-type: none"> Shift in supply and demand for products and services Changing tenant preferences Increased stakeholder expectations on climate-related risk 	<ul style="list-style-type: none"> Failure to adapt to climate change reforms could adversely affect reputation Costs to build net zero assets, or upgrade assets to net zero could increase May require increased internal resources to manage climate risk and produce climate disclosure 	The Risk Management and Sustainability and ESG teams continuously monitor the exposure to transition risk associated with policy and legislative changes, market, and reputational shifts. <p>Additionally, Dream Industrial continues to strengthen alignment with the Task Force on Climate-related Financial Disclosures (“TCFD”) recommendations and climate disclosure regulations.</p>

⁽¹⁾ Short-term is used to describe risks with the highest likelihood and greatest severity between present and 2030. Long-term is used to describe risks with the highest likelihood and greatest severity after 2030.

Spotlight

Incorporating Climate Resiliency into the Investment Process

Physical climate risks can impact the investment process by driving up compliance costs and capital costs for new projects, influencing investor sentiment and affecting property values. As a result, Dream Industrial uses the physical climate risk analysis tool during the acquisition due diligence process for factoring adaptation strategies into capital planning process.

In 2023, the Dream group established a resiliency working group, bringing together various teams to work across the entities, including Dream Industrial, share knowledge and experience, and standardize an approach to climate risk adaptation and incorporate into the property-specific capital planning process, building operations and the acquisition process.

Using a physical climate risk scenario analysis tool, the working group has aggregated asset type-specific climate risks and prioritized them on the basis of likelihood and severity. This information will be used to develop tactical methodologies for reducing the exposure of assets across the Dream Industrial portfolio to climate perils identified to be relevant to each asset.

In 2024 and beyond, the resiliency working group will work towards creating additional tailored adaptation strategies for more asset types and other regions.

GRESB is an independent organization that validates ESG performance data. It is the global standard for ESG benchmarking and reporting for listed property companies, private property funds, developers and investors that invest directly in real estate.

In 2023, Dream Industrial completed its second annual submission to the GRESB Real Estate Assessment. Participation in the GRESB Real Estate Assessment provides Dream Industrial with a globally recognized benchmark to evaluate the progression of its ESG strategy and targets, and the recent results validate its accomplishments to date.

Dream Industrial received the Green Star designation in 2023, and scored full points in the Leadership, Policies, Reporting and Targets aspects. Its GRESB Real Estate Assessment score improved by 16% and increased its GRESB Star rating from 1 to 2 Stars.

	2022	2023	YoY Change
GRESB Score	58	67	16%
Management Score	26	28	8%
Performance Score	32	39	22%

GRESB Score - Green Star
Peer Average 65

Performance Score
Benchmark Average 38

Management Score
Benchmark Average 27

The score improvement for Dream Industrial is a result of advancements in both the Management and Performance Modules. The risk management and stakeholder engagement initiatives, including the climate change risk assessment and tenant engagement program, led to an increase in the 2023 Management score. Continued improvement to its data collection process by engaging tenants on their utility data resulted in Dream Industrial's Performance score to increase.

Dream Industrial improved to an 'A' Public Disclosure Level, as a result of a 14 point score increase from 2022. This has improved Dream Industrial's Public Disclosure ranking to 3rd out of 10 in its peer comparison group (Northern America | Industrial).

The GRESB Real Estate Assessment participation increased in 2023 by 15% to include 2,084 listed and non-listed portfolios generating a benchmark that covers U.S. \$7.2 trillion of gross asset value ("GAV") across 75 countries. The growth in participation serves as a clear indicator that the global investment community is considering ESG factors in its investment decisions and values transparency and standardized reporting from its real estate investments.

GRESB B.V. has no liability to any person (including a natural person, corporate or unincorporated body) for any losses, damages, costs, expenses, or other liabilities suffered as a result of any use of or reliance on any of the information which may be attributed to it. Green Stars recognize Real Estate entities with a score higher than 50% of the points allocated to each relevant component.

Forward-looking Plans

Environmental

- **Continue** to implement GHG emissions reductions and energy efficiency improvements across the portfolio and pilot retrofit projects to meet 2025 targets
- **Scale up** the development of asset level net zero roadmaps for more properties using in-house engineering tools
- **Continue** strategizing the most efficient approach to decarbonize Dream Industrial’s portfolio
- **Continue** to develop and enhance the internal skills and competencies related to net zero and decarbonization strategies
- **Continue** to improve the accuracy of GHG projections and data collection for Scope 3 emissions and increase GHG emissions data coverage boundary to more assets as appropriate
- **Conduct** CRREM analysis on Dream Industrial’s European portfolio
- **Continue** to expand the renewable energy program and explore additional regions in Europe and Canada
- **Continue** to develop Dream Industrial’s REC strategy
- **Continue** to incorporate green financing opportunities in capital strategy
- **Achieve** CaGBC’s Zero Carbon Building Design Certification at 220 Water St

Social

- **Survey** 100% of in-place tenants in 2024
- **Continue** to adopt green lease standards across the European portfolio
- **Continue** to engage with tenants and align asset strategies with their net zero goals through lease negotiations, LED retrofits, efficiency upgrades, renewable energy installations and data collection strategies
- **Support** tenants to reduce their Scope 3 emissions by assessing opportunities to install EV chargers
- **Provide** employees with volunteer opportunities at local charities alongside charitable donations

Governance

- **Evaluate** and plan for compliance with future sustainability regulatory reporting requirements such as such as the International Financial Reporting Standards (“IFRS”) S1 and S2 standards
- **Review** the Corporate Sustainability Reporting Directive (“CSRD”) requirements to determine the full scope of Dream Industrial’s reporting obligations and perform gap assessment when appropriate
- **Continue** reporting to PRI and NZAM
- **Evaluate** the impact and opportunities of aligning with the Task Force on Nature-related Financial Disclosures (“TNFD”) on Dream Industrial’s portfolio
- **Develop** a plan to systematically assess climate change risk based on the short- and long-term risks and opportunities identified in scenario analysis
- **Expand** the scope of the climate resiliency working group to more assets, risk types and regions
- **Improve** Dream Industrial’s score in the 2024 GRESB Real Estate Assessment

The 2022 data shown is reflective of the period starting May 2022, when Dream Residential was incorporated, to the end of December 2022. 2023 was the first full calendar year of Dream Residential’s operations, which is why the year-over-year change values are significantly higher.

✓ Externally assured; please refer to note in the [About this Report](#) section

Dream Residential performs annual flood and catastrophic loss risk assessments to determine which properties in its portfolio are at risk of losses from 50, 100, 200 and 500-year floods.

ESG Ratings Summary

In 2022, Dream Residential engaged Sustainalytics, a globally recognized independent ESG assessment provider, to perform a broad-based Corporate ESG Assessment, covering five ESG categories, including: Corporate Governance, ESG Integration — Financials, Product Governance, Human Capital, and Business Ethics.

Dream Residential received the following pre-IPO Corporate ESG Assessment score from Sustainalytics:

15.2

Low Risk

0-40+ (0 = best)

(1) Covers data from DRRJ's incorporation in May 2022 to end of December 2022.
 (2) Energy consumption reflects energy consumed within organizational control. Please refer to [Supplementary Disclosures](#) section for additional details, including data coverage.
 (3) GHG emissions are calculated in accordance with the World Resource Institute Greenhouse Gas Protocol. Calculations in this table capture activities DRRJ has direct and indirect operational control over: Scope 1 emissions generated directly from its operations, including heating properties; Scope 2 emissions indirectly associated with generation of purchased electricity by properties. Scope 3 emissions reported are associated with category 13 (downstream leased assets). Please refer to [Supplementary Disclosures](#) section for more information.
 (4) Assets that may be classified under more than one category by default are not duplicated in the figures in the other time categories.
 (5) Under development, redevelopment and major renovation are excluded from analysis.
 (6) Floor area square footage is based on GLA as at December 31, 2023.

Environmental

Approach

Dream Residential’s core values are to prioritize efficient and comfortable buildings, which aligns with the Dream group’s mission to Build Better Communities.

As an owner and property manager, Dream Residential integrates sustainability into the design and operations of all its buildings and communities. Dream Residential is executing impactful capital planning initiatives that improve both the environmental footprint and the tenant experience in its buildings.

Dream Residential has established its environmental approach consistent with the Dream group of companies’ ESG Framework. Dream Residential is focused on developing and operating its properties to optimize energy use, limit GHG emissions, and reduce water use and waste, while also creating resiliency against natural disasters and major climatic events.

Net Zero Action Plan

In 2022, the Dream group of companies published its [Net Zero by 2035 Action Plan](#) to outline intended steps to be taken to achieve net zero. At the time of publication, the Dream group of companies included Dream Unlimited, Dream Impact, Dream Office, and Dream Industrial. Dream Residential was not formed. At its formation, Dream Residential committed to net zero Scope 1 and Scope 2 emissions by 2050.

In 2023, Dream Residential focused on advancing its net zero ambition by considering energy efficiency projects in its capital plans, enhancing energy management practices, and improving data collection processes.

The Net Zero Action Plan includes the following steps:

- Identify baseline emissions and estimated future emissions
- Develop roadmaps to achieve net zero at the property level
- Establish oversight and transparency to create accountability to stakeholders through comprehensive governance and reporting

The learnings from the development of the Net Zero Action Plan and the progress towards implementing the systems and processes to achieve net zero, across the Dream group of companies, will be leveraged to develop a net zero strategy for Dream Residential.

Ashton Glen
Centerville, OH

01
2050

net zero Scope 1 and Scope 2 emissions

02
100%

of Dream Residential’s AUM is targeting net zero GHG emissions by 2050⁽¹⁾

(1) As at December 31, 2023. Includes fair value of investment properties and working capital under management. Please refer to DRRU’s latest Annual Report for more details on AUM.

Resource Management

As outlined in the [Environmental Policy](#), Dream Residential is committed to operating in an environmentally responsible manner, preserving natural resources and managing residential assets with long-term positive impact on its communities, wherever possible.

Energy Management

Dream Residential's energy conservation program is focused on identifying and implementing sustainable practices and cost-effective retrofits that benefit its communities, customers, and employees as well as reduce energy consumption and GHG emissions across its portfolio.

In 2023, Dream Residential actioned the recommendations from the energy audits conducted in the previous year, which estimated and benchmarked baseline energy and identified opportunities to deploy LED lighting retrofit projects. Based on the results of these audits, Dream Residential invested in LED retrofits totalling \$175,000 at five properties.

The retrofit projects are intended to add value to the properties by reducing operating costs and improve leasing. The insights and experience from these projects are helping Dream Residential expand this program to other properties.

Water Management

Dream Residential's water conservation programs aim to minimize its use of potable water and decrease water consumption where possible through fixture retrofits and efficiency upgrades. It also incorporates plantation of native and drought-tolerant species across the properties during landscaping to reduce the amount of potable water required for irrigation, wherever possible. Through water audits and site visits by trained professionals, it continues to evaluate various water conservation opportunities including smart irrigation systems, low-flow fixtures and other system upgrades such as water conservation valves, as well as increasing resident awareness.

In 2023, Dream Residential implemented its water conservation program at seven of its properties with an aim to reduce potable water consumption. The program included replacement of showerheads, kitchen faucets and bathroom faucets with more efficient and low flow water fixtures. Throughout 2023, Dream Residential installed high efficiency fixtures in 410 residential units, or 12% of its portfolio.

Data Collection and Reporting

In 2023, Dream Residential continued to make progress on increasing data coverage and quality for operational and tenant utility data and associated GHG emissions. Dream Residential's Scope 1 and 2 operational GHG emissions from a typical asset come from exterior and common area lighting, and heating and cooling of shared spaces. The key category of Dream Residential's Scope 3 GHG emissions is tenant utility consumption.

Dream Residential has established a robust strategy to collect, monitor and report its Scope 1, Scope 2 and Scope 3 GHG emissions. It has engaged a third-party, utility billing service provider to manage common area and tenant utility data. Dream Residential continues to evaluate innovative solutions and industry best practices such as smart meters, collection of data through Energy Star Portfolio Manager ("ESPM") and tenant engagement to further its data collection, monitoring and reporting program.

Aspen Village
Broken Arrow, OK

Colt's Crossing
Georgetown, KY

Social

Dream Residential is committed to maintaining a culture of inclusivity and creating meaningful opportunities for its employees, maintaining strong relationships with its residents, and engaging with local communities and cities. Dream Residential has a US-based human resources team to help support and grow its team during its second year of operation. This team is responsible for employee engagement, professional development, and ensuring that team members feel supported and engaged in their roles.

Dream Residential Gender Breakdown

Dream Residential’s head office is proud to have received **BOMA BEST Gold** certification and Rick Hansen Foundation Accessibility Certification (“RHFAC”) in 2023.

Resident Engagement

Dream Residential conducts regular satisfaction surveys of its residents through an independent third party. In 2023, the survey had a coverage rate of 100%. Through their resident outreach, the independent third party, circulates a survey to each resident twice per year. Based on the feedback received through the surveys, the property management team intends to create an action plan to address with the property managers and residents where applicable.

GRESB is an independent organization that validates ESG performance data. It is the global standard for ESG benchmarking and reporting for listed property companies, private property funds, developers and investors that invest directly in real estate.

In 2023, Dream Residential completed its inaugural submission to the GRESB Real Estate Assessment and received a score which was consistent with the expected results for a first time participant. Dream Residential scored full points in the Policies, Reporting and Targets aspects. Dream Residential is evaluating opportunities to improve its GRESB score that align with business plans, create value for stakeholders and demonstrate leadership to investors.

The GRESB Real Estate Assessment participation increased in 2023 by 15% to include 2,084 listed and non-listed portfolios generating a benchmark that covers U.S. \$7.2 trillion of gross asset value (“GAV”) across 75 countries. The growth in participation serves as a clear indicator that the global investment community is considering ESG factors in its investment decisions and values transparency and standardized reporting from its real estate investments.

Type of Risk ⁽²⁾	Identified Risks	Potential Impact	Mitigating Action
Physical, acute Short- to long-term time horizon	<ul style="list-style-type: none"> Natural disasters and increasingly frequent and severe weather conditions including wildfire, windstorms, tornadoes, hailstorms, lightning and earthquake 	<ul style="list-style-type: none"> Could interrupt operations and activities, threaten tenant health and safety, damage properties and may decrease property values or require additional expenses to be incurred, including increased insurance costs 	Dream Residential uses third-party climate data to assess property-level physical climate risks from the following hazards: <ul style="list-style-type: none"> • Flooding • Wildfire • Earthquake • Hailstorm • Lightning • Windstorm • Tornado
	<ul style="list-style-type: none"> 50, 100, 200 and 500-year flood events 		
Physical, chronic Long-term time horizon	<ul style="list-style-type: none"> Temperature change Precipitation change Sea-level rise Air quality Water security/water stress 	<ul style="list-style-type: none"> Temperature change could increase cooling loads and costs Sea-level rise could alter geographies targeted for future investment Water security/water stress risk may impact approach to water management and capital expenditures on efficiency upgrades 	Property-level risk is assessed using third-party climate data against the listed chronic physical climate risks: <ul style="list-style-type: none"> • Temperature change • Air quality • Precipitation change • Water security/water stress • Sea-level rise
Transition, policy and legal Short- to long-term time horizon	<ul style="list-style-type: none"> Greenhouse gas emissions reduction regulations 	<ul style="list-style-type: none"> Could impose constraints on operational flexibility or result in financial costs or fines to comply with various reforms 	<ul style="list-style-type: none"> Dream Residential’s GHG emissions reduction targets and net zero action plan help mitigate transition risk by proactively reducing emissions ahead of potential future regulations and anticipated future changes in tenant preferences and market supply and demand.
Transition, market and reputation Long-term time horizon	<ul style="list-style-type: none"> Shift in supply and demand for products and services Changing tenant preferences Increased stakeholder expectations on climate-related risk 	<ul style="list-style-type: none"> Failure to adapt to climate change reforms could adversely affect reputation Costs to build net zero assets, or upgrade assets to net zero could increase May require increased internal resources to manage climate risk and produce climate disclosure 	The Risk Management and Sustainability and ESG teams continuously monitor the exposure to transition risk associated with policy and legislative changes, market, and reputational shifts. Additionally, Dream Residential continues to strengthen alignment with the Task Force on Climate-related Financial Disclosures (“TCFD”) recommendations and climate disclosure regulations.

(1) All intellectual property rights to this data belong exclusively to GRESB B.V. All rights reserved. GRESB B.V. has no liability to any person (including a natural person, corporate or unincorporated body) for any losses, damages, costs, expenses, or other liabilities suffered as a result of any use of or reliance on any of the information which may be attributed to it.
 (2) Short-term is used to describe risks with the highest likelihood and greatest severity between present and 2030. Long-term is used to describe risks with the highest likelihood and greatest severity after 2030.

Forward-looking Plans

Environmental

- **Expand** Dream Residential’s energy management program and water management program
- **Implement** benchmarking tools such as ESPM to understand energy performance of properties
- **Continue** to improve coverage for energy, water and Scope 1, 2 and select scope 3 GHG emissions data
- **Pilot** retrofit projects and continue to implement GHG emissions reductions and energy efficiency improvements across the portfolio
- **Continue** to develop and enhance the internal skills and competencies related to net zero and decarbonization strategies

Social

- **Evaluate** the procurement process to identify areas in the supply chain where ESG-specific requirements can be integrated
- **Target** 100% coverage rate in 2024 resident survey

Governance

- **Evaluate** and plan for compliance with future sustainability regulatory reporting requirements such as the International Financial Reporting Standards (“IFRS”) S1 and S2 standards
- **Continue** reporting to PRI and NZAM
- **Evaluate** the impact and opportunities of aligning with the recommendations of the Task Force on Nature-related Financial Disclosures (“TNFD”) on Dream Residential’s portfolio
- **Develop** a plan to systematically assess climate change risk based on the short- and long-term risks and opportunities identified in scenario analysis
- **Improve** Dream Residential GRESB score in the 2024 GRESB Real Estate Assessment

07

Supplemental Disclosures

Dream Group of Companies

Social

The boundary of the reporting in this section includes only employees employed by Dream Asset Management Corporation, Dream Industrial Management Corp., Dream Office Management Corp., Dream U.S. Manager LLC, Dream Europe Advisors Coöperatieve U.A., Dream European Advisors GmbH, Dream Netherlands Advisors B.V., Dream Industrial Netherlands Property Management B.V., Dream France Advisors SAS, and Dream Summit Industrial Management Corp. Does not include employees at recreational properties, employees on unpaid leaves of absence (e.g., permanent disability, long-term disability, parental leave) interns, and Dream Residential REIT employees of Pauls Corp. Annual numbers represents total headcount and not full-time equivalent as at December 31st of the respective year.

Health & Safety	Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	Dream encourages all employees to promote health, safety and wellbeing in the workplace. We all must comply with laws, as written and for their intended purpose. Employees are first introduced to the Health, Safety and Wellbeing Policy and Workplace Violence, Discrimination and Harassment policy during their orientation. During orientation, employees are also instructed on how to comply with all government and legal requirements and industry standards in jurisdictions where we operate. Dream offers many other policies that are available to employees at all times and are reviewed with each employee annually. Consistent monitoring of our Health and Safety program ensures the internal responsibility system is in practice. Incidents and accidents are tracked and analyzed using multiple data inputs. Health and safety metrics are reviewed and compared to industry standards and benchmarks. Our results are analyzed, and an action plan is developed to mitigate common incidents. Joint Health and Safety Committees/Health and Safety Representatives review incident reports as well as establish and promote a safe work culture by holding regular meetings at our offices.				
	Policy commitment to ensure product and service safety	Management's commitment to ongoing hazard assessment is promoted through workplace inspections, incident investigation and corrective actions. All incident reports are reported through the Incident/Injury Report Form available on the company website. During the reporting stage, the supervisor, in coordination with the Health and Safety Coordinator, will assess the scene, determine the root cause and provide any corrective actions that are needed. Management has taken on the responsibility to review all incident reports and review all Health and Safety Committee inspections and minutes.				
Alternative transportation	Dream's corporate head office is in the heart of downtown Toronto, within a five-minute walking distance from both King and Queen subway stations. The office is also within a 15-minute walk to Union Station, connecting employees to commuter trains, VIA rail and the Union-Pearson Express. Transportation supports provided to employees include onsite bike racks, reimbursement for public transit passes (only for director-level employees and above, as well as onsite EV charging stations).					

(1) Includes permanent part-time employees.

(2) Includes all employees with a work schedule of 35 hours or greater per week.

(3) Percentages are based on total head count.

(4) Based on employees at all levels.

(5) Managers includes Manager level employees and above.

(6) Includes Vice Presidents and above.

(7) Data is unavailable or not collected for the reporting year.

(8) Executives include: the Chief Responsible Officer of DRM, the Chief Executive Officers of DIR.UN, D.UN, and DRR.U, the Portfolio Manager of MPCT.UN, the Chief Financial Officers of DRM, MPCT.UN, D.UN, DIR.UN and DRR.U as well as the Chief Operating Officers of D.UN, DIR.UN and DRR.U, without double counting individuals.

(9) DRR.U was launched on May 6, 2022.

(10) The demographic survey results were based on 422 anonymous participants in 2022 and 410 anonymous participants in 2023. Percentages were based on total headcount. Includes employees which selected multiple responses.

(11) Turnover is calculated as an average of percentage of employee headcount across Dream group of companies in noted category.

Dream Unlimited Corp.

Environmental

Methodology

Organizational Boundary

Dream Unlimited uses the operational control approach for sustainability reporting. Dream Unlimited energy, water, waste and GHG emissions inventory includes assets owned and operated as per the entities control approach. The baseline year for the organization is considered as 2019. Each year energy, GHG emissions, water, waste, building certification and energy rating data is based on the relevant properties with operational control that year unless otherwise stated.

Operational Boundary

Dream Unlimited measures and reports both scope 1 and 2 GHG emissions related to its activities across its value chain and is working to increase its reporting on Scope 3 emissions. Floor area square footage is based on gross leasable area ("GLA") as at the end of reporting year.

Whistleblower program	Number of whistleblower reports received	0	0	0	0	0
Conflicts of interest	See Code of Conduct, s. "Conflict of Interest", which sets out guidelines for directors and employees in respect of conflicts of interest and requires directors and employees to report conflicts of interest to supervisors or the Vice President of People and Culture (Human Resources), among other requirements. Section 4 of the Charter of Expectations for Directors further requires directors to bring to the attention of the chair of a board or committee meeting any conflict of interest that they identify, amongst other matters. DRM's Whistleblower Policy also includes conflicts of interest as one of the matters that is covered as a legitimate concern for whistleblowing, see page 1. In respect of disclosure of conflicts of interest, DRM's Disclosure Policy describes disclosure controls and procedures to ensure that DRM complies with all legal and regulatory requirements in respect of disclosure of information to the general public, which disclosure practices are overseen by DRM's Disclosure Committee. In addition, in respect of: (i), DRM discloses cross-board memberships in the Management Information Circular, see pages 11-18. Also see "Areas of Interlocking Directorships and Other Public Company Boards" at pages 26-17 of management information circular on cross-board memberships, annual evaluation of cross-board memberships regarding interlocks, and related approach to conflict of interest prevention and assessment; (ii) DRM does not disclose crossshareholding with suppliers, however should any shareholdings generate a conflict of interest, the applicable director or employee would need to disclose same to the applicable internal Dream entity (but not to external stakeholders) in accordance with DRM's Code of Conduct (see above); (iii) controlling shareholders of DRM are disclosed in the Management Information Circular, see page 8; (iv) DRM discloses transactions with related parties (and related amounts, description of transaction) quarterly in the Management Discussion and Analysis (MD&A), see note 24 to DRM's latest financial statements. Description of applicable relationships is also included in DRM's public disclosures, either at note 24 or elsewhere in the MD&A.					
Processes to remediate negative impacts	Grievance mechanisms	(1) The whistleblower policy establishes a procedure for DRM officers, directors, and employees to anonymously bring forward concerns or complaints regarding potential unethical or fraudulent business practices or any activity that could give rise to a financial concern (fraud, error, deficiency, etc. in respect of internal reporting controls or financial data). An independent service provider is available to receive and manage concerns and complaints, as well as other internal resources - see "Reporting a Violation or Breach of Code of Conduct"; (2) the Workplace Violence and Harassment Policy provides all workers with the guidelines to report any concerns regarding workplace violence or harassment. This policy applies to all activities that occur on premises or while engaging in DRM's business, activities or social events; (3) the Code of Conduct at section "Compliance and Reporting" requires reporting of any situation or incident that goes against the Code of Conduct, and sets out the mechanism for such reporting which includes reporting anonymously through the service provider. The Code of Conduct applies to all directors, officers, and employees; (4) corporate law allows shareholders to submit proposals to Dream Unlimited, which proposals are, where applicable, addressed at meetings of shareholders.				
Mechanisms for seeking advice and raising concerns	Whistleblower Policy and Code of Conduct. An annual email is sent to employees requiring an attestation that policies have been reviewed by each employee, and providing that any questions should be directed to the human resources department (People and Culture). The Dream Group of Companies also has an in-house legal counsel department that is also available to assist with questions that employees may have.					

(1) Includes data from assets: Distillery District, Broadview Hotel, Gladstone Hotel and Arapahoe Basin Ski Resort since their acquisition.
(2) Includes data from assets: Distillery District and Arapahoe Basin Ski Resort.
(3) Includes data from assets: Broadview Hotel and Gladstone Hotel.
(4) Includes data from assets: Distillery District.
(5) Indicator was not tracked during this period.
(6) As at December 31, 2023, "Assets under management ("AUM")" is the respective carrying value of gross assets managed by the Company on behalf of its clients, investors or partners under asset management agreements, development management agreements and/or management services agreements at 1 of the client's total assets. All other investments are reflected at the Company's proportionate share of the investment's total assets without duplication. Assets under management is a measure of success against the competition and consists of growth or decline due to asset appreciation, changes in fair market value, acquisitions and dispositions, operations gains and losses, and inflows and outflows of capital. Please refer to our Annual Report for more information.
(7) Includes employees employed by Dream Asset Management Corporation, which includes DRM, MPCT.UN and Canadian DRR.U employees, as well as employees of Dream European Advisors GmbH, Dream Netherlands Advisors B.V., Dream US Manager LLC). Does not include employees employed at Dream recreational properties, employees on leaves of absence (e.g., permanent disability, long-term disability, parental leave) interns and DRR.U employees
(8) Numbers represented as total headcount, not full-time equivalent
(9) Includes permanent part-time employees.
(10) Includes all employees with a work schedule of 35 hours or greater per week.
(11) Percentages are based on total head count.
(12) Based on employees at all levels.
(13) Managers includes Manager level employees and above.
(14) Includes Vice Presidents and above.
(15) Executives include: the Chief Responsible Officer and Chief Financial Officer of DRM.
(16) The value has been restated as a result of improved data quality.
(17) Turnover is calculated as a percentage of average employee headcount in noted category.
(18) Dream began collecting and disclosing health and safety data at company level as of January 1, 2023.
(19) The amount reported in 2023 includes payments of \$13,704,500 made by the Company in February 2024 for 2023 income taxes payable. (The amount reported in 2022 includes payments of \$232,500 made by the Company in February 2023 for 2022 income taxes payable). Please refer to Annual Reports for more details.

Dream Impact Trust

Environmental

Methodology

Organizational Boundary

Dream Impact Trust uses the operational control approach for sustainability reporting. Dream Impact Trust’s energy consumption, water usage, waste generation and GHG emissions inventory includes assets owned and operated as per the entities control approach. Assets, such as Sussex Center, where Dream Impact Trust has joint control with another Dream entity is included at 100%. The baseline year for the organization is considered as 2019. The boundary includes data for the full year or since the asset is operational unless otherwise stated. Floor area square footage is based on gross leasable area ("GLA") as at the end of reporting year.

Operational Boundary

Dream Impact Trust measures and reports both scope 1 and 2 emissions related to its activities across its value chain and has initiated reporting on Scope 3 emissions.

Interpretation of Scope 1, 2 and 3 GHG emissions

Scope	Included
Scope 1: Direct GHG emissions	Direct GHG emissions occur from sources that are owned or controlled by the company, for example, emissions from combustion in owned or controlled boilers, furnaces, vehicles, etc
Scope 2: Indirect GHG emissions	All indirect emissions that result from our activities and that occur at another location during the combustion of a primary energy source. Possible applications are electricity, heating and cooling (DH&C), steam, among others
Scope 3: Indirect GHG emissions	All indirect emissions that are generated as a consequence of the activities of the company, but occur from sources not owned or controlled by the company

Note on environmental performance indicators

Since 2019, Dream Impact Trust reports in accordance with The Greenhouse Gas Protocol - A Corporate Accounting and Reporting Standard (Revised Version –March 2004). The Protocol has been used to develop Dream Impact Trust's internal guidance documents on developing GHG emissions inventory. This provides a consistent manner in which Dream Impact Trust can measure and report its sustainability performance, contributing to transparency in sustainability reporting. For energy, water, waste and GHG emissions data coverage, it reports performance indicators according to their absolute performance and like-for-like performance.

- The absolute performance: The absolute indicators reflect the gross total of the available data for a specific period and utility.
- Like-for-like performance: The like-for-like indicators reflect the change in performance unrelated to fluctuations in portfolio size (consistent boundary). In Dream Impact Trust's reporting, only buildings with consumption data available for the base year are considered in the like-for-like boundary.

Indirect GHG emissions are reported according to the location-based accounting method. Dream Impact Trust continues to plan on expanding its reporting to market-based accounting method. In addition, intensity values for energy, water and GHG emissions include office-type assets which were operational for the full reporting year unless otherwise stated.

Description of how building energy management considerations are integrated into property investment analysis and operational strategy		Whether it is the investment into a new or existing income property, or throughout the ongoing operations and maintenance of owned income assets, MPCT.UN, through its asset and property managers, has project management and/or energy management teams review capital and operational spend to identify opportunities for net new, refurbishment, or value-add projects to contribute to the overall energy efficiency of the building, including through equipment selection, building automation, or tenant use and experience. Our teams consider whether capital or operational projects at an asset are minimizing tenant impact while reducing overall GHG and energy.

		Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	Dream encourages all employees to promote health, safety and wellbeing in the workplace. We all must comply with laws, as written and for their intended purpose. Employees are first introduced to the Health, Safety and Wellbeing Policy and Workplace Violence, Discrimination and Harassment policy during their orientation. During orientation, employees are also informed on their rights and instructed on how to comply with all government and legal requirements and industry standards in jurisdictions where we operate. Dream offers many other policies that are available to employees at all times and are reviewed with each employee annually. Consistent monitoring of our Health and Safety program ensures the internal responsibility system is in practice. Incidents and accidents are tracked and analyzed using multiple data inputs. Health and safety metrics are reviewed and compared to industry standards and benchmarks on an annual basis. Our results are analyzed, and an action plan is developed to mitigate common incidents. Joint Health and Safety Committees/Health and Safety Representatives review incident reports as well as establish and promote a safe work culture by holding regular meetings at our offices.				
Policy commitment to ensure product and service safety	Management's commitment to ongoing hazard assessment is promoted through workplace inspections, incident investigation and corrective actions. All incident reports are reported through the Incident/Injury Report Form available on the company website. During the reporting stage, the supervisor, in coordination with the Health and Safety Manager, will assess the scene, determine the root cause and provide any corrective actions that are needed. Management has taken on the responsibility to review all incident reports and review all Health and Safety Committee inspections and minutes.

Whistleblower program	Number of whistleblower reports received	0	0	0	0	0
Conflicts of interest	See Code of Conduct, s. "Conflict of Interest", which sets out guidelines for trustees and other representatives in respect of conflicts of interest and requires trustees and other representatives to report conflicts of interest to supervisors or the head of People and Culture (human resources), among other requirements. Section 4 of each of Dream Impact Trust's Charter of Expectations for Trustees and Dream Impact Master GP Inc.'s Charter of Expectations of Directors further require trustees or directors (as applicable) to bring to the attention of the chair of a committee or board meeting any conflict of interest that they identify, amongst other matters. The Whistleblower Policy also includes conflicts of interest as one of the matters that is covered as a legitimate concern for whistleblowing, see page 1. In respect of disclosure of conflicts of interest, the Disclosure Policy describes disclosure controls and procedures to ensure that compliance with all legal and regulatory requirements in respect of disclosure of information to the general public, which disclosure practices are overseen by the Disclosure Committee. In addition, in respect of: (i), MPCT.UN discloses cross-board memberships in the Management Information Circular, see pages 12-16. Also see "Areas of Interlocking Trusteeships" at page 25 of management information circular on cross board memberships regarding interlocks, annual evaluation of cross-board memberships, and related approach to conflict of interest prevention and assessment; (ii) MPCT.UN does not disclose cross shareholding with suppliers, however should any shareholdings generate a conflict of interest, the applicable trustee or employee would need to disclose same to the applicable internal Dream entity (but not to external stakeholders) in accordance with the Code of Conduct (see above); (iii) controlling unitholders of Dream Impact Trust are disclosed in the Management Information Circular, see page 7; (iv) MPCT.UN discloses transactions with related parties (and related amounts, description of transaction) quarterly in the Management Discussion and Analysis (MD&A), see section 2.4. Description of applicable relationships is also included in public disclosures, either at section 2.4 of the MD&A or elsewhere in the MD&A.					
Processes to remediate negative impacts	Grievance mechanisms	(1) The whistleblower policy establishes a procedure for officers, directors, trustees, and employees of Dream Impact Trust, Dream Asset Management Corporation (the asset manager of Dream Impact Trust), Dream Impact Master GP Inc. and Dream Impact Master LP to anonymously bring forward concerns or complaints regarding potential unethical or fraudulent business practices or any activity that could give rise to a financial concern (fraud, error, deficiency, etc. in respect of internal reporting controls or financial data). An independent service provider is available to receive and manage concerns and complaints, as well as other internal resources - see "Reporting a Violation or Breach of Code of Conduct"; (2) the Workplace Violence and Harassment Policy provides all workers with the guidelines to report any concerns regarding workplace violence or harassment. This policy applies to all activities that occur on the premises or while engaging in MPCT.UN's business, activities or social events; (3) the Code of Conduct at section "Compliance and Reporting" requires reporting of any situation or incident that goes against the Code of Conduct and sets out the mechanism for such reporting which includes reporting anonymously through the service provider. The Code of Conduct applies to all trustees, directors, officers and employees of each of Dream Impact Trust, Dream Asset Management Corporation (the asset manager of Dream Impact Trust), Dream Impact Master GP Inc. and Dream Impact Master LP; (4) the declaration of trust of Dream Impact Trust allows unitholders holding a certain percentage of units to submit proposals for consideration at special meetings of unitholders (see section 6.2 of Declaration of Trust).				
Mechanisms for seeking advice and raising concerns	Whistleblower Policy and Code of Conduct. An annual email is sent to employees requiring an attestation that policies have been reviewed by each employee, and providing that any questions should be directed to the human resources department (People and Culture). The Dream Group of Companies also has an in-house legal counsel department that is also available to assist with questions that employees may have.					

(1) Unless stated differently, the value represents data of assets including 349 Carlaw, 49 Ontario, 10 Lower Spadina, and Sussex Centre. It excludes 76 Stafford, Weston Common, 68-70 Claremont, Plaza Imperial, Plaza Bathurst, Robinwood Portfolio, 262 Jarvis, 100 Steeles Ave W, Zibi Block 211 and Zibi Block 2-3 as the assets were not under operational control.

(2) Unless stated differently, the value represents data of assets including 349 Carlaw, 49 Ontario, 10 Lower Spadina, and Sussex Centre, as well as 76 Stafford, Weston Common, 262 Jarvis and Zibi Block 2-3 since its acquisition or commencement. It excludes 68-70 Claremont, Plaza Imperial, Plaza Bathurst, Robinwood Portfolio, 100 Steeles Ave W and Zibi Block 211 as the assets were not under operational control.

(3) Unless stated differently, the value represents data of 349 Carlaw, 49 Ontario, 10 Lower Spadina, Sussex Centre Zibi Block 211, Zibi Block 2/3, Zibi Block 208 72-82 Berkley St, Zibi Block 10 (Alto) , Weston Common, Robinwood portfolio, 111 Cosburn, 262 Jarvis and 70 Park since the date of their operations control under Dream Impact Trust.

(4) Unless stated differently, the value represents data of 349 Carlaw, 49 Ontario, 10 Lower Spadina, Sussex Centre Zibi Block 211, 76 Stafford, Zibi Block 2/3, Zibi Block 208, 72-82 Berkley St, Zibi Block 10 (Alto) , Weston Common, Robinwood portfolio, 111 Cosburn, 262 Jarvis, 70 Park and 786 Southwood since the date of their operations control under Dream Impact Trust.

(5) Data aggregation and reporting was not conducted for this year.

(6) Only includes office-type assets operational for full reporting year.

(7) The significant increase in 2023 is due to improved data quality and better inputs to the hydrological model of Aqueduct Water Risk Atlas tool.

(8) Waste data is from the following assets 349 Carlaw, 49 Ontario and 10 Lower Spadina.

(9) Represents data of assets including 349 Carlaw, 49 Ontario, 10 Lower Spadina, Sussex Centre and Zibi Block 2-3 since its acquisition or commencement.

(10) Represents data of office-type assets including 349 Carlaw, 49 Ontario, 10 Lower Spadina, Sussex Centre, 76 Stafford St, Zibi Block 211, Zibi Block 208 and Zibi Block 2/3 since the asset is under operation control.

(11) Data coverage is calculated based on GLA.

(12) Represents the percentage based on GLA sf using ENERGY STAR Portfolio Manager (ESPM).

(13) Includes employees employed by Dream Asset Management Corporation, which includes DRM, MPCT.UN and Canadian DRR.U employees, as well as employees of Dream European Advisors GmbH, Dream Netherlands Advisors B.V., Dream US Manager LLC). Does not include employees employed at Dream recreational properties, employees on leaves of absence (e.g., permanent disability, long-term disability, parental leave) interns and DRR.U employees of Pauls Corp.

(14) Numbers represented as total headcount, not full-time equivalent.

(15) Includes permanent part-time employees.

(16) Includes all employees with a work schedule of 35 hours or greater per week.

(17) Percentages are based on total head count.

(18) Based on employees at all levels.

(19) Managers includes Manager level employees and above.

(20) Includes Vice Presidents and above.

(21) Executives include: the Portfolio Manager and Chief Financial Officer of MPCT.UN.

(22) Turnover is calculated as a percentage of average employee headcount in noted category.

Dream Office REIT

Environmental

Methodology

Organizational Boundary

Dream Office REIT uses the operational control approach for sustainability reporting. Dream Office REIT's energy consumption, water usage, waste generation and GHG emissions inventory includes assets owned and operated as per the entities control approach. Assets, such as Sussex Center, where Dream Office REIT has joint control with another Dream entity is included at 100%. The baseline year for the organization is considered as 2019. The boundary includes data for the full year or since the asset is operational unless otherwise stated. Floor area square footage is based on gross leasable area ("GLA") as at the end of reporting year.

Operational Boundary

Dream Office REIT measures and reports both scope 1 and 2 emissions related to its activities across its value chain and has initiated reporting on Scope 3 emissions.

Interpretation of Scope 1, 2 and 3 GHG emissions

Scope	Included
Scope 1: Direct GHG emissions	Direct GHG emissions occur from sources that are owned or controlled by the company, for example, emissions from combustion in owned or controlled boilers, furnaces, vehicles, etc
Scope 2: Indirect GHG emissions	All indirect emissions that result from our activities and that occur at another location during the combustion of a primary energy source. Possible applications are electricity, heating and cooling (DH&C), steam, among others
Scope 3: Indirect GHG emissions	All indirect emissions that are generated as a consequence of the activities of the company, but occur from sources not owned or controlled by the company

Note on environmental performance indicators

Since 2019, Dream Office REIT reports in accordance with The Greenhouse Gas Protocol-A Corporate Accounting and Reporting Standard (Revised Version -March 2004). The Protocol has been used to develop Dream Office REIT's internal guidance documents on developing GHG emissions inventory. This provides a consistent manner in which it can measure and report its sustainability performance, contributing to transparency in sustainability reporting.

For energy, water, waste and GHG emissions data coverage, Dream Office REIT reports performance indicators according to their absolute performance and like-for-like performance.

- The absolute performance: The absolute indicators reflect the gross total of the available data for a specific period and utility.
- Like-for-like performance: The like-for-like indicators reflect the change in performance unrelated to fluctuations in portfolio size (consistent boundary). In Dream Office REIT's reporting, only buildings with consumption data available for the base year are considered in the like-for-like boundary.

Indirect GHG emissions are reported according to the location-based accounting method. Dream Office REIT continues to plan on expanding its reporting to market-based accounting method. In addition, intensity values for energy, water and GHG emissions include office-type assets which were operational for the full reporting year unless otherwise stated.

Description of how building energy management considerations are integrated into property investment analysis and operational strategy		Whether it is the investment into a new or existing income property, or throughout the ongoing operations and maintenance of owned income or managed assets, Dream Office's project management and/or energy management teams review capital and operational spend to identify opportunities for net new, refurbishment, or value-add projects to contribute to the overall energy efficiency of the building, including through equipment selection, building automation, or tenant use and experience. Our teams consider whether capital or operational projects at an asset are minimizing tenant impact while reducing overall GHG and energy.

	Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	Dream encourages all employees to promote health, safety and wellbeing in the workplace. We all must comply with laws, as written and for their intended purpose. Employees are first introduced to the Health, Safety and Wellbeing Policy and Workplace Violence, Discrimination and Harassment policy during their orientation. During orientation, employees are also informed on their rights and instructed on how to comply with all government and legal requirements and industry standards in jurisdictions where we operate. Dream offers many other policies that are available to employees at all times and are reviewed with each employee annually. Consistent monitoring of our Health and Safety program ensures the internal responsibility system is in practice. Incidents and accidents are tracked and analyzed using multiple data inputs. Health and safety metrics are reviewed and compared to industry standards and benchmarks on an annual basis. Our results are analyzed, and an action plan is developed to mitigate common incidents. Joint Health and Safety Committees/Health and Safety Representatives review incident reports					
Policy commitment to ensure product and service safety	Management's commitment to ongoing hazard assessment is promoted through workplace inspections, incident investigation and corrective actions. All incident reports are reported through the Incident/Injury Report Form available on the company website. During the reporting stage, the supervisor, in coordination with the Health and Safety Manager, will assess the scene, determine the root cause and provide any corrective actions that are needed. Management has taken on the responsibility to review all incident reports and review all Health and Safety Committee inspections and minutes.

Whistleblower program	Number of whistleblower reports received	0	0	0	0	0
Conflicts of interest	See Code of Conduct, s. "Conflict of Interest", which sets out guidelines for trustees and employees in respect of conflicts of interest and requires trustees and employees to report conflicts of interest to supervisors or the head of People and Culture (human resources), among other requirements. Section 4 of the Charter of Expectations for Trustees further requires trustees to bring to the attention of the chair of a board or committee meeting any conflict of interest that they identify, amongst other matters. The Whistleblower Policy also includes conflicts of interest as one of the matters that is covered as a legitimate concern for whistleblowing, see page 1. In respect of disclosure of conflicts of interest, the Disclosure Policy describes disclosure controls and procedures to ensure compliance with all legal and regulatory requirements in respect of disclosure of information to the general public, which disclosure practices are overseen by the Disclosure Committee. In addition, in respect of: (i), D.UN discloses cross-board memberships in its Management Information Circular, see pages 14-20; Also see "Areas of Interlocking Trusteeships and Other Public Company Boards" at page 36 of management information circular on cross board memberships regarding interlocks, annual evaluation of cross-board memberships, and related approach to conflict of interest prevention and assessment; (ii) D.UN does not disclose cross-shareholding with suppliers, however should any shareholdings generate a conflict of interest, the applicable trustee or employee would need to disclose same to the applicable internal Dream entity (but not to external stakeholders) in accordance with the Code of Conduct (see above); (iii) controlling unitholders of D.UN are disclosed in the Management Information Circular, see page 11; (iv) D.UN discloses transactions with related parties (and related amounts, description of transaction) quarterly in the Management Discussion and Analysis (MD&A), see "Related party transactions" section. Description of applicable relationships is also included in public disclosures, either at "Related party transactions" section or elsewhere in the MD&A.					
Processes to remediate negative impacts	Grievance mechanisms	(1) The whistleblower policy establishes a procedure for officers, trustees, and employees to anonymously bring forward concerns or complaints regarding potential unethical or fraudulent business practices or any activity that could give rise to a financial concern (fraud, error, deficiency, etc. in respect of internal reporting controls or financial data). An independent service provider is available to receive and manage concerns and complaints, as well as other internal resources - see "Reporting a Violation or Breach of Dream Office's Code of Conduct"; (2) the Workplace Violence and Harassment Policy provides all workers with the guidelines to report any concerns regarding workplace violence or harassment. This policy applies to all activities that occur on the premises or while engaging in D.UN's business, activities, or social events; (3) the Code of Conduct at section "Compliance and Reporting" requires reporting of any situation or incident that goes against the Code of Conduct and sets out the mechanism for such reporting which includes reporting anonymously through the service provider. The Code of Conduct applies to all trustees, officers and employees; (4) the declaration of trust of D.UN allows unitholders holding a certain percentage of units to submit proposals for consideration at special meetings of unitholders (see section 6.2 of Declaration of Trust);				
Mechanisms for seeking advice and raising concerns	Whistleblower Policy and Code of Conduct. An annual email is sent to employees requiring an attestation that policies have been reviewed by each employee, and providing that any questions should be directed to the human resources department (People and Culture). The Dream Group of Companies also has an in-house legal counsel department that is also available to assist with questions that employees may have.					

(1) Data aggregation and reporting was not conducted for this year.

(2) The value has been restated as a result of improved data quality management practices.

(3) Projected energy reductions based on engineering calculations.

(4) Represents percentage of portfolio by GLA. The significant increase in 2023 is due to improved data quality and better inputs to the hydrological model of Aqueduct Water Risk Atlas tool.

(5) Represents only Canadian portfolio.

(6) Represents the percentage of portfolio based on sf using ENERGY STAR Portfolio Manager (ESPM).

(7) Includes only employees 100% dedicated to Dream Office REIT and shared services functions for the Dream entities. Excludes employees on unpaid leaves of absence (e.g., permanent disability, long-term disability, parental leave) and interns.

(8) Numbers represented as total headcount, not full-time equivalent.

(9) Includes permanent part-time employees.

(10) Includes all employees with a work schedule of 35 hours or greater per week.

(11) Percentages are based on total head count.

(12) Based on employees at all levels.

(13) Managers include Manager level and above.

(14) Includes Vice Presidents and above.

(15) Dream began collecting and disclosing gender data for senior management as of January 1, 2022.

(16) Executives include: the Chief Executive Officer, Chief Financial Officer, and Chief Operating Officer of D.UN.

(17) Turnover is calculated as a percentage of average employee headcount in noted category.

Dream Industrial REIT

Environmental

Methodology

Organizational Boundary

Dream Industrial uses the operational control approach for sustainability reporting. Dream Industrial's energy consumption, water usage, and GHG emissions inventory includes assets owned and operated as per the entities control approach. The baseline year for the organization is considered as 2019. As Dream Industrial does not have direct control over waste generated by its tenants, the organizational boundary of waste generation covers corporate and regional offices where Dream Industrial's employees are responsible for waste generation. The boundary includes data for the full year or since the asset is operational unless otherwise stated. Floor area square footage is based on gross leasable area ("GLA").

Operational Boundary

Dream Industrial REIT measures and reports both scope 1 and 2 emissions related to its activities across its value chain and has been progressing on Scope 3 data collection.

Interpretation of Scope 1, 2 and 3

Scope	Included
Scope 1: Direct GHG emissions	Direct GHG emissions occur from sources that are owned or controlled by the company, for example, emissions from combustion in owned or controlled boilers, furnaces, etc
Scope 2: Indirect GHG emissions	All indirect emissions that result from our activities and that occur at another location during the combustion of a primary energy source. Possible applications are electricity, district heating and cooling ("DH&C"), steam, among others
Scope 3: Indirect GHG emissions	All indirect emissions that are generated as a consequence of the activities of the company, but occur from sources not owned or controlled by the company

Note on environmental performance indicators

Since 2019, Dream Industrial reports in accordance with The Greenhouse Gas Protocol-A Corporate Accounting and Reporting Standard (Revised Version -March 2004). The Protocol has been used to develop Dream Industrial's internal guidance documents on developing GHG emissions inventory. This provides a consistent manner in which Dream Industrial can measure and report its sustainability performance, contributing to transparency in sustainability reporting.

For energy, water, waste and GHG emissions data coverage, Dream Industrial reports performance indicators according to their absolute performance and like-for-like performance.

- The absolute performance: The absolute indicators reflect the gross total of the available data for a specific period and utility.
- Like-for-like performance: The like-for-like indicators reflect the change in performance unrelated to fluctuations in portfolio size (consistent boundary). In Dream's reporting, only buildings with consumption data available for the base year are considered in the like-for-like boundary.

Indirect GHG emissions are reported according to the location-based accounting method. Dream Industrial continues to plan on expanding its reporting to market-based accounting method. As most of the energy, water and GHG emissions (Scope 1 and 2) are from common area and exterior area of the asset, Dream Industrial have not calculated and reported intensity values for the respective indicators. Intensity disclosure continues to be a challenge for industrial asset class as there is a mismatch between numerator and denominator. Dream Industrial continues to work with reporting agencies and our industry peers to adopt industry best practices. Dream Industrial's environmental data is absolute metrics for the years ended December 31 and is not normalized for occupancy and weather.

Corporate Offices

Dream Industrial has 12 offices globally including offices that are shared with other entities of the Dream group of companies as well as Dream Industrial joint ventures. Out of 12 offices, Dream Industrial has 9 offices under its organizational boundary. Four out of 9 regional offices are included in the landlord-controlled area i.e. Property Portfolio Indicators (Dream Industrial's Scope 1 and 2 GHG emissions). The remaining 5 offices are leased from other landlords i.e. Corporate Offices Indicators (upstream leased assets) where Dream Industrial does not have operational control. This approach prevents risks of double counting.

The data coverage calculated for corporate office is based on number of allocated seats and the data is prorated based on data of whole building. 2023 is the first year of reporting of corporate office data. As Dream Industrial continues to collect annual data, it intends to conduct year-over-year analysis going forward.

Corporate Offices Indicators - Energy⁽¹⁾

	Data Coverage (%)	95%
Total weight of waste sent to landfill	Tonnes	1.67
Total weight of waste diverted from landfill	Tonnes	1.16
Waste diversion rate		41%

Property Portfolio Indicators

Data Collection Methodology

In 2023, Dream Industrial initiated a meter level operational control assessment exercise in order to improve data accuracy which is in alignment with the GHG Protocol. The exercise determined operational control as at December 31, 2023 and resulted in a change in operational control determination of a few properties from landlord controlled to tenant controlled and vice versa. Dream Industrial's portfolio undergoes changes every year that cause significant year-to-year variances in environmental data, including energy consumption, GHG emissions and water consumption. For absolute data values, the variances can be caused by acquisitions, dispositions, redevelopments, tenant vacancies, change in tenant user types (e.g. from more emissions intensive to less emissions intensive tenant businesses), change in grid emission factors, change in approach to determine operational control at a utility meter level and other common factors. Across 300+ assets, these factors cause significant fluctuations impacting comparability across periods.

Description of how building energy management considerations are integrated into property investment analysis and operational strategy.	Whether it is the investment into a new or existing property, or throughout the ongoing operations and maintenance of our owned or managed assets, our project management and/or energy management teams review capital and operational spend to identify opportunities any net new, refurbishment, or value-add projects are adding to the overall energy efficiency of the building, whether its equipment selection, building automation, or tenant use and experience. Our teams consider whether capital or operational projects within an asset are minimizing tenant impact while reducing overall GHG and energy utilization.

	Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	Dream encourages all employees to promote health, safety and wellbeing in the workplace. We all must comply with laws, as written and for their intended purpose. Employees are first introduced to the Health, Safety and Wellbeing Policy and Workplace Violence, Discrimination and Harassment policy during their orientation. During orientation, employees are also informed on their rights and instructed on how to comply with all government and legal requirements and industry standards in jurisdictions where we operate. Dream offers many other policies that are available to employees at all times and are reviewed with each employee annually. Consistent monitoring of our Health and Safety program ensures the internal responsibility system is in practice. Incidents and accidents are tracked and analyzed using multiple data inputs. Health and safety metrics are reviewed and compared to industry standards and benchmarks on an annual basis. Our results are analyzed, and an action plan is developed to mitigate common incidents. Joint Health and Safety Committees/Health and Safety Representatives review incident reports as well as establish and promote a safe work culture by holding regular meetings at our offices.					
	Policy commitment to ensure product and service safety	Management's commitment to ongoing hazard assessment is promoted through workplace inspections, incident investigation and corrective actions. All incident reports are reported through the Incident/Injury Report Form available on the company website. During the reporting stage, the supervisor, in coordination with the Health and Safety Manager, will assess the scene, determine the root cause and provide any corrective actions that are needed. Management has taken on the responsibility to review all incident reports and review all Health and Safety Committee inspections and minutes.

Whistleblower program	Number of whistleblower reports received	0	0	0	0	0
Conflicts of interest	See Code of Conduct, s. "Conflict of Interest", which sets out guidelines for trustees and employees in respect of conflicts of interest and requires trustees and employees to report conflicts of interest to supervisors or the head of People and Culture (human resources), among other requirements. Section 4 of the Charter of Expectations for Trustees further requires trustees to bring to the attention of the chair of a board or committee meeting any conflict of interest that they identify, amongst other matters. The Whistleblower Policy also includes conflicts of interest as one of the matters that is covered as a legitimate concern for whistleblowing, see page 1. In respect of disclosure of conflicts of interest, the Disclosure Policy describes disclosure controls and procedures to ensure compliance with all legal and regulatory requirements in respect of disclosure of information to the general public, which disclosure practices are overseen by the Disclosure Committee. In addition, in respect of: (i) discloses cross-board memberships in the Management Information Circular, see pages 10-17; Also see "Areas of Interlocking Trusteeships and Other Public Company Boards" at pages 22-23 of management information circular on cross board memberships regarding interlocks, annual evaluation of cross-board memberships, and related approach to conflict of interest prevention and assessment; (ii) does not disclose cross-shareholding with suppliers, however should any shareholdings generate a conflict of interest, the applicable trustee or employee would need to disclose same to the applicable internal Dream entity (but not to external stakeholders) in accordance with the Code of Conduct (see above); (iii) controlling unitholders of Dream Industrial REIT are disclosed in the Management Information Circular, see page 7; (iv) we disclose transactions with related parties (and related amounts, description of transaction) quarterly in our Management Discussion and Analysis (MD&A), see "Related party transactions" section. Description of applicable relationships is also included in our public disclosures, either at "Related party transactions" section or elsewhere in the MD&A.					
Processes to remediate negative impacts	Grievance mechanisms	(1) The whistleblower policy establishes a procedure for officers, trustees, and employees to anonymously bring forward concerns or complaints regarding potential unethical or fraudulent business practices or any activity that could give rise to a financial concern (fraud, error, deficiency, etc. in respect of internal reporting controls or financial data). An independent service provider is available to receive and manage concerns and complaints, as well as other internal resources - see "Reporting a Violation or Breach of Code of Conduct"; (2) the Workplace Violence and Harassment Policy provides all workers with the guidelines to report any concerns regarding workplace violence or harassment. This policy applies to all activities that occur on the premises or while engaging in DIR.UN's business, activities, or social events; (3) the Code of Conduct at section "Compliance and Reporting" requires reporting of any situation or incident that goes against the Code of Conduct and sets out the mechanism for such reporting which includes reporting anonymously through the service provider. The Code of Conduct applies to all trustees, officers and employees; (4) the declaration of trust of Dream Industrial REIT allows unitholders holding a certain percentage of units to submit proposals for consideration at special meetings of unitholders (see section 6.2 of Declaration of Trust);				
Mechanisms for seeking advice and raising concerns	Whistleblower Policy and Code of Conduct. An annual email is sent to employees requiring an attestation that policies have been reviewed by each employee, and providing that any questions should be directed to the human resources department (People and Culture). The Dream Group of Companies also has an in-house legal counsel department that is also available to assist with questions that employees may have.					

(1) Represents energy consumption outside organizational control.
(2) Excludes joint ventures, such as U.S. Fund and Dream Summit JV.
(3) Excludes data from asset(s) in European portfolio for 2019, 2020, 2021 and 2022 and from assets in Germany and Spain for 2023 due to lack of data availability.
(4) Please refer to Dream's 2022 Sustainability Report for more details on historic data coverage.
(5) Data aggregation and reporting was not conducted for this year.
(6) Includes estimations and third-party and tenant-owned systems on DIR.UN's properties.
(7) Approximately 76% of the annual MWh of renewable energy produced is from tenant-owned/third-party owned solar panels whereas the remaining 24% is from panels owned by DIR.UN.
(8) Approximately 52% of the annual MWh of renewable energy produced is from tenant-owned/third-party owned solar panels whereas the remaining 48% is from panels owned by DIR.UN.
(9) The total capacity includes DIR.UN-owned solar PV systems with capacity of 10,701 kW and third-party or tenant-owned solar PV systems capacity of 8,788 kW.
(10) The total capacity includes DIR.UN-owned solar PV systems with capacity of 14,197 kW and third-party or tenant-owned solar PV systems capacity of 11,489 kW.
(11) The total square footage 4,310,184 sf includes DIR.UN owned solar PV systems covering 2,492,538 sf and third-party or tenant-owned solar PV systems covering 1,817,645 sf.
(12) The total square footage 5,977,236 sf includes DIR.UN owned solar PV systems covering 2,880,205 sf and third-party or tenant-owned solar PV systems covering 3,097,031 sf.
(13) Calculated based on number of tenants, not leased area.
(14) Excludes data from asset(s) in European portfolio for 2019, 2020, 2021, 2022 and 2023.
(15) Data is collected from 46 buildings in Calgary.
(16) Represents percentage of portfolio by GLA. The significant increase in 2023 is due to improved data quality and better inputs to the hydrological model of Aqueduct Water Risk Atlas tool.
(17) Represents the percentage of portfolio based on sf using ENERGY STAR Portfolio Manager (ESPM), have an EPC label or have an energy certificate.
(18) Year over year drop is the result of increase in total gross leasable area (GLA) of the portfolio.
(19) Includes EV charging stations installed or operated by tenants or third parties.
(20) Includes only employees 100% dedicated to DIR.UN (including Dream Industrial Europe Advisors Coöperatieve UA, Dream Industrial Netherlands Property Management B.V., Dream France Advisors SAS, Dream Summit Industrial Management Corp) and excludes employees on unpaid leaves of absence (e.g., permanent disability, long-term disability, parental leave) and interns.
(21) Numbers represented as total headcount, not full-time equivalent.
(22) Includes permanent part-time employees.
(23) Includes all employees with a work schedule of 35 hours or greater per week.
(24) Percentages are based on total headcount.
(25) Includes employees at all levels.
(26) Managers include Manager level and above.
(27) Includes Vice Presidents and above.
(28) Dream began collecting and disclosing gender data for senior management as of January 1, 2022.
(29) The Chief Executive Officer, Chief Financial Officer and Chief Operating Officer of DIR.UN are employees of Dream Asset Management Corporation. However, for the purposes of this report they are included here under DIR.UN.
(30) Turnover is calculated as a percentage of average employee headcount.

Dream Residential REIT

Environmental⁽¹⁾

Methodology

Organizational Boundary

Dream Residential uses the operational control approach for sustainability reporting. Dream Residential's energy consumption, water usage, and GHG emissions inventory includes assets owned and operated as per the entities control approach. The boundary includes data for the full year or since the asset is operational unless otherwise stated. Floor area square footage is based on gross leasable area ("GLA"). As DRR.U was incorporated in May 2022, the 2022 data is from May 2022 to December 2022.

Operational Boundary

Dream Residential measures and reports scope 1, 2 and 3 emissions resulting from the operation of its properties.

Interpretation of Scope 1, 2 and 3 GHG emissions

Scope	Included
Scope 1: Direct GHG emissions	Direct GHG emissions occur from sources that are owned or controlled by the company, for example, emissions from combustion in owned or controlled boilers and furnaces
Scope 2: Indirect GHG emissions	All indirect emissions that result from our activities and that occur at another location during the combustion of a primary energy source. Possible applications are electricity consumption by the properties
Scope 3: Indirect GHG emissions	All indirect emissions that are generated as a consequence of the activities of the company, but occur from sources not owned or controlled by the company

Note on environmental performance indicators

Since its first year of reporting in 2022, Dream Residential reports in accordance with The Greenhouse Gas Protocol-A Corporate Accounting and Reporting Standard (Revised Version –March 2004). The Protocol has been used to develop Dream Residential's internal guidance documents on developing GHG emissions inventory. This provides a consistent manner in which Dream Residential can measure and report its sustainability performance, contributing to transparency in sustainability reporting.

Indirect GHG emissions are reported according to the location-based accounting method. Dream Residential continues to plan on expanding its data coverage for its GHG scope 3 emissions.

Energy Indicators

Content		2022	2023
Total fuel consumption	ekWh	2,202,424	4,492,275

Conflicts of interest	See Code of Conduct, s. "Conflict of Interest", which sets out guidelines for trustees and employees in respect of conflicts of interest and requires trustees and employees to report conflicts of interest to a manager or in the case of trustees and officers, to the Board of Trustees, among other requirements. Section 4 of the draft Charter of Expectations for Trustees (which is expected to be implemented for Dream Residential REIT in February 2023) further requires trustees to bring to the attention of the chair of a board or committee meeting any conflict of interest that they identify, amongst other matters. The Whistleblower Policy also includes conflicts of interest as one of the matters that is covered as a legitimate concern for whistleblowing, see page 1. In respect of disclosure of conflicts of interest, the Disclosure Policy describes disclosure controls and procedures to ensure compliance with all legal and regulatory requirements in respect of disclosure of information to the general public, which disclosure practices are overseen by the Disclosure Committee. In addition, in respect of: (i), DRR.U discloses cross-board memberships in the Management Information Circular at pages 10-14; (ii) DRR.U does not disclose cross-shareholding with suppliers, however should any shareholdings generate a conflict of interest, the applicable trustee or employee would need to disclose same to the applicable internal Dream entity (but not to external stakeholders) in accordance with the Code of Conduct (see above); (iii) the principal unitholders of Dream Residential REIT are set out at page 7 of the Management Information Circular; (iv) DRR.U discloses transactions with related parties (and related amounts, description of transaction) quarterly in the Management Discussion and Analysis ("MD&A), see "Related party transactions" section. Description of applicable relationships is also included in public disclosures, either at "Related party transactions" section or elsewhere in the MD&A.		
Mechanisms for seeking advice and raising concerns	Whistleblower Policy and Code of Conduct. An annual email is sent to employees requiring an attestation that policies have been reviewed by each employee, and providing that any questions should be directed to the human resources department (People and Culture). Dream also has an in-house legal counsel department that is also available to assist with questions that employees may have.		

(1) Each year energy, GHG emissions and water data is based on the relevant properties with operational control that year unless otherwise stated. Floor area square footage is based on gross leasable area (GLA) as at the end of reporting year.
 (2) Represents data from vacant and tenant units.
 (3) Represents data from Scope 3 Category 13 (downstream-leased assets).
 (4) Indicator was not tracked for the period.
 (5) Based on DRR.U employees of Pauls Corp.

	GRI 2-13 Delegation of responsibility for managing impacts	Dream Unlimited's board has delegated responsibility for sustainability and ESG matters generally to Governance, Environmental and Nominating Committee . The committee provide oversight of the ESG Executive Committee, which is responsible for adopting the ESG framework, communicating sustainability strategy and commitment across the company and to key external stakeholders. The ESG Executive Committee delegates responsibility of managing portfolio sustainability initiatives including building certifications, energy, water and waste management and monitoring, as well as strategic initiatives. The Sustainability and ESG team meet quarterly with the ESG Executive Committee.	Governance on page 59
	GRI 2-14 Role of the highest governance body in sustainability reporting		Governance on page 59
	GRI 2-15 Conflicts of interest	Dream Unlimited is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of directors. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that are communicated to each board.	Governance on page 59
	GRI 2-16 Communication of critical concerns	Dream Unlimited is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of directors or Board of Trustees of each such entity. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that were communicated to each board.	Governance on page 59
	GRI 2-17 Collective knowledge of the highest governance body	Dream Unlimited in advance of our net zero commitments, we conducted executive engagement on GHG accounting, what net zero means for our business and general ESG emerging trends. In addition, we also completed, in alignment with the TCFD, our first climate change scenario analysis and board training on ESG matters.	Governance on page 59
	GRI 2-18 Evaluation of the performance of the highest governance body	The Governance Committee of Dream Unlimited has been delegated the task of overseeing and assisting management in developing systems and procedures to monitor and track performance on ESG goals, initiatives and commitments. Each governance committee is also tasked with recommending changes to its own committee charter and to its applicable board's mandate, which covers ESG matters. The governance charter of Dream Unlimited recently amended by the board in early 2022 at the recommendation of the governance committee. Such amendments included the expansion of the scope of responsibility of governance committee in respect of ESG matters. Please see the respective charter of the governance committee for further details on ESG scope.	
GRI 2-19 Remuneration policies	Please see pages 37-58 in the March 2024 Annual Information Form and pages 37, 41-82 in the April 2024 Notice of Annual Meeting of Shareholders and Management Information Circular . In respect of ESG objectives and performance, the Organization Design and Culture Committee, which was delegated with reviewing and making recommendations on executive compensation to the Board, must consider the achievement of any applicable ESG goals in making such recommendations (see Organization Design and Culture Committee Charter at s. 11.)		
GRI 2-20 Process to determine remuneration	Compensation is discussed in applicable sections of Notice of Annual Meeting of Shareholders and Management Information Circular .		
GRI 2-27 Compliance with laws and regulations	No material instances of non-compliance with laws and regulations were identified during the reporting period.

	GRI 2-9 Governance structure and composition	Please see page 26 in the March 2024 of Annual Information Form and page 29 in the April 2024 Annual Meeting Notice and Management Information Circular .	
	GRI 2-10 Nomination and selection of the highest governance body	Dream Impact Trust is a public entity and its board of trustees are elected yearly by the entity's shareholders or unitholders. Each board is responsible for establishing its committees.	
	GRI 2-11 Chair of the highest governance body	Please see page 21 in the March 2024 Annual Information Form and page 43-44 in the April 2024 Annual Meeting Notice and Management Information Circular .	
	GRI 2-12 Role of the highest governance body in overseeing the management of impacts	Overseeing approach to environmental, social, governance, and impact investing matters; The board of Dream Impact Trust have delegated such oversight to Governance, Environmental and Nominating Committee .	
	GRI 2-13 Delegation of responsibility for managing impacts	Dream Impact Trust's board has delegated responsibility for sustainability and ESG matters generally to Governance, Environmental and Nominating Committee . The committee provide oversight of the ESG Executive Committee, which is responsible for adopting the ESG framework, communicating sustainability strategy and commitment across the company and to key external stakeholders. The ESG Executive Committee delegates responsibility of managing portfolio sustainability initiatives including building certifications, energy, water and waste management and monitoring, as well as strategic initiatives. The Sustainability and ESG team meet quarterly with the ESG Executive Committee.	
	GRI 2-14 Role of the highest governance body in sustainability reporting		Governance page 82
	GRI 2-15 Conflicts of interest	Dream Impact Trust is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of trustees. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that are communicated to each board.	Governance page 82
	GRI 2-16 Communication of critical concerns	Dream Impact Trust is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of trustees or Board of Trustees of each such entity. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that were communicated to each board.	Governance page 82
	GRI 2-17 Collective knowledge of the highest governance body	Dream Impact Trust in advance of our net zero commitments, we conducted executive engagement on GHG accounting, what net zero means for our business and general ESG emerging trends. In addition, we also completed, in alignment with the TCFD, our first climate change scenario analysis and board training on ESG matters.	Governance page 82
	GRI 2-18 Evaluation of the performance of the highest governance body	The Governance Committee of Dream Impact Trust has been delegated the task of overseeing and assisting management in developing systems and procedures to monitor and track performance on ESG goals, initiatives and commitments. Each governance committee is also tasked with recommending changes to its own committee charter and to its applicable board's mandate, which covers ESG matters. The governance charter of Dream Impact Trust recently amended by the board in early 2022 at the recommendation of the governance committee. Such amendments included the expansion of the scope of responsibility of governance committee in respect of ESG matters. Please refer to Governance, Environmental and Nominating Committee Charter .	
GRI 2-19 Remuneration policies	Please see page 11 in Declaration of Trust and page 47-63 in the April 2024 Annual Meeting Notice and Management Information Circular .		
GRI 2-20 Process to determine remuneration	Compensation is discussed on page 61 of Annual Meeting Notice and Management Information Circular .		
GRI 2-27 Compliance with laws and regulations	No material instances of non-compliance with laws and regulations during the reporting period.

	GRI 2-10 Nomination and selection of the highest governance body	Dream Office is a public entity and its board of trustees are elected yearly by the entity's shareholders or unitholders. Each board is responsible for establishing its committees.	Governance page 104
	GRI 2-11 Chair of the highest governance body	Please see page 27 in the March 2024 Annual Information Form ↗ and page 13 in the April 2024 Notice of Annual Meeting of Shareholders and Management Information Circular ↗ .	Governance page 104
	GRI 2-12 Role of the highest governance body in overseeing the management of impacts	Overseeing approach to environmental, social, governance, and impact investing matters; The board of Dream Office have delegated such oversight to Governance, Environmental and Nominating Committee ↗ .	Governance page 104
	GRI 2-13 Delegation of responsibility for managing impacts	Dream Office's board have delegated responsibility for sustainability and ESG matters generally to Governance, Environmental and Nominating Committee ↗ . The committee provide oversight of the ESG Executive Committee, which is responsible for adopting the ESG framework, communicating sustainability strategy and commitment across the company and to key external stakeholders. The ESG Executive Committee delegates responsibility of managing portfolio sustainability initiatives including building certifications, energy, water and waste management and monitoring, as well as strategic initiatives. The Sustainability and ESG team meet quarterly with the ESG Executive Committee.	Governance page 104
	GRI 2-14 Role of the highest governance body in sustainability reporting		Governance page 104
	GRI 2-15 Conflicts of interest	Dream Office is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of trustees. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that are communicated to each board.	Governance page 104
	GRI 2-16 Communication of critical concerns	Dream Office is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of trustees or Board of Trustees of each such entity. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that were communicated to each board.	Governance page 104
	GRI 2-17 Collective knowledge of the highest governance body	Dream Office in advance of our net zero commitments, we conducted executive engagement on GHG accounting, what net zero means for our business and general ESG emerging trends. In addition, we also completed, in alignment with the TCFD, our first climate change scenario analysis and board training on ESG matters.	Governance page 104
GRI 2-18 Evaluation of the performance of the highest governance body	The Governance Committee of Dream Office has been delegated the task of overseeing and assisting management in developing systems and procedures to monitor and track performance on ESG goals, initiatives and commitments. Each governance committee is also tasked with recommending changes to its own committee charter and to its applicable board's mandate, which covers ESG matters. The governance charter of Dream Office recently amended by the board in early 2022 at the recommendation of the governance committee. Such amendments included the expansion of the scope of responsibility of governance committee in respect of ESG matters. Please see the respective charter of the governance committee for further details on ESG scope.		
GRI 2-19 Remuneration policies	Please see pages 25 in the March 2024 Annual Information Form ↗ and pages 26, 34-77 in the April 2024 Notice of Annual Meeting of Shareholders and Management Information Circular ↗ .		
GRI 2-20 Process to determine remuneration	Southlea Group, an independent compensation consultant, has reviewed and provided independent advice on Dream Office's executive compensation. Compensation is discussed in Notice of Annual Meeting of Shareholders and Management Information Circular ↗ .		
GRI 2-27 Compliance with laws and regulations	No material instances of non-compliance with laws and regulations during the reporting period.

GRI 302: Energy 2016	<p>GRI 302-1 Energy consumption within the organization</p> <p>GRI 302-3 Energy intensity</p> <p>GRI 302-4 Reduction of energy consumption</p>	<p>a. Total fuel consumption within the organization from non-renewable sources, in joules or multiples, and including fuel types used. Dream Office reports the quantity of natural gas and purchased electricity, district heating and cooling sources. Absolute and Like-for-Like energy disclosed in the tables are reported in kilowatt-hours equivalent (ekWh), and energy intensity is reported in kilowatt-hours equivalent per sf of GLA ekWh/sf.</p> <p>b. Total fuel consumption within the organization from renewable sources, in joules or multiples, and including fuel types used: Not applicable.</p> <p>c. In joules, watt-hours or multiples, the total:</p> <ul style="list-style-type: none"> i. electricity consumption: Electricity is used for lighting, heating, cooling and powering purposes in the assets. ii. heating consumption: Natural gas is used for heating and hot water purposes in the assets. iii. cooling consumption: Cooling is used from District Cooling system for cooling in the assets. iv. steam consumption: Steam is used from District Heating system for heating in the assets. <p>d. In joules, watt-hours or multiples, the energy total: Dream Office currently does not sell any energy.</p> <p>e. Total energy consumption within the organization, in joules or multiples: Energy consumption is disclosed in ekWh and GJ.</p> <p>f. Standards, methodologies, assumptions, and/or calculation tools used: Same as GRI 305.</p> <p>g. Source of the conversion factors used: Same as GRI 305.</p>	Dream Office Page 91 Supplemental Disclosures Page 162-164																		
GRI 303: Water and Effluents 2018	<p>GRI 303-1 Interactions with water as a shared resource</p> <p>GRI 303-5 Water consumption</p>	<p>a. Total water consumption from all areas in cubic meters: See table on water consumption. Water intensity in the tables is reported in cubic meters per square foot m³/sf.</p> <p>b. Total water consumption from all areas with water stress in megaliters: Disclosure is based on percentage of GLA of assets in water stress areas.</p> <p>c. Change in water storage in megaliters, if water storage has been identified as having a significant water-related impact: Not applicable.</p> <p>d. Any contextual information necessary to understand how the data have been compiled, such as any standards, methodologies, and assumptions used, including whether the information is calculated, estimated, modeled, or sourced from direct measurements, and the approach taken for this, such as the use of any sector-specific factors: Dream Office uses GRI standards and the operational control approach for collection of water consumption data. Water consumption is taken directly from utility or municipality or service providers water invoices/ data portals.</p>	Dream Office Page 91 Supplemental Disclosures Page 162 & 165																		
GRI 305: Emissions 2016	GRI 305-1 Direct (Scope 1) GHG emissions	<p>a. Gross direct (Scope 1) GHG emissions in metric tons of CO₂ equivalent: Scope 1 emissions are direct emissions that originate from the use of natural gas for space heating and water heating.</p> <p>b. Gases included in the calculation: Carbon dioxide (CO₂), methane (CH₄), nitrous oxide gases (N₂O) .</p> <p>c. Biogenic CO₂ emissions in metric tons of CO₂ equivalent: Dream Office does not report on biogenic CO₂.</p> <p>d. Base year for the calculation, if applicable, including: 2019 is the base year for Dream Office.</p> <p>e. Source of the emission factors and the global warming potential (GWP) rates used: For emission factors:</p> <table border="1" data-bbox="1019 1467 2573 1675"> <thead> <tr> <th></th> <th>2019</th> <th>2020</th> <th>2021</th> <th>2022</th> <th>2023</th> </tr> </thead> <tbody> <tr> <td>Natural Gas</td> <td>2022 National Inventory Report, 1990–2020 published by ECCC - Canada</td> <td>2020 National Inventory Report, 1990–2018 published by ECCC - Canada</td> <td>2021 National Inventory Report, 1990–2019 published by ECCC - Canada</td> <td>2022 National Inventory Report, 1990–2020 published by ECCC - Canada</td> <td>2023 National Inventory Report, 1990–2021 published by ECCC - Canada</td> </tr> <tr> <td></td> <td>2022 US Environmental Protection Agency's emission factors for GHG Inventory</td> <td>2021 US Environmental Protection Agency's emission factors for GHG Inventory</td> <td>2021 US Environmental Protection Agency's emission factors for GHG Inventory</td> <td>2022 US Environmental Protection Agency's emission factors for GHG Inventory</td> <td>2024 US Environmental Protection Agency's emission factors for GHG Inventory</td> </tr> </tbody> </table> <p>f. Consolidation approach for emissions; whether equity share, financial control or operational control: Operational control.</p> <p>g. 	GRI 2-10 Nomination and selection of the highest governance body	Dream Industrial is a public entity and its board of trustees are elected yearly by the entity's shareholders or unitholders. Each board is responsible for establishing its committees.	Governance page 129
	GRI 2-11 Chair of the highest governance body	Please see page 41 in the March 2024 Annual Information Form and page 13 in the April 2024 Annual Meeting Notice and Management Information Circular .	Governance page 129
	GRI 2-12 Role of the highest governance body in overseeing the management of impacts	Overseeing approach to environmental, social, governance, and impact investing matters; The board of Dream Industrial have delegated such oversight to Governance, Environmental and Nominating Committee .	Governance page 129
	GRI 2-13 Delegation of responsibility for managing impacts	Dream Industrial's board have delegated responsibility for sustainability and ESG matters generally to Governance, Environmental and Nominating Committee . The committee provide oversight of the ESG Executive Committee, which is responsible for adopting the ESG framework, communicating sustainability strategy and commitment across the company and to key external stakeholders. The ESG Executive Committee delegates responsibility of managing portfolio sustainability initiatives including building certifications, energy, water and waste management and monitoring, as well as strategic initiatives. The Sustainability and ESG team meet quarterly with the ESG Executive Committee.	Governance page 129
	GRI 2-14 Role of the highest governance body in sustainability reporting		Governance page 129
	GRI 2-15 Conflicts of interest	Dream Industrial is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of trustees. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that are communicated to each board.	Governance page 129
	GRI 2-16 Communication of critical concerns	Dream Industrial is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of trustees or Board of Trustees of each such entity. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that were communicated to each board.	Governance page 129
	GRI 2-17 Collective knowledge of the highest governance body	Dream Industrial in advance of our net zero commitments, we conducted executive engagement on GHG accounting, what net zero means for our business and general ESG emerging trends. In addition, we also completed, in alignment with the TCFD, our first climate change scenario analysis and board training on ESG matters.	Governance page 129
	GRI 2-18 Evaluation of the performance of the highest governance body	The Governance Committee of Dream Industrial has been delegated the task of overseeing and assisting management in developing systems and procedures to monitor and track performance on ESG goals, initiatives and commitments. Each governance committee is also tasked with recommending changes to its own committee charter and to its applicable board's mandate, which covers ESG matters. The governance charter of Dream Industrial recently amended by the board in early 2022 at the recommendation of the governance committee. Such amendments included the expansion of the scope of responsibility of governance committee in respect of ESG matters. Please refer to Governance, Environmental and Nominating Committee for further details on ESG scope.	
GRI 2-19 Remuneration policies	The Governance Committee of Dream Industrial has been delegated the task of overseeing and assisting management in developing systems and procedures to monitor and track performance on ESG goals, initiatives and commitments. Each governance committee is also tasked with recommending changes to its own committee charter and to its applicable board's mandate, which covers ESG matters. The governance charter of Dream Industrial recently amended by the board in early 2022 at the recommendation of the governance committee. Such amendments included the expansion of the scope of responsibility of governance committee in respect of ESG matters. Please refer to Governance, Environmental and Nominating Committee for further details on ESG scope.		
GRI 2-20 Process to determine remuneration	Compensation is discussed in Annual Meeting Notice and Management Information Circular .		
GRI 2-27 Compliance with laws and regulations	No material instances of non-compliance with laws and regulations during the reporting period.

	GRI 2-10 Nomination and selection of the highest governance body	Dream Residential is a public entity and its board of trustees are elected yearly by the entity's shareholders or unitholders. Each board is responsible for establishing its committees.	Page 142
	GRI 2-11 Chair of the highest governance body	Please see page 34 in the March 2024 Annual Information Form ↗ and page 13 in the April 2024 Annual Meeting Notice and Management Information Circular ↗ .	Page 142
	GRI 2-12 Role of the highest governance body in overseeing the management of impacts	Overseeing approach to environmental, social, governance, and impact investing matters; The board of Dream Residential have delegated such oversight to Governance, Environmental and Nominating Committee ↗	Page 142
	GRI 2-13 Delegation of responsibility for managing impacts	Dream Residential's board have delegated responsibility for sustainability and ESG matters generally to Governance, Environmental and Nominating Committee ↗ . The committee provide oversight of the ESG Executive Committee, which is responsible for adopting the ESG framework, communicating sustainability strategy and commitment across the company and to key external stakeholders. The ESG Executive Committee delegates responsibility of managing portfolio sustainability initiatives including building certifications, energy, water and waste management and monitoring, as well as strategic initiatives. The Sustainability and ESG team meet quarterly with the ESG Executive Committee.	
	GRI 2-14 Role of the highest governance body in sustainability reporting		Governance page 142
	GRI 2-15 Conflicts of interest	Dream Residential is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of trustees. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that are communicated to each board.	Governance page 142
	GRI 2-16 Communication of critical concerns	Dream Residential is a public entity and is therefore subject to securities regulations. These regulations require that certain material matters be considered (and, if needed, approved) by the board of trustees or Board of Trustees of each such entity. Day to day consideration of concerns is otherwise undertaken by management of each entity. Each entity has internal procedures and controls to ensure that material issues are directed to management for consideration. As for critical concerns, we disclose to the general public every material matter that is required to be disclosed in accordance with securities laws. We otherwise do not have a tally or list of critical concerns that were communicated to each board.	Governance page 142
	GRI 2-17 Collective knowledge of the highest governance body	Dream Residential in advance of our net zero commitments, we conducted executive engagement on GHG accounting, what net zero means for our business and general ESG emerging trends. In addition, we also completed, in alignment with the TCFD, our first climate change scenario analysis and board training on ESG matters.	Governance page 142
GRI 2-18 Evaluation of the performance of the highest governance body	The Governance Committee of Dream Residential has been delegated the task of overseeing and assisting management in developing systems and procedures to monitor and track performance on ESG goals, initiatives and commitments. Each governance committee is also tasked with recommending changes to its own committee charter and to its applicable board's mandate, which covers ESG matters. The governance charter of Dream Residential recently amended by the board in early 2022 at the recommendation of the governance committee. Such amendments included the expansion of the scope of responsibility of governance committee in respect of ESG matters. Please refer to Governance, Environmental and Nominating Committee Charter ↗ for further details on ESG scope.		
GRI 2-19 Remuneration policies	Please see pages 30; 33 in the March 2024 Annual Information Form ↗ and pages 36, 43-71 in the April 2024 Annual Meeting Notice and Management Information Circular ↗ .		
GRI 2-20 Process to determine remuneration	Compensation is discussed in Annual Meeting Notice and Management Information Circular ↗ .		
GRI 2-27 Compliance with laws and regulations	No material instances of non-compliance with laws and regulations during the reporting period.

GRI 3: Material Topics 2021			
GRI 302: Energy 2016	GRI 302-1 Energy consumption within the organization	<p>a. Total fuel consumption within the organization from non-renewable sources, in joules or multiples, and including fuel types used. Dream Residential reports the quantity of fuel combustion (natural gas, propane, diesel and gasoline) and purchased electricity sources. Absolute and Like-for-Like energy disclosed in the tables are reported in kilowatt-hours equivalent (ekWh), and energy intensity is reported in kilowatt-hours equivalent per sf of GLA ekWh/sf.</p> <p>b. Total fuel consumption within the organization from renewable sources, in joules or multiples, and including fuel types used: Not applicable.</p> <p>c. In joules, watt-hours or multiples, the total:</p> <ul style="list-style-type: none"> i. electricity consumption: Electricity is used for lighting, heating, cooling and powering purposes in the assets. ii. heating consumption: Natural gas is used for heating and hot water purposes in the assets. <p>d. In joules, watt-hours or multiples, the energy total: Dream Residential currently does not sell any energy.</p> <p>e. Total energy consumption within the organization, in joules or multiples: Energy consumption is disclosed in ekWh and GJ.</p> <p>f. Standards, methodologies, assumptions, and/or calculation tools used: Same as GRI 305.</p> <p>g. Source of the conversion factors used: Same as GRI 305.</p>	Dream Residential Page 138 Supplemental Disclosures Page 177-178
	GRI 302-2 Energy consumption outside the organization	<p>a. Total fuel consumption outside the organization from non-renewable sources, in joules or multiples, and including fuel types used. Dream Residential reports the quantity of fuel combustion natural gas (propane, diesel and gasoline) and purchased electricity sources. Absolute energy disclosed in the tables are reported in kilowatt-hours equivalent (ekWh), and energy intensity is reported in kilowatt-hours equivalent per sf of GLA ekWh/sf.</p> <p>b. Total fuel consumption outside the organization from renewable sources, in joules or multiples, and including fuel types used: Not applicable.</p> <p>c. In joules, watt-hours or multiples, the total:</p> <ul style="list-style-type: none"> i. electricity consumption: Electricity is used for lighting, heating, cooling and powering purposes in the assets. ii. heating consumption: Natural gas is used for heating and hot water purposes in the assets. <p>d. In joules, watt-hours or multiples, the energy total: Dream Residential currently does not sell any energy.</p> <p>e. Total energy consumption outside the organization, in joules or multiples: Energy consumption is disclosed in ekWh and GJ.</p> <p>f. Standards, methodologies, assumptions, and/or calculation tools used: Same as GRI 305.</p> <p>g. Source of the conversion factors used: Same as GRI 305.</p>	
	GRI 302-4 Reduction of energy consumption		
GRI 303: Water and Effluents 2018	GRI 303-1 Interactions with water as a shared resource		Dream Residential Page 138 Supplemental Disclosures Page 177-178
	GRI 303-5 Water consumption	<p>a. Total water consumption from all areas in cubic meters: See table on water consumption.</p> <p>b. Total water consumption from all areas with water stress in megaliters: Please refer to Supplemental Disclosures.</p> <p>c. Change in water storage in megaliters, if water storage has been identified as having a significant water-related impact: Not applicable.</p> <p>d. Any contextual information necessary to understand how the data have been compiled, such as any standards, methodologies, and assumptions used, including whether the information is calculated, estimated, modeled, or sourced from direct measurements, and the approach taken for this, such as the use of any sector-specific factors: Dream Residential uses GRI standards and the operational control approach for collection of water consumption data. Water consumption is taken directly from utility or municipality or service providers water invoices/data portals.</p>

Task Force for Climate-related Financial Disclosures (TCFD) Recommendations

Category	Recommendations	Information and/or Linked Resources	Location/Section <small>(if included in the body of the report)</small>
Governance	a. Describe the board's oversight of climate-related risks and opportunities	For further information see Governance, Compensation and Environmental Committee Charter	Page 142
	b. Describe management's role in assessing and managing climate-related risks and opportunities		Page 142
Strategy	a. Describe the climate-related risks and opportunities the organization has identified over the short, medium, and long term		Governance page 37-41 Page 143
	b. Describe the impact of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning		Governance page 37-41 Page 143
Risk Management	a. Describe the organization's processes for identifying and assessing climate-related risks		Governance page 37-41 Page 143
	b. Describe the organization's processes for managing climate-related risks		Governance page 37-41 Page 143
	c. Describe how processes for identifying, assessing, and managing climate-related risks are integrated into the organization's overall risk management		Governance page 37-41 Page 143
Metrics and Targets	a. Disclose the metrics used by the organization to assess climate-related risks and opportunities in line with its strategy and risk management process		Governance page 37-41 Page 143
	b. Disclose Scope 1, Scope 2 and, if appropriate, Scope 3 greenhouse gas (GHG) emissions and the related risks		Page 138 Supplemental Disclosures page 177-178
	c. Describe the targets used by the organization to manage climate-related risks and opportunities and performance against targets		Page 138 Supplemental Disclosures page 177-178

Forward-looking Information

Certain information in this Sustainability Report may constitute “forward-looking information” within the meaning of applicable securities legislation. Such statements include, but are not limited to, statements with respect to certain objectives of Dream Unlimited Corp. (“Dream Unlimited”), Dream Office Real Estate Investment Trust (“Dream Office REIT”), Dream Industrial Real Estate Investment Trust (“Dream Industrial REIT”), Dream Impact Trust (“Dream Impact”) and Dream Residential Real Estate Investment Trust (“Dream Residential REIT” and, collectively with Dream Unlimited, Dream Office REIT, Dream Industrial REIT and Dream Impact, “Dream” or the “Dream Entities” and, in respect of forward-looking statements indicated below to apply to a specific Dream Entity, “our” refers to such Dream Entity) and strategies to achieve such objectives; the sustainability goals of each of the Dream Entities or any of their properties, including their respective net zero greenhouse gas emissions (“GHG”) targets, net zero operational carbon goals, total embodied carbon goals, and commitments and goals of continuing to publish sustainability reports and other publications in respect of sustainability matters, and benefits to be derived therefrom; the belief that Dream’s business can create positive and measurable impacts on people and the planet, create new business opportunities and deliver stakeholder value; the intention to communicate certain of the Dream Entities’ strategies and progress to achieve their net zero and sustainability goals, to maintain stakeholder engagement and to build on stakeholder feedback and use it to improve our business through certain initiatives; Dream’s capacity to address environmental, social and governance (“ESG”) challenges while delivering returns; the expectation that there will be an increase in ESG regulations and evolution of ESG best practices and that parts of our business may be affected; our intention to monitor the regulatory environment, trends and investor requirements in respect of ESG matters; goals regarding limiting emissions from existing properties and developments, including regarding our net zero GHG developments, and related GHG reduction targets and project characteristics; the intention that all projects in our development pipeline will be net zero; the value of Dream’s net zero development pipeline; the expectation that the projected value of net zero communities will help us realize economies of scale, attract financing and generate returns for investors; our continued pursuit of additional renewable energy program opportunities; our intention to learn from initiatives related to reducing embodied carbon and to optimize our strategy; our efforts to mitigate transition risk, including continuing to monitor of our exposure to transition risks and align with Task Force on Climate-Related Financial Disclosures (“TCFD”) recommendations; our continued enhancement of our climate reporting to align with best practice climate standards; expectations, goals, implementation, and commitments in respect of Dream’s Net Zero Action Plan, and resulting benefits, including contributing to our resiliency, fostering innovation and collaboration, and increasing asset value; the forward-looking plans to deliver strategy and implementation on our Net Zero Action Plan with respect to baselining, roadmapping, execution and oversight; expectations and goals in respect of our portfolio roadmaps to net zero, including their expected benefits and uses, as well as the respective individual goals under the Net Zero Action Plan for each Dream Entity; the expected benefits to result from investing in net zero initiatives, including the impact on people and the planet and delivery of returns to our investors; our belief that our performance will generate profits and have positive effects on people and the planet; expectations regarding market trends and corporate emission reduction commitments, including the resulting increase in tenant demand for low carbon spaces; our capacity to identify and transfer, mitigate or manage certain risks, including climate change risk, and to assess, and increase our resiliency in respect of, climate change, the risk management plans of each Dream Entity, and expected benefits therefrom; our capacity to manage and operate our buildings efficiently, including in respect of reducing energy and water consumption, and expected benefits therefrom; the conduct of flood and catastrophic risk assessment; the establishment of climate-related strategies for different property asset types and regions; Dream’s charitable commitments and activities; employee engagement and development forward-looking plans; diversity, inclusion and advancement forward-looking plans; health and safety forward-looking plans; volunteer and giving forward-looking plans; risk management forward-looking plans; the aim of our data governance program to strengthen our data privacy oversight; the cybersecurity and information governance forward-looking plans; our boards’ target for women to comprise a minimum of 30% of directors or trustees; our intention to conduct board or committee-level education sessions; expectations regarding portfolio occupancy, affordability of units, number of units under development, including the number of condominium units, affordable housing units, residential units, and purpose-built rental units, commercial and retail GLA, and the development pipeline of the Dream Entities, including in respect of net zero communities. Such statements also include,

with respect to Dream Unlimited, Dream Unlimited’s commitment to achieve net zero GHG emissions by 2035 for operations and new developments, including scope 1, 2 and select scope 3 (operational and development) emissions; Dream Unlimited’s AUM targeting net zero GHG emissions by 2035 and 2050; the value of projected net zero communities being developed by Dream Unlimited; Dream Unlimited’s target of achieving a 20% reduction in carbon intensity within the net zero boundary by 2025 and a 50% reduction in carbon intensity within the net zero boundary by 2030; Dream Unlimited’s expectation that the sale of Arapahoe Basin will close in 2024; Dream Unlimited’s expectations regarding the Quayside project, including net zero GHG emissions and the amount of public forested green space; our energy management and water management commitments, including our strategy and goals per our Energy Policy and Water Conservation Policy; the Social Procurement Strategy 2025 targets; our efforts to mitigate transition risk, including continuing to monitor of our exposure to transition risks and align with TCFD recommendations; our continued enhancement of our climate reporting to align with best practice climate standards; the use of asset-type specific climate risks to develop tactical methodologies for reducing the exposure of portfolio assets to climate perils; and, the expectation that Brightwater will be transformed into a vibrant and diverse community upon completion; and, our environmental, social, and governance forward-looking plans;

with respect to Dream Impact, its commitment to achieve net zero scope 1 and 2 GHG emissions by 2035, and net zero select scope 3 (operational and development) GHG emissions; its strategy to improve waste diversion rates at its office assets; net zero GHG emissions by 2035 target for 59% of Dream Impact’s AUM; the value of projected net zero communities being developed in partnership with Dream Impact; the 20% reduction in carbon intensity target within the net zero boundary by 2025 and a 50% reduction target in carbon intensity within the net zero boundary by 2030; a property’s targeted GHG emissions reduction due to retrofitting; our intention to add additional IREE certifications; the expected date of completion for retrofitting buildings, and the amount of funding the building may receive as part of the Deep Retrofit Challenge; our ability to improve energy, water and emission intensity at our properties, including through Dream Impact’s asset manager’s Energy Policy and Water Conservation Policy; the implementation of leak detection systems in additional buildings; the estimated reduction in water consumption by properties due to leak detection systems; the Social Procurement Strategy 2025 targets; expectations regarding the Quayside project, including net zero GHG emissions and the amount of public forested green space; our efforts to mitigate transition risk, including continuing to monitor of our exposure to transition risks and align with TCFD recommendations; and, our environmental, social, and governance forward-looking plans;

with respect to Dream Office REIT, its commitment to achieve net zero scope 1 and 2 GHG emissions by 2035, and net zero select scope 3 (operational and development) GHG emissions; the intention to continue working on a strategy to improve its waste diversion rates at its office assets; the net zero GHG emissions target by 2035 for 82% of Dream Office REIT’s assets; the 20% reduction in carbon intensity within the net zero boundary target by 2025 and 50% reduction in carbon intensity within the net zero boundary target by 2030; a property’s targeted GHG emissions reduction, estimated energy reduction, or costs saved on utilities due to retrofitting; the estimated amount of tCO₂e that will be saved; our aim

Forward-looking information

to decrease water consumption through retrofits and efficiency upgrades; our ongoing commitment to waste management and continuing to improve its waste management practices, including aiming to implement centralized waste program into tenant spaces in 2024; the Social Procurement Strategy 2025 targets; our efforts to mitigate transition risk, including continuing to monitor of our exposure to transition risks and align with TCFD recommendations; the work product of the resiliency working group and the expected benefits therefrom; and, our environmental, social, and governance forward-looking plans;

with respect to Dream Industrial REIT, its commitment to achieve net zero scope 1 and 2 GHG emissions by 2035, and net zero select scope 3 (operational) GHG emissions by 2050; targeting the net zero GHG emissions target by 2050 for 99% of Dream Industrial REIT's AUM is; the 20% reduction in Scope 1 and 2 GHG emissions intensity within the net zero boundary target by 2025, 50% reduction in Scope 1 and 2 GHG emissions intensity within the net zero boundary target by 2030, and net zero Scope 1, Scope 2 and select Scope 3 emissions (development) target by 2035, net zero select scope 3 emissions (operational); the commitment to continuing to increase data coverage, improve data quality and work towards meeting its net zero goals; any target of attaining green building certifications, and the strategies or implementations to achieve such certification; the expected completion date of projects; our intention to continue to refine and improve our net zero development process and expand our portfolio of high-efficiency and low carbon buildings; efforts and strategies to expand its data coverage for Scope 3 tenant emissions; its intention to use the environmental management system to target data collection of its material Scope 3 GHG emission sources, which includes emissions from downstream-leased assets; the continued exploration of opportunities to invest in clean power generation and expand our renewable energy platform in Canada and Europe; the expectation that the revenue stream from selling Renewable Energy Certificates will continue to grow and that demand for Renewable Energy Certificates will increase in the future; the estimated amount of tCO₂e that will be saved in relation to our renewable energy projects; expectations of being a steward of the natural environment; the intention to evaluate the impact and opportunities of aligning with the Task Force on Nature-related Financial Disclosures on its portfolio over time; our commitment to promoting the highest standards of social responsibility throughout the organization and goal to improve the lives of employees; continuing to work with tenants to benchmark sustainability priorities and goals, and to identify priority initiatives and assets for sustainable investments; the scheduled feasibility assessments in connection to renewable energy projects; our efforts to mitigate transition risk, including continuing to monitor of our exposure to transition risks and align with TCFD recommendations; the work product of the resiliency working group and the expected benefits therefrom; environmental, social, and governance forward-looking plans; expectations regarding our implementation of our Sustainable Roofing Policies; our goal of obtaining green building certifications for all of our new developments; and, the continued integration of sustainability initiatives with our leasing program;

and with respect to Dream Residential REIT, its commitment to achieve net zero GHG emissions in scope 1 and 2 by 2050; the net zero GHG emissions target by 2050 for 100% of Dream Residential REIT's AUM; its commitment to operating in an environmentally responsible manner; efforts to preserve natural resources and manage residential assets with long-term positive impact on its communities; the intention of adding value to properties through retrofit projects by reducing operating costs and improve leasing; its commitment to maintain a culture of inclusivity and creating meaningful opportunities for its employees, maintaining strong relationships with its residents, and engaging with local communities and cities; the creation of an action plan; our efforts to mitigate transition risk, including continuing to monitor of our exposure to transition risks and align with TCFD recommendations; and, our environmental, social, and governance forward-looking plans.

Forward-looking information generally can be identified by words such as “objective”, “may”, “will”, “would”, “expect”, “intend”, “estimate”, “anticipate”, “believe”, “could”, “seek”, “strive”, “plan”, “target”, “project”, “scheduled”, “potential”, “strategy” or “continue” or similar expressions suggesting future outcomes or events. Forward-looking information is based on a number of assumptions and is subject to a number of risks and uncertainties, many of which are beyond the Dream Entities' respective control, which could cause actual results to differ materially from those disclosed in or implied by such forward-looking information. The assumptions, which may prove to be incorrect, include, but are not limited to, assumptions with respect to each of our markets, including the general economy; that no unforeseen changes in the legislative and operating framework for our businesses will occur; that we will meet our future objectives, priorities and growth targets; that we receive the licenses, permits or approvals necessary in connection with our projects; that we will have access to adequate capital to fund our future projects, plans and any potential acquisitions; that we are able to identify high quality investment opportunities and find suitable partners with which to enter into joint ventures or partnerships; that we do not incur any material environmental liabilities; inflation and interest rates will not materially increase beyond current market expectations; our valuation assumptions; availability of equity and debt financing; foreign exchange rates; conditions within the real estate market; and competition for and availability of acquisitions. Although the forward-looking statements contained in this Sustainability Report are based on what the Dream Entities believe are reasonable assumptions, there can be no assurance that actual results will be consistent with these forward-looking statements. Factors or risks that could cause actual results to differ materially from those set forth in the forward-looking statements and information include, but are not limited to, the risk of adverse global market, economic and political conditions and health crises; inflation; risks associated with unexpected or ongoing geopolitical events, including disputes between nations, terrorism or other acts of violence, international sanctions and the disruption of movement of goods and services across jurisdictions; risks related to a potential economic slowdown in certain of the jurisdictions in which we operate and the effect inflation and any such economic slowdown may have on market conditions and lease rates; risks inherent in the real estate industry; risks relating to investment in development projects; impact investing strategy risk; risks relating to geographic concentration; risks inherent in investments in real estate, mortgages and other loans and development and investment holdings; credit risk and counterparty risk; competition risks; environmental and climate change risks; risks relating to access to capital; interest rate risk; the risk of changes in governmental laws and regulations; tax risks; foreign exchange risk; acquisitions risk; and leasing risks.

All forward-looking information in this Sustainability Report speaks as of the date of this Sustainability Report. None of the Dream Entities undertakes to update any such forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable law. Additional information about these assumptions and risks and uncertainties is contained in each of Dream Unlimited Corp.'s, Dream Office REIT's, Dream Industrial REIT's, Dream Impact's, and Dream Residential REIT's filings with securities regulators, including each Dream Entity's latest annual information form and annual and quarterly management discussion and analysis, which are available on SEDAR+ at www.sedarplus.com under each of the Dream Entities' profiles and incorporated by reference. These filings are also available at Dream Unlimited Corp.'s, Dream Office REIT's, Dream Industrial REIT's, Dream Impact Trust's and Dream Residential REIT's respective websites at www.dream.ca, www.dreamofficereit.ca, www.dreamindustrialreit.ca, www.dreamimpacttrust.ca, and www.dreamresidentialreit.ca.

Specified Financial Measures and Other Disclosures

In addition to using financial measures determined in accordance with IFRS, we believe that important measures of operating performance include certain financial measures that are not defined under IFRS. Throughout this Sustainability Report, there are references to certain non-GAAP financial ratios, including debt-to-asset value, as well as other measures discussed elsewhere in this Sustainability Report, which management believes are relevant in assessing the economics of the business of Dream Impact. These performance and other measures are not financial measures under IFRS and may not be comparable to similar measures disclosed by other issuers. However, we believe that they are informative and provide further insight as supplementary measures of financial performance, financial position or cash flow, or our objectives and policies, as applicable. Certain additional disclosures such as the composition, usefulness and changes, as applicable, of the non-GAAP ratios included in this Sustainability Report have been incorporated by reference from the management's discussion and analysis of Dream Impact for the year ended December 31, 2023, dated February 12, 2024 (the "MPCT MD&A for FY 2023") and can be found under the section "Specified Financial Measures and Other Disclosures – Non-GAAP Ratios – Debt-to-asset value".

Throughout this Sustainability Report, there are references to certain supplementary financial measures including, in the case of Dream Unlimited Corp., assets under management. The composition of supplementary financial measures included in this Sustainability Report has been incorporated by reference from the management's discussion and analysis of Dream Unlimited for the three months ended March 31, 2024, dated May 14, 2024 (the "DRM MD&A for Q1 2024") and can be found under the section "Supplementary and Other Financial Measures – Assets under management ("AUM")".

The DRM MD&A for Q1 2024 is available on SEDAR+ at www.sedarplus.com under Dream Unlimited Corp.'s profile and on Dream Unlimited's website at www.dream.ca under the Investors section, and the MPCT MD&A for FY 2023 is available on SEDAR+ at www.sedarplus.com under Dream Impact Trust's profile and on Dream Impact Trust's website at www.dreamimpacttrust.ca under the Investors section.
